Online Learning

BY NUANPLOY, GRADE 4 EDELWEISS

What is online learning? I did not fully understand this until I experienced it because of Coronavirus. Online learning is education that takes place over the Internet. It is often referred to as “e- learning” or what we call “distance learning.”

My class meet with each other, discuss, and interact with one another using different social platforms - Google Meet, Zoom, and many more. Google Classroom is where the teachers posted assignments and materials to support our learning. We practiced social learning many days in our classroom before the closing of AITIS due to Coronavirus. My classmates and I have always had the chance to speak our opinion on the assigned questions. This activity is no different before the closing of AITIS. We always answer questions according to our number of the classroom attendance. At first I felt awkward because I know everyone is listening to me and was intensely watching my face through the camera but as the days went by it was fine.

The class online help us more to be responsible and to be organized with our time. I attended my class before the meeting time and it is good because my teacher will always ask me questions of the previous lessons. I chit-chat with my teacher while waiting for my classmates. Online learning did not stop us from doing our STEAM Activities. We discussed the procedures on how to do it and then we did it on our own. We presented the results of the activity through Google Meet video conference.

Since it was a new experience for all students of AITIS, I know we experience challenges like not playing face-to-face with our friends and seeing our teachers but I found it has lots of good things - we can login from anywhere, we can study anytime, studying with music and most of all it makes us to be more responsible but still I miss AITIS!

Dear Parents and Friends of AITIS;

As we come to the end of a challenging and unique school year, we would like to thank you for all your help and your continued support throughout the year. Our students have shown tremendous growth and development and we are extremely proud of their achievements.

As we end this school year, we bid farewell to our dear Khun Pa who has worked at AITIS for 25 years. We wish her the very best for her future endeavors.

This school year also pushed us out of our comfort zones as we worked to overcome the challenges posed by the Covid-19 situation. From classes to project presentations, meetings, and even final examinations were conducted online. Using various digital platforms such as Google Classroom, Google Hangouts, Google Meet, Zoom, etc. we were able to ensure a successful continuation of learning for our students. This was made possible by the willingness of everyone involved to adapt to the changes and challenges that came up. Congratulations to the entire AITIS Family!

Another feather in the cap for AITIS this year was the Virtual Graduation for the outgoing Grade 6 students. This event was broadcast live on June 10 from the Robert B. Banks Auditorium, AIT as students, parents and staff watched it online from their homes. Owing to the Covid-19 pandemic and the social distancing norms, a robot made by the AIT Advanced Robotics Lab was used to represent the graduating students and received their graduation certificates from the school principal, Mrs. Oluwayemisi Thomas. This Virtual Graduation indeed proved to be a special and memorable one for the graduating class of 2019-2020.

As we all go on our much-deserved year-end break, we would like to thank you once again for your unwavering support and cooperation. Looking forward to working together in the School Year 2020-2021.

Sincerely,

Mrs. Manjiria Annachhatre
Pre-School Coordinator

Ms. Megha Gurung
Elementary School Coordinator

Help Kids Understand Anxiety

1 – Smoke Alarm Analogy

Age: All ages

To explain what anxiety is, I use the smoke alarm analogy. Smoke alarms are helpful for alerting us to danger when there's a fire and we need to get out of the building. But sometimes smoke alarms go off even when there isn't a big danger, like when we burn popcorn or toast. It makes the same sound for big emergency fires or little non-emergency fires. Anxiety does the same thing. Anxiety tells us there's a big danger, even if the situation is not that big. It feels like a big danger because anxiety sends the same signals. The good news is we can learn skills to tame that anxiety emergency alarm (no more burnt toast alarms!).

2 – Hey Warrior

Age: Elementary & Middle School

I saw this book recommended on Instagram by fellow counselor, Gretchen, from Speckled Moose Counseling. I was hesitant to order from Australia because I'm spoiled on Amazon Prime, but it was 100% worth the extra shipping cost! This book does a fantastic job of explaining what worry is, where it comes from, and how kids can be warriors over their worries.

3 – Gremlin Girl

Age: Middle & High School

When I was planning for a classroom guidance lesson on anxiety, I wanted to find a way to break the ice and show my students that talking about anxiety is okay! So, of course, I went straight to their favorite source of entertainment: YouTube. I found this great mini-series called Gremlin Girl. The episodes depict anxiety as a Gremlin that pops up and has a lot to say. This video about waiting for text message responses is my favorite from the series so far:

Students loved this and were all quick to say how relatable it is! This was just a simple way to open the door to a conversation about anxiety while letting students see that others sometimes share the experience

Covid 19 and the Stay-at-Home

Chevan, 5 Ace Achievers

In December, 2019 the world was alerted to the outbreak of what is now called Covid 19. From December to March the entire world was concerned and confused on what the virus was and how dangerous it really could be. Nobody really knew what to do next. On March 17, 2020 AITIS decided to close down as the best step to protect our community. We have since learned from doctors and have been instructed by our government that staying at home was the best way we could help to slow down the spread of Covid 19. Since then my life has changed, this includes how I learn (online school), how I socialized (now by social media) and family time. All have been new experiences (both bad and good). I have very mixed emotions about my experiences under quarantine which I will share with you in my essay but I am going to make the best of it!

