Insider Tips and Secrets to Get The MOST Out of Your Computer JULY 2014 • VOL 11 • ISSUE 7

It's Time To Declare Freedom From Online Identity Theft

If you want to prevent your personal or business identity from being stolen by a cybercriminal, this report is a MUST-read!

This informational report outlines in plain, non-technical English common mistakes that many small business owners make with their computer and network security that puts their personal information and identity at risk of being stolen. It also further explains what identity theft is, and how you can prevent it from happening to you and your business.

You'll Discover:

- **The top 3 ploys used by online identity thieves** to easily gain access to your business and personal information, and how to avoid them.
- **10 sneaky e-mails used to steal your identity** that you should IMMEDIATELY delete if they land in your in-box.
- **One easy, surefire way to keep your network and computers safe** and secure from online thieves.
- **What you need to know about the NEW scams being used** to steal personal information via social media sites like Facebook.
- **Best practices to prevent you or your employees** from inadvertently giving away passwords and other "keys to the castle" to Internet criminals.
