“What Every Business Owner Should Know About Backing Up Their Data To Get A FAST, Easy, And Economical Recovery In The Event Of A Disaster”

If your data is important to your business and you cannot afford to have your operations halted for days – even weeks – due to data loss or corruption, then you need to read this report and act on the information inside. This report will outline the most commonly made, costly mistakes that most small business owners make with their data backups, as well as important questions you should ask any offsite backup provider before giving them access to your data.

You'll Discover:

- What remote, offsite, or managed backups are, and why EVERY business should have them in place.
- 7 critical characteristics you should absolutely demand from any remote backup service; do NOT trust your data to anyone who does not meet these criteria.
- Where tape backups fail and give you a false sense of security.
- Frightening trends, cases, and questions every business owner should know and consider regarding data security.
- The single most important thing to look for in a remote backup service provider.
