

OneTEAM Email Assurance

Filter Out Spam and Viruses Before They Reach and Impede Your Network!

OneTEAM Email Assurance is ProductiveTech's fully managed email protection service, eliminating up to 99% of unwanted email before it reaches a user's network. It is a powerful and flexible service that enables organizations of any size to manage email communications with the same level of control and protection as the Fortune 500. No hardware or software is required.

Email Protection

The OneTEAM Email Assurance filtering system is continually revised 2,000-4,000 times per day to ensure protection from even the newest Spammer tricks and tactics. It works on multiple platforms and utilizes proprietary detection systems, 4 virus scanning engines, more than 60 filtering techniques, and front-wave protection to rid email from spam, worms, viruses and all other protocol-based vulnerabilities.

Disaster Recovery

If your email server is not accepting email for any reason, such as Internet connection failures, power outages, natural disaster, Local Area Network failures, internal routing problems, mail server hardware or software failures, OneTEAM Email Assurance's delivery manager will encrypt and queue email until your server is back online as a measure of business continuity.

Perimeter Protection

OneTEAM Email Assurance acts as an organization's gated "front door," shielding Internet facing SMTP gateways and message servers from numerous threats so that only legitimate e-mail is delivered to user's inboxes.

Server Freedom

OneTEAM Email Assurance frees your server of significant email processing and filtering responsibilities; responsibilities that can bring a server to a crawl during an attack. In addition, your server's hard drives will remain clear of accumulating spam as will the valuable space within your email system.

Implementation

Complete implementation of the OneTEAM Email Assurance system is quickly achieved and completely managed by ProductiveTech. As an Application Service Provider (ASP) solution, there is no hardware or software required.
