

# HOW WE'RE BETTER

IT Services is a competitive space, but not every IT support provider is created equal. The truth is, most of our clients found us after being burned by slow service, mismanaged support and hard to predict billing. These are the four ways we win our clients business **every day**.

## GREAT SERVICE

We take all of your service calls live and redirect them to the right support on the first go, which is why we have a 5 star rating on Google.

## BEST TEAMWORK

Our team has decades of experience and enjoy working with each other and for our clients, the outcome of that is better service for you.

## PREDICTABLE BILLING

We offer support plans that cover all onsite support, and for projects all proposals are upfront and static, meaning even if our costs go up yours won't.

## TARGETED PLANS

Our plans are customized to fit your business, and even for co-managed clients we have practical solutions. As your needs change, so can your support from us.
