

# We Are Here For You

Continuity of business operations during the COVID-19 pandemic has presented challenges that no one could have anticipated a few short months ago.

As detailed in the *Pathway Back to Work* (issued by BOMA May 7, 2020), BOMA recommends several guidelines in order to facilitate tenants and employees return to work. Further to their suggestions, Labbe-Leech Interiors would like to help you through this process. If you are looking to include any of following items in your immediate plans, we can help.

- Touchless hand sanitizer dispensers at various key locations
- Touchless soap dispensers and faucets at washrooms and kitchens/serveries
- Remove air hand dryers and install touchless paper towel dispensers
- Acrylic plastic screens at sinks, reception area, workstations, etc.
- Foot pull door opener
- Card readers, and associated hardware, in lieu of manual locks
- Automatic door openers

For longer term considerations, we'd be happy to help develop your construction ideas as well.

- Construction of individual offices
- Additional or larger meeting/board rooms

If you have any additional options which you would like to discuss, or if you require any further information regarding the above, we'd be happy to talk with you.

You can reach us by phone/email, and, in-person or virtual meetings can be arranged, with all recommended safety measures in place, at your convenience.

Sincerely,

Your Labbe-Leech Interiors Construction Team
