## Beware: Nyetya Is Worse Than WannaCry

The cyber community hasn't fully recovered from the WannaCry ransomware attacks, which struck businesses and organizations in May. Now, a Petya ransomware variant named Nyetya is poised to join its ranks as one of the *worst cyber attacks in history*.

## The Dirty Loophole That Lets Insurance Companies Refuse to Cover a Cybercrime Theft in Your Business

As hacking hit the headlines in the last few years – most recently the global hack in May that targeted companies both large and small – insurance policies to protect businesses against damage and lawsuits have become a very lucrative business indeed. Your company may already have cyber insurance, and that's a good thing. But that doesn't mean that you don't have a job to do – or that the insurance will cover you no matter what.

When you buy a car, you get the warranty. But in order to keep that warranty valid, you

have to perform regular maintenance at regularly scheduled times. If you neglect the car, and something fails, the warranty won't cover it. You didn't do your job, and the warranty only covers cars that have been taken care of.

Cyber insurance works the same way. If your company's IT team isn't keeping systems patched and up to date, taking active measures to prevent ransomware and other cybercrime attacks, and backing everything up in duplicate, it's a lot like neglecting to maintain that car. And when something bad happens, like a cyber attack, the

(843) 234-9980

cyber insurance policy won't be able to help you, just as a warranty policy won't cover a neglected car.

Check out this real life policy exclusion we recently uncovered, which doesn't cover damages "arising out of or resulting from the failure to, within a reasonable period of time, install customary software product updates and releases, or apply customary security-related software patches, to computers and other components of computer systems." If

your cyber insurance policy has a clause like that – and we guarantee that it does – then you're only going to be able to

*"If your company's IT team isn't keeping systems patched and up to date, taking active measures to prevent ransomware and other cybercrime attacks, and backing everything up in duplicate, it's a lot like neglecting to maintain that car."*

collect if you take reasonable steps to prevent the crime in the first place.

That doesn't just mean you will have to pay a ransom out of pocket, by the way. If your security breach leaves client and partner data vulnerable, you could be sued for failing to protect that

data. When your cyber insurance policy is voided because of IT security negligence, you won't be covered against legal damages,

either. This is not the kind of position you want to be in.

All of this is not to say that you shouldn't have cyber insurance, or that it's not going to pay out in the case of an unfortunate cyber event. It's just a reminder that your job doesn't end when you sign that insurance policy. You still have to make a reasonable effort to keep your systems secure – an effort you should be making anyway.

If you have questions or concerns regarding your business network, please contact us at **(843)234-9980**.

## Free Cyber-Security Audit Will Reveal Where Your Computer Network Is Exposed and How to Protect Your Company Now

At no cost or obligation, our highly skilled team of IT pros will come to your office and conduct a comprehensive Cyber Security Audit to uncover loopholes in your company's IT security.

After the audit is done, we'll prepare a customized "Report Of Findings" that will reveal specific vulnerabilities and provide a Prioritized Action Plan for getting these security problems addressed fast. This report and action plan should be a real eye-opener for you since almost all of the businesses we've done this for discover they are completely exposed to various threats in a number of areas.

**To get started and claim your free assessment now  
call our office at (843)234-9980!**

*\*Offer valid to qualified prospects with 10 or more computers and a minimum of 1 server.*

## Shiny New Gadget Of The Month:

## Alexa, Who's Winning the Virtual Assistant War?

There are multiple companies trying to break into the "smart home hub" market, but Amazon's Echo (and its sultry Alexa) are holding on to 70 percent of the market share, and it doesn't look like that's changing any time soon. That's a clear sign of victory for Amazon - and a wake-up call for its competitors.

The voice-activated home assistant market is growing, with almost a third of millennials likely to use a home assistant this year. While it might take a decade or more for the devices to find their way into the homes of older demographics (a situation Saturday Night Live has already mined for comedy), it seems that smart hubs will only increase in popularity from here on out, and that Alexa is poised to rule them all.

# Do You Have a Business or a Job? How to Succeed as an Entrepreneur

## Turning Your Job Into a Business By Andy Bailey

To put it simply, if you can't take a month off to travel to Italy (or to write the great American novel or do some other time-intensive activity), you've got a job.

When I started my first company, I thought I was out of the grind of a job. Sure, my company was successful, but after nine years, I realized that I still had a job, not a business. My stress level was still high, and I hadn't made myself any happier than if I had a regular job. So, I made some changes.

Do you want to make the shift from job to business and realize your dreams of independence? Here are five steps to help get you there:

**1 MAKE A PLAN.** It's best if you can define your priorities by breaking them down into daily, weekly, monthly, and quarterly activities. Figure out where you are as a company right now, where you want to go, and how you want to get there.

**2 SURROUND YOURSELF WITH THE BEST.** If you think you can do it alone and not end up having a job, you're mistaken. You've got to be intentional about surrounding yourself with great people.

**3 ONCE YOU HAVE THE BEST, LEAVE THEM ALONE.** Relax. Resist the temptation to micromanage your team. Warren Buffet said it best: "Hire well. Manage little." If you've succeeded with steps one and two, you've already set your team up for success. So, let them do what they do best without hovering.