After AITIS closed down for our safety we started online classes. I was excited. I usually wake up at 05.45 am and now I wake up at 08.00 am, that is more than two hours more of sleep. I have a lot more energy! As my Mom needs her computer for work, my Dad bought me a laptop. I am still in shock that I have my own laptop. So I am very excited to use it to learn. What I enjoy the most about online school is that I can learn at my own pace. If I understand the subject I can complete my tasks very quickly but if I do not understand the topic I can use online resources. I also love that I can play music while I work, it really helps me concentrate. I can also eat or use the toilet whenever I want. I am also learning to organize my time management. These are all the things that are positive. However, I have faced challenges too. For example, I miss the guidance from my teachers. I really, really miss group work and talking with my friends while we finish a project together. I miss playing sports with my friends and all the after school activities. I wish I could do more for my school as I was elected Vice President. However, I know staying at home is important.

This experience has changed how I interact with everybody! Although I really miss my friends, I still get to be silly with my class friends on google chat (not the class google chat, haha) and zoom. I also play video games with my friends online. That is fun. I have made new friends too, as I am participating in the Movement Playground Virtual Ninja challenge. My coaches are the best parkour experts in Thailand and I get to chat with them everyday as they coach me to improve my parkour skills by video. My team won the first challenge and now we are working on the second challenge. I have also enrolled in online art classes with family friends. We have even had a zoom party with my family friends and this Friday we will celebrate my friends birthday. When we talk with our neighbors we scream over the fence, it is really fun! We laugh a lot. Even how we buy food from the restaurant has changed. Now we can only do drive-thru and home orders but we are discovering more restaurants as my Mom is getting tired of cooking. Sadly we have not seen our helper for three weeks as we asked her to stay home so she can stay safe too. In this respect I can not wait until life returns back to normal.

I love spending all this time with my family. Although my Dad still has to work during the week because his factory is involved in logistics which is important during this crisis, we still spend the evenings together and all weekends together. Luckily, he does not have to travel to other countries anymore, so I see him a lot! He helps me with my work, outdoor projects, play sports together and watch a lot of football together. I also like spending time with my Mom because we talk about politics, human rights and other international topics together. She is also learning to cook so I am getting to try new food, usually tasty but not always. But most importantly I am watching my little sister grow up. Since I have been home she speaks clearer, she sits at the table with us to eat and has much more facial expression which is super cute. I feel like I am also closer with my sister. Sometimes we get under each other's skin but overall it has been a cool experience spending this time with my family.

So overall the negative experiences are experiencing loneliness and moments of boredom because of limited social interaction and social distancing. On the positive side I experienced new ways of learning and how important my friends and family are to me. I am also a ninja and video game champion. Be happy because for the first time in history you can sit on the couch and be a hero!

GRADE 6

Memories

My Best Memories By Siwakorn

Four years ago, when I joined AITIS I didn't know how to speak English. My Grade 2 teacher was a great help then. She told my classmates to translate everything for me in Thai. And that is what helped me feel encouraged to learn English. I will never forget all the fun time I had with my friends. Thank you so much to all my teachers and my friends! Best wishes to you all!

My Best Memory By Kritamate

The activity I will always remember at AITIS is the Grade 6 camp. It was my first camp ever in my school life. I liked it because I got to do many things that I had never done before and that includes sleeping with my friends as well. I have never slept with any of my friends at all. It felt so good to sleep very late for 2 nights. The camp was for a short time, but the memory is going to last forever.

A Poem

By Pornanan

This is Scott
From my school
I was taught
To follow the rules

I got in grade one
Nervous cause I was new
This happens to everyone
Before, I had no clue

When I came
I was a tangle
Scared to be blamed
From every angle

The friends I made
They are great
They helped me not to
feel afraid
Each one with an awesome
trait

The trips we had
Some were camps
We were glad
Lots of thanks

We used to have trends
They were bottle flips
We'd great time to spend
Especially during field trips

This is a rhyme
We always used to say Hi!
It was a great time
But now it's a goodbye!

My Memories

By Athicha

When I first came to Grade 6
I was nervous and scared
But as the time passed by
I felt, I was more cared

Grade 6 taught me to believe in myself
And also, always act confident
That's why I liked this year
Because it was time worth spent

At lunch we would play with our bikes
I was amazed to see how we matured
My friends always made me happy
And I would always feel secured

But now that grade 6 is over
and we have to depart from each other
It is really a hard time for all
As we'll miss this time, we had together

My Memories at AITIS

By *Kanyatorn*

Staying at AITIS has been a wonderful experience for me, I've made a lot of good memories. I've stayed at AITIS for 7 years, which means, I've been learning here since Kindergarten. And I made a lot of positive, funny, and happy memories here.

When I first transferred here, to Kindergarten, I was not good in speaking English. However, I started getting better and better with the help of my teachers and friends. I made a lot of friends in Kindergarten and I was very happy.

