FOR IMMEDIATE RELEASE:

Mabey Inc. Opens Two New Depots And Selects XPORTECHS To Implement National Network Infrastructure

Ellicott City, Maryland – March, 2013 – XPORTECHS, a leading Information Technology and Cloud Solutions firm, recently designed and installed networks for two new depots of Mabey Inc., in Los Angeles and Seattle. The new depots allow Mabey to expand their national presence across the west coast.

The two projects involved XPORTECHS installing new cabling, switches, and PCs, which will allow the new depots to be fully functioning within a month. The construction company will utilize these depots as pick-up and drop-off points for equipment that is being used in the local areas.

XPORTECHS also recently configured and connected all of the present, nineteen Mabey depots through an MPLS network. This configuration allows for complete collaboration of data between the depots, including file sharing of critical documents.

“We are very happy to be continuing our two year relationship with Mabey, and assisting them with expanding their technology networks across the country,” said Michael Mellott, vCIO for Mabey and President of XPORTECHS.

Plans are already in development to open more depots throughout 2013 and 2014, and XPORTECHS will continue their appointed position as technology advisor, throughout these projects.

About Mabey

For 20 years, Mabey Inc. has carried the broadest range of products available for temporary bridges, permanent bridges, excavation shoring, structural shoring, and temporary roadways. With multiple locations throughout the U.S., you can trust Mabey to provide the most efficient and cost-effective shoring and bridging solutions when and where you need them.
