

"Insider Tips To Make Your Business Run Faster, Easier And More Profitably"

Last Night I Startled Out Of Bed In A Cold Sweat, Heart Racing, With Fear Racing Through My Mind... And YOU Were The Reason For My Panic!

Was I having a nightmare? Was I just watching too many reruns of The Twilight Zone? Maybe taking the Halloween spirit too far? No – it simply occurred to me that you might not have a solid backup and disaster recovery plan in place!

And if your server data was erased, corrupted or destroyed because of a hardware malfunction, system crash, fire, flood or some other random, unforeseen disaster, you might not be able to be back up and running again FAST!

The Thought Of That Happening Scared Me Half To Death!

And quite honestly, it should scare you too! Just imagine what would happen if your server went down and you...

... Lost all accounting documentation and history...

... Lost all the work files you've spent YEARS developing...

... Lost the work files and documentation you desperately need to service your customers...

... Lost all the e-mails you've saved and couldn't access your inbox...

Can you even put a price tag on it? Probably not, yet so many business owners aren't 100% certain that they could be back up and running after a disaster or are purely hoping that their current backup system is working and storing a usable copy of their data.

Want to know for sure if your data is safe? Our FREE Data Security Analysis will reveal the truth... Since Halloween is this month, I'm treating all of my friends, clients and prospective clients to this \$300 service at no charge. That's right... FREE!

5 Steps To Moving From Your iPhone To An Android Phone

Android phones have come a long way in the last few years, and the Apple iPhone may have lost a bit of the pizzazz that it had just a few years back as the new phone on the block.

If you're thinking of making the jump from iPhone to Android, here are 5 critical areas of your phone you need to consider before you move:

1. **E-mail, Contacts and Calendars.** If you're using Microsoft Exchange for e-mail, then this step should be a breeze. All of your e-mail, calendars and contacts should be housed on your Exchange server and will populate automatically once you set up your account. If you're using Google Apps for these services, it will be even more seamless!
2. **Apps.** Your iOS apps are going to be stuck on your iPhone and not transferable. You'll certainly find the Android version of these same apps on the other side, but be sure to check this out ahead of time so that you're not stuck searching for a workaround for a critical work function upon arrival.
3. **Music.** If you have iTunes on your computer, you can create a Google Music account on the same computer where iTunes is installed. You can then use Music Manager's iTunes option during setup. You can even continue to use iTunes and sync any new purchases with your Google Music account automatically.
4. **Photos and Videos.** Your best option to move photos and videos is to simply download them from your iPhone to your computer and then re-upload whatever you want/need to your new phone. Another option is to use a cloud sharing service such as Dropbox to move these files wirelessly across devices.
5. **Text Messages.** If you must move text messages, use the free iSMS2droid app. Or use the Samsung Kies software to restore an iPhone backup (if you have a Samsung Android phone).

Finally, if you're really thinking about moving from your old iPhone to an Android phone, make sure to pick a higher-end Android phone, such as the Samsung Galaxy. To be happy with your decision, you're going to need to feel like you've actually upgraded.

Help Us Out And Be Entered for a Chance to Win a Trip to Hawaii

We love having you as a customer and, quite honestly, wish we had more like you! So instead of just wishing, we've decided to hold a special "Mahalo Madness" year long campaign with a chance at the grand prize...a **Hawaiian Vacation** and stay at the Marriott Maui Ocean Club!

Simply refer any company and if they sign a Managed Services Contract or make a purchase with us, we'll enter you into a drawing for a **FREE Hawaiian Vacation!!!! ALOHA!**

Simply call us at 412-706-9704 or e-mail us at TimSteinour@E-SafeTech.com with your referral's name and contact information today!

Shiny New Gadget Of The Month:

Now it's super easy to keep track of stuff on the go. Just attach, stick or drop your Tile into any item you might lose: laptops, wallets, keys, guitars, bikes—you name it.

Download and sync the app and you'll never have to worry about losing it again! Pre-order this little device and you'll be able to:

- ◆ Use Tile on as many things as you want. Add up to 10 Tiles on an account.
- ◆ Share access to Tiles with friends, family, and trusted coworkers.
- ◆ Hear the alert notification when your items are triggered to find. If you can hear it, you can find it.
- ◆ Use the Tile app to remember where it last saw your Tile, so you can easily find it right where you left it.

Pre-order your device today at www.thetileapp.com

The Constant Climb Of Entrepreneurship

Today, as I write this, I am sitting on a veranda with the most magnificent views of Jamaica. I came here to speak at the annual Business Summit event in Kingston, and my wonderful host has me staying in a villa at Strawberry Hill. My room sits on top of a mountain (a hill for Jamaicans, a mountain for New Jerseyans), overlooking other mountains in all directions. The drive up here was fascinating.

I am not sure if you have ever navigated the back roads of Jamaica. But, for myself, I consider it old hat. (That is, as much as a passenger can say "old hat" when it comes to driving.) I would never drive these roads myself. They are fast, they constantly twist and turn, 18-wheelers careen down them, people drive on the left side (which gives any American driver a heart attack every time another car approaches), and there are mammoth potholes everywhere. If that doesn't get to you, there's the fact that mere inches to your left or right are gorges that drop as far as the eye can see... and railings seem to be optional here. Yet with all that, the drives are the most beautiful and invigorating thing you can experience.

