

## Velocity Technology: Your Full-Service Cloud Partner

Velocity Technology proudly offers a complete range of managed Cloud Services. Velocity can migrate your applications, email, and data to Public or Private Cloud, in Hong Kong and around the world. If your company is already operating in the Cloud, Velocity can provide a full range of Cloud Management Services.

Whether your interest is Public Cloud or Private Cloud, Hybrid or Multi-Cloud, Email or Microsoft 365, Velocity Technology's secure and cost-effective managed services solutions allow you to focus on your core business, assured that your infrastructure is being efficiently managed by experts.

Velocity's range of Cloud Services include:

- **Cloud Migration Services** – Following a complete review of your existing hardware and software inventory, data flows and other dependencies, Velocity will provide a risk assessment, cloud architecture design and estimated costs for both the migration and the post-migration operating costs. Velocity can handle all staffing and resource requirements or integrate with your current team.
- **Cloud Management Services** - Velocity provides complete management of your Cloud infrastructure including: Performance & Availability; Backup, Disaster Recovery and High Availability; Invoicing; Management Reporting.
- **Cloud Security** - Velocity can provide security monitoring, log reviews, and server patching. Velocity can also provide and manage your Firewall and firewall rules. Velocity can also conduct penetration testing of all your servers and provide remediation of any issues revealed by the tests.
- **Cloud Governance** – Velocity can provide a management framework that covers critical governance issues including management of users and access, change control, and efficient Cloud Financial Operations (aka Cloud FinOps).