**4 MAKE YOUR BUSINESS INDEPENDENT OF YOU.** As I said earlier, if you can't take a month long vacation, you've still got a job. Develop

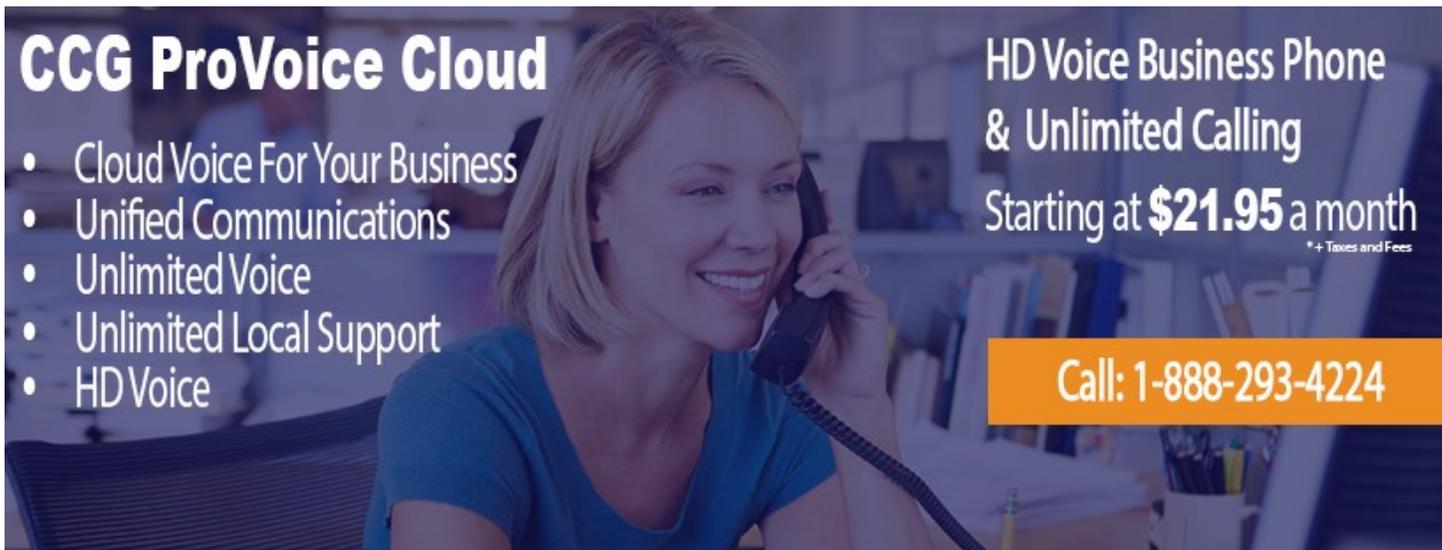

processes that allow your business to run without you. Instead of holding onto knowledge, share what you've got and teach your employees to be problem solvers, rather than come to you for answers.

**5 WALK YOUR TALK.** Be fair and reasonable with your employees and your clients. Make sure to show up on time and do what you say you're going to do. You'll reap the rewards through inspired loyalty and customer referrals.

Odds are, you're going to have to start with a job to turn your company into a business. It won't happen overnight. But, little by little — if you do it right — things will come together. In musical terms, think of yourself as a conductor. You're not sitting first chair in the orchestra, and you're not playing an instrument. Your job is to get the best players, decide who's going to play what and how, and then let them perform the symphony. Pretty soon, you can put down the baton, listen to the music, and take that much-needed long vacation.

*As the founder of Petra Coach, Andy Bailey can cut through organizational BS faster than a hot knife through butter, showing organizations the logjams thwarting their success, and coaching them past the excuses we all use to avoid doing what needs to be done. Andy learned how to build great organizations by building a great business, which he started in college. It then grew into an Inc. 500 multimillion-dollar national company that he successfully sold and exited.*

### ■ You've Been HACKED! What's the First Thing You Should Do?

There's always a chance that IT security will be breached, and one way to make a bad situation worse is not knowing the standard operating

procedure when it happens. First, contact your IT personnel. The faster they can address the hack and figure out its extent, the better served you'll be. Next, understand that there are legal ramifications to being hacked; if valuable data has been compromised, you'll have to notify the individuals in question as well as the FBI. Remember, the faster you act, the better it will be.

■ **Leave Your Life Jacket On The Shore And Swim Safely With This Inflatable Collar.** Despite their utility, orange life jackets are the opposite of

cool. And when you factor in the human invincibility complex, you get a bad situation: people out on the water without adequate flotation devices. According to DigitalTrends, water safety company Ploota wants to change that with their inflatable necklace. Sleek and slim, the device is worn around the neck and doesn't get in the way of active water sports. But, if needed, it automatically inflates, potentially saving the life of the swimmer or boater.

## WHO ELSE WANTS TO WIN A \$250 GIFT CARD

The Grand Prize Winner of last month's Trivia Challenge Quiz is Rita Williams from Exclusively Bimmers, Inc.! Rita's name was randomly chosen among those that correctly answered my quiz question from last month: The world's first one opened in Coney Island, New York on June 13th, 1884. The world's first what?

The answer was d) Roller Coaster. Now, for July's trivia question:

**What is the number of steps, approximately, from the Statue of Liberty's lobby to its crown?**

a) 329 b) 377 c) 299 d) 402

Email [bhinson@creativeconsultants.net](mailto:bhinson@creativeconsultants.net) with your answer!
