

The Ability Center

Making independence possible since 1920

TECH FOR REC

The Tech for REC (recreation, education, employment, and community) Program is designed to temporarily equip consumers with needed technology for short term accommodation purposes, trial use, evaluation, to make an informed purchase, or participate in virtual programming offered by The Ability Center and other community organizations.

Consumers will work with staff to develop independent living goals which can be met with the help of assistive technology.

Switch adapted toys and leisure items are also available for loan. Independent play, leisure activities, and social participation are the primary goals of the adaptive toy selection.

LOAN CLOSET

Technology devices (Kindles, iPads, Computers), alternative input and output devices, switch adapted toys and leisure items are available for loan.
