

Satisfaction Is Our Goal

Helping seniors and their loved ones find the long-term care answers they need is what we do, but knowing our clients are happy and thriving is why we do it.

The positive, caring approach of Serving Seniors tremendously eased my mom's transition to assisted living."

— Susan G. (daughter)

Serving Seniors has been indispensable on many occasions. Their professionalism, competence, and caring attitude are exactly what any caregiver needs."

— Joseph C. (son)

Quality Service

At Serving Seniors, our goal is to help our clients and their caregivers experience the highest quality of life possible. When you work with Serving Seniors, you'll always have:

- Compassionate, knowledgeable advocacy that you can trust
- Local support for long-distance caregiving
- Fewer demands on your time
- A customized plan of care based on unique needs
- A trusted liaison to physicians and other service providers

Professional Care Managers You Can Trust

We Treat Our Clients Like Family

Serving Seniors is a professional geriatric care management company managed and staffed by experienced nurses and social workers. Our licensed professional care managers specialize in helping older adults with physical, cognitive or emotional issues establish and maintain the best quality of life possible.

We know that researching care options for a loved one can be overwhelming. Our mission is to help you and your loved one make informed decisions about your long-term care options and find the care solutions that will meet those unique needs.

Our Services

Helping families find peace of mind and improving our clients' quality of life is of the utmost importance to us. We provide a comprehensive assessment in the hospital or current living setting to identify needs with an individualized plan of care that meets those needs.

Assist

- Advise and support client, family or guardians in making difficult decisions
- Monitor and implement needed changes in care
- Review financial, legal, and medical issues and offer referrals to geriatric specialists
- Assist with the set-up and monitoring of medications
- Advise about significant health changes and make recommendations
- Coordinate and escort client to appointments
- Advocate for client and collaborate with physicians and other service providers
- Provide nutrition, medication, and home safety assessments, identify issues and offer practical solutions
- Identify and coordinate assistance with money management
- Identify and assist with processing entitlements and insurance claims

Support

- Manage care for a client whose family lives at a distance
- Provide family crisis intervention
- Offer counseling, caregiver education and support

Transition

- Make informed recommendations for home care, assisted living, nursing home placements and other living settings
- Inform on quality, cost, and availability of care providers
- Coordinate transition from one care setting to another
- Arrange and oversee care services after transition
