

Supporting Your AI Journey, Securely

**Five Rivers IT works with your leadership and teams to establish
*AI Foundations > Enable Users > Ongoing Governance > AI Support***

AI Adoption Advantages

- Enhances workforce productivity and efficiency
- Streamlines and automates core business processes
- Scales cost effectively
- Enhances customer experience
- Strengthens competitive edge through digital innovation

AI Common Pitfalls

- Lack of governance leading to unvalidated AI-outputs
- Proliferation of unsanctioned Shadow AI outside of IT oversight and control
- Exposure of sensitive data and intellectual property in public AI platforms
- Increased cybersecurity risk due to an expanded AI driven attack surface

AI Executive Kickstart

- Define AI vision and align to strategic business priorities
- Establish end user enablement program
- Identify business specific AI Automation scenarios
- Educate on AI Security Risks
- Establish AI Steering Committee and Charter

Process Automation

- Identify and prioritize repeatable business processes
- Identify high-impact business Intelligence and deep learning opportunities
- Implement data readiness for AI adoption
- Deploy automation using AI
- Implement Data Protection and Compliance Controls

User Enablement

User Training

- AI Fundamentals and Risks
- Prompting best practices and responsible AI usage
- Drive adoption through role-based use cases

Helpdesk Support

- User Onboarding for approved AI tools
- AI support for Features and Issues

Governance

- Policy maintenance and updates
- Ongoing Security and Compliance oversight
- Support AI steering committee initiatives
- Elevate end-user AI security awareness and discipline
