F8 SECURE HOSTED EXCHANGE

F8 Secure Hosted Exchange Service *Why outsource Exchange?*

RELIABILITY. SECURITY. LOWER COSTS.

Companies who outsource their Exchange solution enable IT staff to work on tasks more closely aligned with core business goals. Experience the added reliability, security and simplicity of F8 Consulting's Hosted Exchange solution.

- Eliminate the need to purchase and maintain hardware and software to run Exchange
- Eliminate the overhead of hiring or training employees on Exchange administration
- Receive automatic license updates - No need to hassle with Exchange licensing!
- Allocates your company's resources to revenue enhancing projects rather than managing IT projects
- Receive customer service 24x7x365 from system experts

In addition to email hosting, the service also includes:

- *State-of-the-art Spam filtering services.* This will prevent spam, phishing scams, viruses and other internet pollution from impacting email operations. Each individual user will receive daily reporting on detained emails. These reports can be viewed and/or released by administrators or individuals users depending on the configuration selected by the administrator.
- *Unlimited mailbox space.* Unlike POP3 technology, F8 Consulting's Hosted Exchange Service Plan allows for unlimited mailbox storage. With this aspect of the product, managers can quit monitoring account quotas and focus their energies on other aspects of maintaining a strong network system.

If you would like more information about incorporating the F8 Consulting Hosted Exchange Service Plan into your network, feel free to contact us at any time. One of our experienced team members will respond to your request with the answers you're looking for. You can either give us a call at (201) 839-5410 or email us at info@f8consulting.com. Either way, we'll provide you with quick, courteous service.

Also included: SecureTide™

SecureTide software prevents spam, phishing, viruses and other internet pollution from impacting email operations. At the heart of service is a proprietary Spam detection system that utilizes more than 60 types of filtering techniques. The following outlines how the SecureTide solution determines whether hand-off to the client email system or the offsite email quarantine is more suitable.

CONSULTING

HOSTED EXCHANGE VS. IN-HOUSE IMPLEMENTATION

There are many factors to consider when deciding whether to use an outsourced service provider (OSP) or maintaining your own Exchange system. By choosing a Hosted solution you receive all of the functionality of the feature-rich Exchange environment without the worries or difficulties associated with of maintaining your own servers and infrastructure. The following table provides a comparison to help you decide which solution best fits your company's needs.

	HOSTED SOLUTION	IN-HOUSE IMPLEMENTATION
Financial Investment	<ul style="list-style-type: none"> Minimal initial costs because there is no need to purchase hardware or software and no need for added IT personnel Ongoing fees are low, predictable and easy to budget If you grow or shrink, our solution grows or shrinks with you No hassles with licensing - most current version of Outlook is provided 	<ul style="list-style-type: none"> Large initial financial investment, often thousands of dollars for hardware, software licenses, training IT resources and more Maintenance costs may also be unpredictable May require system licenses or subscription updates
Reliability and Maintenance	<ul style="list-style-type: none"> No proprietary systems to install or maintain Systems maintained and managed 24x7x365 by Microsoft certified experts* User maintenance can be performed by a non-technical person 	<ul style="list-style-type: none"> Requires development, maintenance and retention of in-house expertise Depends on reliability of in-house infrastructure
Demand on IT Resources	<ul style="list-style-type: none"> Liberates bandwidth Reduces traffic on network infrastructure (routers, firewalls, gateways, mail servers) 	<ul style="list-style-type: none"> Uses additional bandwidth and storage Increases the load on network infrastructure
Security	<ul style="list-style-type: none"> Security and mobility services are available on demand, including automatic TLS encryption and multiple Spam and virus filters Exchange rules are updated every 4 seconds 	Constant vigilance is required to combat email threats from penetrating the infrastructure and security solutions are costly and complex
Effectiveness	<ul style="list-style-type: none"> Stops up to 99% of unwanted email Protects from viruses, phishing, DoS, and hijacking threats 	<ul style="list-style-type: none"> Requires constant adjustments to be successful In-house resources are continually used to maintain effectiveness
Risk	<ul style="list-style-type: none"> Outsourced disaster recovery option reduces risk of loss 	<ul style="list-style-type: none"> Unforeseen disaster recovery depends on in-house systems
24/7 Support	Included*	Depends on in-house staff's hours and availability
Admin Control	Web-based user interface	Local control

* After-hours support and maintenance provided by partner provider's Microsoft certified staff.
