

# Google Apps Education Edition

---

“The nature of college computing is rapidly changing, with connectivity becoming the new essential, as students rely on communication and collaboration. Google Apps will take them closer to living and thriving in a virtual world, not just while they are students here, but also after they graduate.”

**Ron Bonig**

Executive Director of  
Technology Operations  
George Washington University

---

“With Google Apps we’ve achieved cost savings associated with labour and operational efficiencies – and we expect the collaborative aspects of Google Apps to be a major productivity benefit going forward.”

**John Murphy**

IT Director  
Trinity College, Dublin, Ireland

## General Overview

Google Apps Education Edition arises from our belief that any academic institution – from a neighborhood school to an international university – can become a more effective learning community through one common access point. With Google Apps, you can offer your school free integrated solutions for email, calendaring, and online document and site sharing. Your students and staff will love you for it.

## Available Applications

**Gmail** – With 7GB of storage, built-in chat, innovative search, and IMAP capability, students no longer need to worry about email quotas or spam.

**Google Talk** – Keep students in contact even when they’re not on campus, with instant messaging, file transfers, and voice calling over the web.

**Google Calendar** – Google Calendar makes it easy to organize schedules and share calendars with others.

**Google Docs** – Enable students to collaborate real time on documents, spreadsheets, and presentations, across campus or around the world.

**Google Sites** – Google Sites makes it easy to share all types of information, without any technical language to learn and access from anywhere.

**Google Video** – Securely and privately share videos with your school’s faculty and students. (10GB free)

**Extensibility APIs** – Easily integrate with your school’s current systems or other third party solutions.

**Help and support** – 24/7 online and phone support assistance available.

## Quick Facts

**Free for educational institutions** You don’t have to buy anything to use Google Apps Education Edition – no hardware, no software, and no consulting.

**Strict privacy policy** Google Apps will always treat your users’ personal information with the utmost care and security. Visit [www.google.com/privacy](http://www.google.com/privacy) to learn more.

**Message Security and Discovery** Protect your school by archiving faculty email and enabling extra security settings such as email content filtering. Available as an add-on to Apps Education with a 66% discount.

**Easy integration with existing systems** Open standards and APIs make it easy to integrate Google Apps with existing systems, simplifying user administration and keeping costs low.

**Broad language and platform support** Our applications like Gmail are available in 40 languages and support multiple browsers and operating systems.
