

THE MOST RELIABLE WATER VENDING TELLER EVER BUILT

Dependability The Bluedrop Dual Vendor has achieved its reputation as the go-to choice for water vending operators as a result of its service record and simple, rugged and reliable design. We offer our customers the exact same equipment that we operate within our own business. Unlike other vending machine suppliers, we don't build our water vending machines to sell - we built them to work.

Customization Most Bluedrop vendors are built to order, and we make this process fun for our customers. With some of the most creative upgrade options in the industry, any stock model can be modified for increased performance or aesthetics. Some of the most common equipment upgrades include custom graphic panels, custom side graphics, edge-to-edge graphic wraps, bottle well lights, customer bottle rinse, vend pause buttons, credit card readers, vend totalizers and performance meters. The Bluedrop Dual Teller can fill up two 5-gallon jugs at once!

Affordability By eliminating the unnecessary complexities found in just about every other water vending platform available in the United States, Bluedrop is able to offer customers a reliable and proven system at an affordable price. By utilizing commonly found filtration and vending components, Bluedrop gives their customers the option to source replacement parts on their own if a better price is available locally. All equipment is built in the USA.
