

Velocity Penetration Testing Services

Security is a must for one of the following reasons:

- ❖ Investors
- ❖ Regulators
- ❖ Your own peace of mind

Sophisticated investors are now asking about penetration testing in Due Diligence Questionnaires. Regulators such as the SFC, MAS and SEC regularly ask about penetration tests in their questionnaires and audits. Your fund needs peace of mind to know what security issues are present in your network, and if they can be used by a hacker to gain entry.

Velocity Technology can arrange for a comprehensive penetration test of your computer network. The security experts we use have over a decade of experience in the field of ethical hacking, digital security, IT risk management and IT audit. They hold internationally recognized security certifications such as CISSP, CISA, GCIA, GSNA, GWAPT, CEH and maintain their independence. They can also leverage on their international ethical hacking experience obtained in the United States, Asia and Europe.

The objective of the penetration tests is to determine, and potentially exploit, the vulnerabilities in your computer network. Velocity's penetration testing services can include some or all of the tests shown below to assess all aspects of your company's network:

- | | |
|--------------------------------------|--------------------------------------|
| ✔ Remote Network Analysis | ✔ Exploiting website vulnerabilities |
| ✔ Exploiting Network Vulnerabilities | ✔ Phishing Attacks |
| ✔ Wifi Network Scan Testing | ✔ Physical Access Test |
| ✔ Internal vulnerability scans | ✔ USB Key Attack |
| ✔ Remote Website Analysis | ✔ Phone Call Attack |

Contact us and we can tailor a specific set of penetration tests to suit your organisation.
