ZEN SCHOOLMAN

SCHOOL MANAGEMENT SYSTEM

Managing a school in this modern-day requires a robust application that allows you to control the day to day activities such as admissions, students, fees, teachers, payroll, facilities, and many other functions from one single system running on one comprehensive database, so you will not have to duplicate efforts, waste time and lose money repeatedly.

Education system serves as the backbone of every nation; hence it is essential to provide a strong educational foundation to the young generation to ensure open-minded citizens' development to secure the future for all. Advance technology available today can play a crucial role in streamlining education-related processes to promote solidarity among students, teachers, parents, and the school staff. The importance of information technology (IT) in education, whether used to support teaching and learning, or to develop student IT capability or support educational management, is now recognized throughout the world.

Our school management system is a complete suite of applications that permits you to automate all aspects of your school or college management, from your administrators to teachers, students, and parents. Parents can view or be alerted to absences, grades assignments and school events. Students can view their grades, timetable, and assignments and receive assistance outside of the classroom. Manage all student affairs, human resources, library, transport, hostel, finance etc. from one efficient system.

SchoolMan deployment is affordable, feature-rich, and super user-friendly. You may implement the software on a computer network system on your premises (Enterprise Version) or in our cloud infrastructure (web-based) with a monthly subscription. Deploying it in the cloud makes it accessible to all users anywhere in the world.

WHY THE SCHOOLMAN SOFTWARE FROM ZENTECH?

Multiuser

24x7x365 access to your Administrators, Teachers, Students, Parents & Accountant. The application provides access to all your stakeholders who get to see what they expect. We simplified the complexity of user privileges so that you don't need to worry about it.

Multi-Language

Zen Schoolman accepts your preferred language and translates the entire application in your native language. You can also change the language with just one click. If you need more, you can also create your language without writing a single line of code.

Unified Communication

Send bulk emails to a selected group of recipients or all. Notify concerned recipients with auto-triggered email alerts on invoice payment, assignments, notices and circulars, and more. Use the default email system or even add pre-integrated high-performance email delivery servers from Mandrill and Send grid. You can communicate via bulk SMS service for all notices or even alerts. Schoolman provides ready integration with more than 1000 SMS gateways worldwide powered by www.zentechsms.net

Paperless admissions

Create a more efficient admissions process for your school, reduce the time spent on administrative tasks, and fully automate your record-keeping. Online enquiry forms directly on your school's website, with data, continuously & automatically synced with your MIS and real-time reporting to track, monitor and report on every application.

Headteachers, Deputy Heads & Finance

Enable Headteachers to export data from the system so they can more effectively report to stakeholders on the following details to support future planning:

- Projected students' numbers
- Feeder school analysis and planning
- Conversion success rates by entry method per enquiry
- Financial planning for the academic year ahead

Administration

At the core of a successfully run school is the administrative tasks to support. Our suite of modules includes everything from school admissions, HR and census right through to data protection, Allowing your administration office to take complete control over your schools' operations.

Academic Management

The grading system designed adapts to any possible configuration and standards. You can easily configure the grades to CGPA, CCE, CWA, or any other method that your school or institution follows. Teachers, Administrators can assign marks of students for every examination taken. Students and parents can view grades stored within the system from their respective logins. Teachers can create assignments for students visible and traceable to the students and their parents from their logins. A complete set of modules to support your school academics' foundation, right from managing exams, school reporting through to timetable management. Giving your staff the right tools to efficiently do their job

Finance Management

Create expense categories, record expenses. Automatically track income. Integration with 3rd party accounting tools like QuickBooks helps you to sync between your accounting applications as well. SchoolManallows you to create flexible fee structures. You can generate fee categories and fee types. Fee categories will help you to understand which variety of the fee is fetching you more revenue. SchoolManis a multi-currency system

System

Your MIS should allow your IT staff to gain complete control over your entire system. Our modules offer a wide range of integration tools with third-party systems, data audit capabilities, permissions and security settings and more,allowing your IT department to manage the design to suit your school requirements.

Comprehensive APIs

We offer a REST API and a Batch API. The SchoolMan REST API design helps third-party provider and school developers access data in real-time to perform data reads and easily integrate it to the SchoolMan system utilizing the same business logic SchoolMan system does and can be used to extend the SchoolMan functionality or integrate another solution into SchoolMan. The Batch API allows schools and third-party software providers to extract data from the School-Man system in a standardized format without directly asking the database. It is designed for batch data access and can be used to synchronize data across platforms.

Features of Zen Schoolman

It is the core point in School Management Software System as it takes over overall power of the system. This is developed in such a way as to manage and administer the whole system with utmost concern and care. We create a subtle way to communicate with the school community and beyond who relate to the school directly or indirectly. We ensure you that it will be the best way to manage all information correctly.

Admin Panel

➡ Managing User accounts (teacher, student, parent)

➡ Managing classes, subjects

➡ Managing class routine

➡ Managing exam, grades

➡ Managing exam marks

➡ Sending exam marks via SMS

➡ Managing student's attendance

➡ Managing accounting, income & expenses

➡ Managing school events

➡ Managing library, dormitory, transport

➡ Messaging between other users

➡ Managing system settings (general, SMS, language)

Teacher Portal

👥 Managing students

👥 Managing exam marks

👥 Provide study materials/files to students

👥 Managing attendance

The Teachers Portal is mainly identified as the most crucial part of The School Management Software. It consists of critical operations, including creating schedules, releasing examination details, report submission, forums, etc. Teachers in the school can access their account to get the most updated reports and performance of students. They can deal with the parents as well. This will reduce their workload as much as possible.

Students Panel

- Get class routine
- Get exam marks
- Get attendance stratus
- Get study materials/files from teacher
- Get payment invoices, pay online (Coming Soon)
- Communicate with the teacher

The processes and operations of all the students can be managed here. Each student in your school will be offered separate IDs to log in to the system to access functions directly. This facilitates keeping a separate page for each student in your school where you can get the complete record of a student including personal information, mail address, details on last fee payment, attendance sheet and many more.

Parent Panel

- Get children marks
- Get children payment invoices
- Get children class routine
- Messaging with teachers

It is designed focussing on what parents can expect or what they look for. We are damn sure that this will assist the parents who do not have enough time to visit the school but focus on their child's education. Being in whatever the place, they could access into the account and could be able to know about their children's attendance, performance, extra-curricular activities etc.

➡ Allows parents to preorder lunch online

➡ Allows teachers to specify lunch choices while taking attendance

➡ Allows parents to review cafeteria purchases and pay bills online

➡ Process entire meal transactions in less than 5 seconds

➡ Supports the full accounting cycle

Mobile Apps for every platform

School is the first environment in which your child experiences social life and develops an awareness of responsibility. Schoolman design builds your child's sense of responsibility. "Child psychiatrists indicate that it is a severe mistake to remind of doing homework to the children and dominate them". Methods such as asking your child's classmates about homework and course follow up may lead ultimately to the destruction of mutual trust and responsibility with your child. At this point, Schoolman, by making it compatible with educational psychology, builds an area of responsibility that independent of each other for all.

Deployment Methods:

ZenSchoolMan comes in Cloud base and Enterprise Modules.
