Insider Tips and Secrets to Get The MOST Out of Your Computer

OCTOBER 2011 — VOL 8 — ISSUE 10

## Is Your Computer Haunted?

### Our Free Service Call Will “Exorcise” The Ghosts, Gremlins And Goblins Causing Problems In Your Computer Network

Are your office PCs slow, crashing and freezing up? Are you haunted by pop ups and spam? Is your PC acting so weird that you think it’s possessed? If so, these are all signs of an ill-maintained computer network that’s infected with spyware, viruses or corrupt files. If left alone, these problems could evolve into a much bigger (and more expensive) problem.

### We’ll Solve The Computer Problem Of Your Choice For **FREE!**

Since Halloween is right around the corner, we’d like to give you a **FREE** 2-hour service call as a way of introducing fast, friendly computer support services at no cost or risk to you. Just say the word and we’ll send one of our qualified “ghost busting” technicians to your office to work on the computer problem of your choice, including:

- Diagnose slow, unstable PCs
- Scan for hidden spyware, viruses or corruptions
- Perform a quick “network tune up”
- Check your network’s firewall and security settings
- Validate the integrity and reliability of your data backups
- Discuss a project or upgrade you’re considering

### Why Are We Giving Away **FREE** Services?

Some people think we are crazy for offering free services. They say, “Aren’t you scared people will just take advantage of you?” The truth is, some people might – but we know that most business owners are just honest people trying to find someone they can trust to fix and maintain their computer networks.
