The Secret To Darren Hardy's Success | 3

Authorities Seize Largest Stolen-Login Marketplace Site On The Dark Web

Earlier this year, the Department of Justice announced that they, along with other international authorities, had seized Sliipp, the largest site for stolen login credentials on the Dark Web. The site had over 80 million user credentials lifted from 1,400 service providers.

Authorities from four different countries all helped the FBI seize servers that hosted Sliipp. They also arrested and/or charged 12 people involved with operating the site.

the U.S., activity on the site led to almost \$200 million in losses – and that's just a tiny fraction of the total activity.

The fight isn't over, but this case is a big win against illegal login sale marketplaces. The Department of Justice hopes for more seizures like this one in the future.

THE BEST TIPS FOR TRAINING NEW HIRES

The hiring process is stressful. You put in a considerable amount of work training someone for their role and hope they'll become a responsible employee. As difficult as this process is, however, you can streamline it with these tips.

Create A Scalable Guide For New Hires To Follow

Document all the responsibilities of the role and put them together in a concrete guide

for new hires. This documentation will work especially well for visual learners, for recent graduates who are used to learning through guides and for non-native English speakers. In truth, though, anyone can benefit from having a set of principles to refer to.

Draw Examples From Real Life

When training someone in what to do in a specific situation, provide actual examples of what you did in that particular situation in the past. New hires will have an easier time completing their work if they have a previous example that shows them what to do.

Develop Your Interview Skills

Like great teachers, great leaders ask great questions to surmise if new hires are understanding their role. This will ensure that nothing gets lost in translation throughout the onboarding process.

Insider Tips To Make
Your Business Run
Faster, Easier And More
Profitably

What's New

Getting rid of old computers or servers? Did you know that the components used in technology equipment are not landfill-safe? On top of the environmental hazards, unprotected e-waste typically contains a lot of confidential and private information in the form of saved passwords, Internet history and files left on the retired computer or server.

As a first prevention step, find a local recycling facility where e-waste can be safely disposed of. And make sure to take the following #1 security precaution before you haul it off: remove and destroy the hard drives. A drill and hammer usually do the trick just fine. Alternatively, many companies that shred paper documents will also destroy your hard drives.

Don't forget other e-waste such as mobile phones, copy machines and any other device that ever touched your company data. Give serious thought to what data is on any device before you recycle it.

How Co-Managed IT Could Save Your Company From Financial Disaster

When you consider the investments in your business that you can make as a CEO, you probably think to yourself, "Which investments will give my company the best ROI?" With that in mind, would you think of making a significant investment in bolstering your IT department?

Many CEOs are understandably hesitant to throw a lot of money into their IT department because the ROI is more difficult to estimate. That said, though, consistently updating your company's IT services is becoming increasingly crucial to the continued success, and indeed safety, of your company. Ransomware and other cyber-attacks that steal company data

are becoming more frequent and more costly, while IT departments continually get the short end of the budgetary stick.

While that all undoubtedly sounds horrible, you might be wondering just what you can do about it. After all, you only have so much money you can invest back into your company's IT department, and it might not be sufficient for keeping your IT staff from getting burned out, disgruntled or making costly mistakes – even when they're performing their responsibilities to the best of their abilities.

Continued on Page 2 ...

... continued from Cover

What if there were a way that you could have access to the most up-to-date IT knowledge and software while also not having to shell out the funds necessary to update your systems and hire more knowledgeable employees? Well, that’s where co-managed IT can be your company’s life preserver.

Co-managed IT is a flexible system for keeping data for your company, employees and clients safe from cyber-attacks as well as assisting in your daily operations where needed. Think of it as “filling in the gaps” that your current IT department (try as they might) struggle to fill.

For instance, say your current IT department is great at taking care of the day-to-day fires

that inevitably come up in a normal workday, but they struggle to get to the “important but not urgent” task of updating your company’s cyber security and creating data backups. Maybe it’s the other way around, where your IT department is very focused on security, but they struggle to find time to assist employees with password resets and buggy programs. Maybe neither of these cases describes your IT department, but they still need better access to the tools and software that would allow them to reach their full potential in protecting the company’s sensitive information. Or maybe your company is going through a period of rapid expansion, and you just don’t have time to build the kind of IT infrastructure that would best serve your needs.

Regardless of what your IT department’s current needs are, co-managed IT is the solution. We’re here to do the tasks and provide the tools that your current IT department just can’t provide. Make no mistake, however: our intent is not to replace your current IT leader or team. In fact, we rely on the expertise that your IT department has about your systems. That’s what makes up the “co” in “co-managed IT.”

