Web Surfing Caution: Online Safety Tips

01

Passwords and privacy settings matter.

Choose strong passwords and never share them with anyone else. Regularly check your privacy settings, too.

02

Watch what you download.

Some programs and apps carry malware and try to steal your information. Download content from trusted sites only.

03

Be careful with your online social life.

Exercise caution with each online interaction so you can steer clear of scammers and fake users. Do not give personal information or send private photos.

04

Shop safely.

Shop from secure websites, and avoid saving your credit card information. Take time to read reviews and ask questions when making purchases.

05

Think before you post.

Be mindful of every post you create. Do not publish content you wouldn't want family, friends, and potential employers to see.

Surf safely.