During this particular drive to Strawberry Hill I noticed something. Almost every time we completed a turn and the road leveled out, I was momentarily convinced we had finally reached the top of the mountain. But then, another turn would come, and we would start to climb again. We'd level off, I would think that this time we were in fact at the top, and that's precisely when the next climb would begin.

I couldn't believe how high up in the mountain we were, yet we always climbed higher. When we reached the summit (I thought) we entered the Strawberry Hill property, and I was assigned my villa. From there I walked up higher! Climbing 30 plus steps to get to my room. I entered. It was gorgeous. I walk onto the veranda to look down. But I had to look up.

Welcome to entrepreneurship. Or a drive up a Jamaican mountain. It's basically one and the same. The climb never ends for entrepreneurs. There is always a higher summit for us. When you think you are at the top, you haven't even started yet. You can always climb higher.

MIKE MICHALOWICZ (pronounced mi-KAL-o-wits) started his first business at the age of 24, moving his young family to the only safe place he could afford — a retirement building. With no experience, no contacts and no savings he systematically bootstrapped a multi-million dollar business. Then he did it again. And again. Now he is doing it for other entrepreneurs. Mike is the CEO of Provendus Group, a consulting firm that ignites explosive growth in companies that have plateaued; is a former small business columnist for The Wall Street Journal; is MSNBC's business make-over expert; is a keynote speaker on entrepreneurship; and is the author of the cult classic book, *The Toilet Paper Entrepreneur*. His newest book, *The Pumpkin Plan* has already been called "the next E-myth!" For more information, visit <http://www.mikemichalowicz.com/>

Meet Dragan Lazic

Dragan is our Technical Services Manager here at E-Safe. Prior to joining our team, he was in charge of the entire computer infrastructure for the City of Steubenville and provided technical support for 200+ employees on a daily basis. Dragan is from Belgrade, Serbia and came to the United States as an exchange student with plans to stay for one year and play basketball. Fifteen years later, he and his wife Miranda are in the process of moving to North Fayette Township with their two children Vesna (6) and Stefan (3). Dragan attended Jefferson College where he studied Systems Engineering. Basketball and soccer are his passions and he enjoys coaching both of them as well. Dragan and his family love to travel, ski, bike or any other outdoor activity for that matter. His goal is to retire and relocate to a small Greek island with limited email and cell phone reception. Dragan also enjoys watching the Steelers, Penguins, Pirates, and the Manchester United soccer team.

How To Prevent ATM Skimming

Over a billion dollars are lost each year in the United States through "ATM Skimming" – far more than any losses from bank robberies – and it's growing at a rate of more than 10% every year.

ATM Skimming is a cybercrime where the criminals steal (or "skim") your ATM/debit card data when you're using a typical ATM machine. They do this by fitting a small card reader over the typical ATM card slot, thus capturing your information. Additionally, the criminals install mini cameras above or near the ATM to capture your PIN number. The data is then transmitted via Bluetooth to the cybercriminals somewhere nearby. The average skimming attack usually lasts only an hour or two during peak ATM usage times (i.e. lunch hour or after work). Meanwhile, you have no idea that you've just been had and are at risk. These cyber-criminals will then sell the data on the cards to others so that they can either clone your debit card or wipe out your bank account.

5 Tips To Prevent ATM Skimming

Cover your hand as you type. Obstructing the view of your pin from any cameras will render your data useless.

Pay attention to the area around the ATM card slot. If anything looks loose or out of place, pull to see if you can remove it.

Be aware of surroundings. Be extra careful of ATMs in dark or isolated places.

Does the machine look different? If anything looks out of place (extra signage, mirrors, etc.) then avoid the machine.

Notify the bank. If you find or suspect an ATM has been compromised, notify your bank and law enforcement immediately.

Upcoming Event:

E-Safe Technologies' Lab Day, November 14th!

E-Safe is excited to announce its 9th Quarterly Lab Day! Lab Day is a great opportunity for you to work with our experts and get answers to all of your questions. Whether you are a long time virtual user or are thinking about getting into it for the first time this lab day is for you! Come ready to learn and to get your questions answered!

Lab Day Kickoff Topics:

- ◆ Best Practices vSphere 5.5 Migration
- ◆ HA / vMotion
- ◆ NSX / Distributed Switches / Network Best Practice
- ◆ vCOPS (Operations Manager)
- ◆ PowerShell...

When and Where:

November 14th 2013
9:00-11:00am

E-Safe Office: Penn Center West Bldg 4
Ste 230 Pittsburgh, PA 15276

Register at:
E-SafeTech.com/LabDay

The Lighter Side:

Happy Cookie Month!

- ◆ The most popular type of home-baked cookie is the Chocolate Chip cookie.
- ◆ Over-mixing the dough or adding too much flour can result in hard, tough cookies.
- ◆ The first animal crackers were produced in the United States by Stauffer's Biscuit Company in 1871. Nabisco's Barnum's circus version hit the market in 1902.
- ◆ The modern version of the Fig Newton was created in 1891 and is named for the city of Newton, Massachusetts.
- ◆ The Oreo cookie was invented in 1912.
- ◆ Ladyfingers are used in tiramisu because the cookies so readily absorb the sweet syrup and liqueur used to make the traditional Italian dessert.
- ◆ While Italians use the word "biscotti" to refer to all types of cookies, Americans think of "biscotti" as the long, dry cookies that are served with hot drinks for dunking. The name is derived from "bis," meaning twice, and "cotto," meaning cooked. Baking the cookies twice results in their hard, crumbly texture.
