

eBeam Edge+· The most powerful interactive whiteboarding solution·

Your whiteboard, your cubicle wall, even your glass tabletop—can be interactive in minutes with eBeam Edge+ and your existing projector or LCD Display. Directly interact with all your content and share the results with local and remote colleagues.

No more boring presentations:

Jump right into a PowerPoint™, mark up a web page, resize an image, draw freehand in vibrant color. Engage your audience with an interactive workspace as big as 8 feet by 5 feet.

Use the stuff you already own:

No need for expensive digital whiteboards or new projectors. eBeam Edge+ is designed to work with the equipment you already have. The system combines an interactive stylus with a small receiver that attaches to your existing whiteboard or LCD screen in minutes.

The ease of plug and play interactivity. eBeam Edge+ allows you to place your computer up to 30 feet (10m) from your interactive space. The wireless dongle and internal rechargeable sensor battery mean there will never be a need for USB cords to run or hide along the wall. Just connect the Edge+ Wireless Dongle to an available USB port on your computer and you'll be automatically connected!

Interactivity on the go. No need for costly electronic whiteboards or new projectors. eBeam Edge+ makes your classroom interactive with your existing whiteboard, projector, and Mac or PC computer.

eBeam Edge+ Wireless

Wireless interactivity on any surface.

eBeam Edge+ Complete

Wireless interactivity + whiteboard capture on any surface.

eBeam Edge+ USB

Interactivity on any surface
(USB cable required).

Realize the Possibilities, Establish Your Edge!

- Use your whiteboard for free-flowing brainstorming with unlimited space
- Integrate with PowerPoint to make presentations more collaborative
- Share your whiteboard with meetings in real time
- Virtual whiteboarding means an unlimited amount of space and an unlimited number of pages
- Annotate and resize snapshots, images and Microsoft Office files
- Save virtual whiteboard files as ppt, pdf and other formats
- Integrate with PowerPoint and annotate on a presentation. All annotations are saved for reuse
- With meeting sharing, remote participants can see and annotate back, with no eBeam hardware required
- Virtual whiteboarding means an unlimited amount of space and an unlimited number of pages
- If meeting attendees also have eBeam hardware, the two groups can collaborate at the board
