

# Ways A Valley Techlogic Service Plan Saves Money

## Lowered overhead costs.

It's easier to maintain the tech you have than to replace it, and emergency support costs can really add up. With an ongoing service plan you know maintenance and emergency service calls are covered.

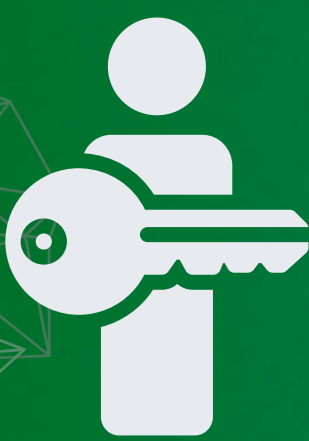

## Get a team of experts for one low cost.

IT professionals are always in high demand, and hiring just one expert can cost more than having a whole team of experts through our service.

## We allow you to work on your business, not in it.

It's our experience that many business owners are performing their own IT maintenance, and this can be really time consuming especially for a single person. We allow you to reclaim that time.

## We also can free up key employees.

Another scenario we see is that there's one person who's "IT savvy" but maybe IT isn't their primary role, we can free up that person either completely or partially with our co-managed options.

## We help you plan ahead.

Finally, you will have access to our expertise when making IT investments in your business, and rather than knee jerk purchases when something fails you can actually plan for the big picture.
