

SlidePro

The software that ties everything together!

On-demand Specimen Identification

Continuous Bar-coded Workflow

Integrated with your LIS

Compatible with all major Block, Slide and Label Printers

SlidePro

The software that ties everything together!

Does your specimen identification workflow include batch processing, handwriting, typing or double labeling?

Did you know that two thirds of identification errors occur at these points – as tissue is transferred from the container into blocks or from the block to the slide?

Did you know you can integrate your LIS with block, slide, and label printers to create a seamless on-demand bar-coded workflow?

Detangle IT SlidePro creates a continuous, bar-coded, on-demand workflow from accessioning to pathologist, integrated with your LIS and compatible with all major block, slide and label printers.

-  Block, Slide and Label Printing Integrated with your LIS
-  Continuous, Bar-Coded, On-Demand Workflow
-  Print to Thermo, Leica, Sakura and Zebra devices
-  Solutions for all Laboratory Information Systems including Meditech
-  Eliminate Handwriting, Typing, Double Labeling
-  Meet Specimen Labeling Regulatory Requirements
-  Compatible with Hologic ThinPrep Imaging System (generates 7 over 7 OCR)
-  Compatible with BD FocalPoint™ Slide Profiler

Dr. Nakhleh, chair of the CAP Quality Practices Committee

“The vendors have the pieces—the bar code generators, the block labelers, the bar code scanners—but they don’t sell you the system that actually manages the whole process. What we need is the software that ties everything together... ”
