

The Ability Center

Research participants needed: Help us learn more about your community!

What is this study about?

This study is about learning how people participate in their daily life activities, both inside the home and out in the community.

Here is how you can help us by participating in the Home Usability and Out and About programs:

Phase 1: Complete a survey about your home, health, and community participation! Then, for a one-week period, use a smartphone device to take electronic mini-surveys about your activities several times a day.

Phase 2: Participate in the Home Usability Program and Out and About to achieve usability goals for your home and community participation goals. You might be asked to start the programs right away or you might be asked to wait to start the programs. If you are asked to wait, you will complete another set of print and electronic mini-surveys.

Phase 3: Repeat the survey and smart devices for another one-week period. Finally, after 3 more months, complete a final paper survey.

You'll receive:

- \$25 for each online/paper survey you complete.
- \$25 for every week of mini-surveys you complete.
- You can receive between \$125-175 over a span of 9-14 months.

To be a participant:

- Be 18+ years of age
- Have a physical disability (co-occurring disabilities okay)
- *Not* live in a group home or nursing home
- *Not* have a legal guardian
- Live in The Ability Center's service area
