AES
Adams Engineering Solutions

In a world filled with challenges,
make technology one less thing to worry about.

Consolidation. Protection. Optimization.

Adams Engineering Solutions, LLC (AES) dedication to our customers' mission is what separates us from other technology consultants. Our team of system engineers, who have all accumulated a broad spectrum of technology expertise in the government and business sectors, are the best and the brightest in the industry.

Since 2011, we've served federal agencies, including the Department of Defense and the Department of Veteran Affairs, as well as enterprises that require seamless network engineering, systems engineering, configuration management, cybersecurity, program/project management, acquisition support, IT asset management, logistics, facilities support, training and data architecture solutions. We take the time to listen to our customers' needs and customize solutions that ensure issues, when encountered, are overcome with utmost efficiency.

Partnered in Excellence. Primed for Success.

AES has partnered with some of the best and brightest minds in the industry. We are certified in the top certifications in the industry. AES will work tirelessly to partner with like-minded companies providing guidance as we strive to continually supply partners and customers with outstanding results.

Customer Markets & Solutions

Intelligence

AES supports the entire technology system life cycle of multiple federal agencies. Our certified experts use technical and analytical tools to simplify our customers' daily processes, maximize collaboration, and improve data security and accessibility.

Business

AES works as our customers' partner to provide customized technology deployment and maintenance that keeps them working, not stressing. We identify risks, improve security, streamline management, enhance collaboration, and reduce IT expenditures to improve our customers' bottom line.

Our proactive approach to technology planning and support allows customers to be on both the defense against cyber threats and the offense driving collaborations and data collection. Simply put, coordinating and sharing intelligence gathering has never been easier.
