Exchange Fact Sheet
2022-2023
EADA, founded in 1957, was one of the first Spanish institutions to offer executive training programmes to the business community. For more than 60 years, close to 160,000 participants from over 50 different countries have entrusted their training to us, a fact that highlights EADA as one of the most innovative and prestigious business schools in Spain.

EADA is the only management institution in Spain with its own residential training centre. This is a vital tool in the EADA methodology as participants attend a series of professional development modules during the year where outdoor training is noted for the development of leadership and teambuilding skills.

EADA has been awarded the AMBA and EQUIS accreditations, which recognise the quality of its masters and MBA programmes. Currently these accreditations are only held by four business schools in Spain and by a selected group of the world’s most prestigious business schools. EADA is also a member of the Executive MBA Council.

**A plural and active methodology with a focus on practice**

EADA has developed its own pedagogical method, which is based on active learning on the side of participants: "learning by doing" as opposed to "learning by listening". We believe that professional development demands effort, participation, reflection and common sense. Participants need to be the protagonists of their own learning process and the institution must guide and tutor this process.