In order for co-managed IT to work, your company’s IT department will need to see us as an ally in doing their job, not as an

adversary. At the same time, they’ll also need to be open to new ways of doing things. The world of cyber security is constantly changing, and if your IT department is set in their ways and unwilling to budge, your company will be left with an antiquated system, chock-full of valuable data that hackers and cybercriminals can easily exploit.

Finally, however, in order for co-managed IT to work, your company still must be willing to invest in its IT department. We know that the ROI might not be as clear as it is for some other investments, but trust us, the consequences of not having up-to-date IT services if (or when) hackers steal your sensitive data could financially devastate your company – or even end it altogether.

So, with that in mind, we hope you’ll consider the benefits of co-managed IT and how it can make your company safe from cyber-attacks and bring you peace of mind.

Cartoon Of The Month

“Where do you see yourself in five updates?”

SHINY NEW GADGET OF THE MONTH

‘Peep’ The World Around You

Peeps by CarbonKlean is the ultimate cleaning tool for glasses – far better than your traditional rag, spray or T-shirt. It’s compact, easy to use and, most importantly, revolutionary in its ability to not only clean smudges off your glasses but also protect them from the next smudge.

Peeps uses state-of-the-art carbon molecular technology to remove smudges and dirt at a microscopic level as well as keep your lenses clear of contaminants long after you use it.

To clean your lenses with Peeps, simply brush them to remove dust and particles, wipe them between the heads of the tongs and enjoy your crystal-clear vision!

Client Spotlight

“INSTEAD OF THINKING WE MIGHT BE LESS EFFICIENT BY OUT SOURCING OUR IT FUNCTION, WITH BURK IT, WE HAVE BECOME MUCH MORE EFFICIENT!”

One of the concerns we had when considering switching to Burk IT was response time. Our IT function was in house, so the thought of getting IT help from someone two hours away seemed inefficient and inconvenient. But after considering the cost of internal IT and the trouble of finding qualified IT employees, we decided we would give Burk IT a chance. The move has worked out better than expected. Before Burk, we often found it difficult to locate our IT guys (two), they may be at lunch, on vacation, or busy traveling between branches. Now, with Burk, a qualified technician is always available. The staff is knowledgeable and can easily correct issues, often times accessing my computer through VPN for a quick resolution. We are very pleased with Burk IT.

How To Succeed In Business And Life In Just 8 Hours Per Week

Do you want to know my secret to success – how I’m able to live the way I do after growing up in a dysfunctional family, lasting half a semester in college and possessing no special skills, talents or intelligence? Well, I do two things that most people don’t do: I study and I plan.

I pull these two levers once every day (and twice on Sunday), and that’s what has led to three decades of success. You can follow my example. Like all fundamentals of success, the daily disciplines of studying and planning are easy to understand, but hard to maintain in practice. Most people don’t have discipline, and, therefore, they do not succeed. What’s more is that in total, you only have to study and plan for eight hours every week! Curious about how that works? Let me break it down for you.

Early each morning, I give myself an hour to study and plan as needed. No matter how early the rest of my day starts, I always start with this hour – no exceptions. I devote the first 30 minutes to studying. When I say “studying,” what that basically means is that I’m reading a book to grow one of my core skills. Don’t spend that first 30 minutes reading useless crap; only focus on books that will help you grow in some way.

If your response to that idea of studying was that you don’t have time to read, then I would say you’re lying. Bill Gates, Warren Buffett, Oprah Winfrey, Elon Musk and Jack Ma are all voracious readers. Do you think you’re busier than them? Yeah, thought not. They’re not the only ones either – the average multimillionaire reads at least two books a month. And guess what? I can get through that many books in a month by reading just 30 minutes a day.

Darren Hardy is the former publisher of SUCCESS Magazine, and he has written several best-sellers, including The Entrepreneur Roller Coaster, Living Your Best Year Ever and The Compound Effect. He is also the recipient of the “Master of Influence” designation from the National Speakers Association (NSA), which honors his professionalism and public speaking ability.

Free Report: What Every Small-Business Owner Must Know About Protecting And Preserving Their Company’s Critical Data And Computer Systems

This report will outline in plain, nontechnical English the common mistakes that many small-business owners make with their computer networks that cost them thousands in lost sales, productivity and computer repair bills, and will provide an easy, proven way to reduce or completely eliminate the financial expense and frustration caused by these oversights.
