IT PROJECT ENGINEER
Enertron Posting

Our steadily growing Managed Service Provider business is seeking an experienced, energetic, and skilled IT Project Engineer. If you have an **EXPERT** understanding of implementing new system software technological solutions as well as coordinating and implementing complex projects, this may be your next career home!

Your responsibilities at Enertron will include:

- Design, plan and implement
    - support services for customers
    - system solutions for customers
    - disaster recovery solutions
    - technical services and support (WAN, LAN, Firewall, Cloud, Office 365, etc)
- Evaluate new IT strategies and procedures
- Consult on system reviews and recommendations
- Maintain required project documentation
- Serve as a liaison between business and technical aspects of projects
- Improve customer service, perception, and satisfaction

Qualifications:

- Professional IT certifications (Microsoft MCP, MCSA, MCSE, Cisco, CCNA, Watchguard Firewall)
- Diagnostic skills and technical awareness
- Strong project management skills
- Strong analysis and critical thinking skills
- Deadline and detail-oriented
- Strong leadership qualities

In addition to a generous pay range, you will truly feel like family in our small, comfortable, and connected office space. We offer great benefits starting with 15 paid days off, $250 of your monthly health premium paid, short & long -term disability insurance, and everyone's favorite, **a weekly lunch opportunity! Apply today!**

Compensation:

- Health, Dental, Optical
- 7 Paid holidays + 15 PTO Days
- Short & long-term disability
- Great opportunities for connecting with co-workers

Company:

Enertron has been keeping clients happy since 1988! Leveraging the benefit of experience with Enertron's solutions. We truly are family and welcome more!
