

FOR IMMEDIATE RELEASE

CRITICAL POWER SOLUTIONS INC. AND EDI POWER SERVICES MERGE

The Combined Company, Called ZAVTEK, Expands Geographic Reach, Product and Service Offerings

Cincinnati, OH – Jan. 9, 2023 – Pacific Northwest-based Critical Power Solutions Inc. (CPSI) and EDI Power Services (EDI), of Ohio, today jointly announced the two companies have merged to become ZAVTEK, according to ZAVTEK President Lee Moss.

“This is a merger of two long-tenured institutions in the critical power industry; two very strong brands, each with its own rich history,” Moss said. “Together we have grown and have seen the need for greater capacity to serve our customers’ needs throughout the country, which really was the impetus for the merger.”

While nothing has changed for existing CPSI and EDI customers and vendors except the name and some accounting details, in the long term, the combined teams will be able to provide additional services that existing customers didn’t have access to before. Otherwise, it’s the same ownership, leadership, and team.

“We have always had customer and vendor overlap, so the one brand will simplify this for customers and vendors, who will now deal with just one,” Moss said.

ZAVTEK’s nation-wide coverage is supported by our headquarters in Ohio and offices in Oregon, Washington, Virginia, and Texas. The merger will create a larger, nationwide footprint. The following will remain the same or expand:

- Consistency in processes and reporting to all CPSI and EDI customers
- The merged company will still sell critical power equipment but a larger array of it now
- ZAVTEK will continue to be a multivendor service partner across the country
- The larger footprint will enable ZAVTEK to offer customers a deep bench of experts with a wide array of technical skills
- All current contracts and services remain in place with the name change

About ZAVTEK

ZAVTEK was established with the merger of Pacific Northwest-based Critical Power Solutions Inc. (founded in 1992) and EDI Power Services, of West Chester, Ohio (founded in 1994). With the two entities combined, ZAVTEK remains a trusted resource in the critical power solution business, offering expertise across the entire spectrum of data center development, from one-off UPS systems to global cloud-based data center providers. The company has provided top-tier electrical power quality equipment and best-in-class electrical maintenance services to mission-critical facilities such as data centers, hospitals and high-tech manufacturing. ZAVTEK partners with trusted and proven manufacturers such as Mitsubishi, Enersys, Starline, LayerZero, and many others.
