FOR IMMEDIATE RELEASE:

XPERTECHS Engineers Firm-Wide Upgrade Plan for Weinstock, Friedman & Friedman

Ellicott City, Maryland – September 2012 – XPERTECHS, a leading Network Engineering and Cloud Solutions firm, has recently announced that its long time client, Weinstock, Friedman & Friedman, P.A. decided to perform a large, firm-wide upgrade, and XPERTECHS managed the entire process.

Weinstock, Friedman & Friedman, P.A. (WF&F), headquartered in Pikesville, MD, is a full service law firm with departmental concentration in commercial and retail collection, bankruptcy, general litigation, personal injury, criminal and family law.

WF&F has been a client of XPERTECHS since the year 2000. XPERTECHS had provided “break/fix” and “project” work on a regular basis, including network upgrades in 2004 and 2008. Over those years, XPERTECHS earned their position as “Trusted Advisor” and has provided a high level of IT Support. In more recent years, WF&F has become one of their most valued XperCARE customers. XPERTECHS now manages all of Weinstock, Friedman & Friedman’s IT needs through their Proactive IT Managed Service solution, in conjunction with WF&F’s IT Department.

“Aided by XPERTECHS knowledge, Weinstock was able to transform its entire network architecture, including servers, switches and storage. As a result of the upgrade our productivity and reliability has increased dramatically which will save us a considerable amount of money over the next 4 years.” said **Amira Milad, IT Manager, Weinstock, Friedman & Friedman.**

Due to growth that had increased their technology needs more than in the past, and faced with an aging network infrastructure, inevitable network failure, and outdated Microsoft-based applications, the Management at Weinstock was determined to increase the performance of their current technological situation, and increase the manageability and stability of its IT systems. Weinstock required a new set of technologies that could be relied upon to serve the immediate needs of the firm as well as provide a secure foundation for the future.

XPERTECHS suggested a complete upgrade, including updating their document management system, and their email platform to Exchange 2010. XPERTECHS also performed a total overhaul to the firm’s overall Network Infrastructure. This set of changes has allowed Weinstock to provide their employees with the best new technologies available, and has also laid the foundation for a successful future.

About XPERTECHS

XPERTECHS is a leading Convergent Technology company offering a full range of services including Microsoft network solutions, LAN and WAN connectivity, Proactive IT Managed Services (XperCARE), Cloud Solutions (Cloud Xperience), Network Security, and Training.
