Insider Tips and Secrets to Get The MOST Out of Your Computer

JULY 2013 — VOL 10 — ISSUE 7

**That's why I have you, so that I don't know to concern myself with any of these problems."**

We decided to call J&B Technologies after our previous IT company was not solving the problem.

J&B immediately jumped in and diagnosed our server problem and gave us a plan to really fix the issue instead of band-aiding.

I like the fact that someone answers the phone when you call J&B and they get back to you as promised.

Bob Palmer the tech from J&B was a tremendous help and really took the time to make sure our drives were replaced correctly and for once I felt someone really cared about what we needed.

I would highly recommend J&B to anyone to anyone looking for an IT company as they take the time get to the root of the problem and then solve the issue with expertise.
