Insider Tips and Secrets to Get The MOST Out of Your Computer

DEC 2013—VOL 10—ISSUE 1

Special Alert For St. Louis Business Owners:

Backing Up Your Server Alone May Still Lead To Data Loss

Most business owners know that it is important for their server(s) to be backed up. But what about your computers (desktops, laptops, Macs)? Though it's true that quite a bit of your data is stored on your servers and backed up on your network, your computer itself (your icons, your background, all of your settings, your local files, music and pictures you have stored, and all of your software applications) is most likely NOT being backed up.

If your computer were to crash, get a virus, or simply die, all of that information could be lost. The company data that you've saved to your server would still be there IF you are saving everything to your server (a big if for many people), but everything else would be gone. You would have to recreate that computer by reloading all of the software and settings. And if you've ever had this happen to you, you know that it can take a significant amount of time to do. What a pain!

So, How Do You Solve This

Simple. You use an imaging software on your computer that automatically takes periodic images of the machine and sends them offsite or to your server for safe keeping. Imaging software takes a "picture" or "snapshot" of your computer so it records it exactly as it is with all of the software, settings and local files you have on it. This way, if your computer ever crashes, there is no need to re-load everything onto it and reconfigure the computer. Simply restore your last "image" from before the crash and your computer can be back to its old self again. This is a huge time saver and can be a life saver when something goes wrong.

Protect Your Desktops And Laptops!

Sign-up for a 30-day FREE trial (a \$100 value) of our Desktop Backup Solution and see for yourself how simple it can be to keep your computer data and files safe and sound. You may be amazed the peace of mind that you find when you are completely backed up!