I don't clearly remember what happened when I was small, but I do remember that it was a great time. I started making friendship mostly with girls because we had a lot in common. I still remember when my friends and I used to play hide and seek. We'd try to hide in places where our friends couldn't find us. We'd play games together and we would even bike together. We loved splashing water on each other and take funny photos.

Time passed very fast and we reached Grade 6 level. Another great year at AITIS. We had so much fun learning together in the first semester of our last year. However, staying at home and learning online due to COVID 19 for most of the second semester of Grade 6 brought us way closer to each other than ever before.

We are about to depart now, but, no matter wherever we are in future, we have made unforgettable memories here at AITIS which will stay with us forever!

Goodbye AITIS!

My Memories at AITIS

By *Mahasamut*

My favorite memory happened on the first day of Grade six camp. We were separated into groups and we're supposed to make a play about our assigned superhero. Cat woman was assigned to our group, a superhero who is completely misunderstood because she was doing the wrong things for the right reasons. Our group didn't have much time to prepare, so we came up with a little funny skit. I was so nervous when our name was called. We started our play, and everybody was laughing, clapping, and was having a good time. When our play ended, everybody loved it. They were clapping and had a big smile on their faces. I really liked when our group was walking back down, and we were swarmed with kind words and praises. I was so happy that everybody was so entertained. It felt great to make others smile! It was such a fun night and during that night, teachers and friends were complimenting us about our play. I felt so relieved that so many people enjoyed it.

My Best Memory at AITIS

By **Kamonkarn**

When I came to AITIS, it was very difficult for me to talk in English. The only sentence I could say was, "May I please go to the toilet!" And it was because this was the only sentence I had learned to say in my old school. But after joining AITIS, I learned that nothing is difficult if we try hard. And this is how I started learning English. I still find myself a beginner in this field but at least I am confident that even if I make mistakes, I shouldn't give up. Thank you so much to all the teachers for bearing with my mistakes in speaking and writing English. Aside from this big lesson that I learned in this school, I'll never forget the friends I made here. Thank you so much to all of my classmates. I'll surely miss you.

My AITIS Memories

by: **Atiwat**

I have been learning at AITIS since KG and I have made a lot of good memories with my friends. One of my best memories is school camps. We went to camp every year where we used to prank each other, and this is a memory I would never want to lose.

My second-best memory is being with my classmates. And that is the reason, I never wanted to miss a single day at school.

However, the time from KG to grade 6 passed very fast. All the teachers I had were very playful. I wish my next school is also like that.

And last but not the least, even if we won't meet each other in future but we'll still be friends.

My Four Years at AITIS

by **Pooyawat**

My four years at AITIS changed my life. Before I joined AITIS, I was studying at a Thai school. My English was too bad. Within one month at AITIS, My English improved a lot. Now four years passed, and I think my English is a lot better. I can speak, write, and read well. All activities in class improved my Language skills.

My four years at AITIS made me happy and feel good with many activities. But this time passed very fast. I can't believe that I need to leave this school now. I feel so sad that I need to leave my good friends and teachers. I would like to say thank you so much to all the teachers who helped me in the remedial and the ESL classes that could make me catch up with my friends. I won't forget this school and all of my friends.

Love to AITIS!

MY MEMORIES

By Preme

It was the first day of school and I met Yuki
and Ben

All throughout these years, they were my
best friends

When I left the school in grade one and
joined it again in two

They were the people with whom I grew

Now it's time to leave and I will remember
them forever

We shall not part and will never sever

My Memories

By Yuki

It's almost the end of the school year
and it's time for us to say goodbye

I may never see my friends again,

But I'll contact them through
technology to say Hi!

When we leave each other, we'll feel sad

We will miss each other, which is really
bad

But, we have memories for each others

So we can still remember each other

My Memories

By Piryakorn

One of my best school memories is my Grade 6 school camp. It is the best because we had a lot of fun with teachers and friends. Especially when we got separated from other campers and had to be made leaders. Another best part of the camp was when we had to do a comedy role play and I had lost my voice because I was laughing too much.

My second-best memory is of Grade 6 Team Building camp. And the activity I enjoyed the most was preparing food for lunch. My group made smores and fruit salad. Also, It was great fun eating our food together.

My Favorite Memory

by Ilyas

My favorite memory is the four-legged game that my friends and I created in school.

In December 2017, when I was in Grade 4, Khang, Scott, and I thought of creating a game in real life that turned out to be one of our biggest achievement.

During one of our recess, Scott and I was trying to figure out how to make this game possible with three legs, when Khang gave us the idea of playing it with four legs and we all agreed.

Our two OG robots were Fujin and Rajin where Rajin could make a shield for 8 seconds and recharge for 3 seconds and Fujin could go on the floor and kick the opponent's leg. And the rules were, if your butt touches the ground you're out, or if you lose 2 legs you're out too. So, after that, we kept making game updates by inserting new robots.

The game became so famous among students that that we had to create ranks for people not to copy top secret info about new leak robots and rank robots. There were people trying to copy our game, so in order to keep it safe, we ranked only the most trusted people in the game and shared top-secret info with them. It was a chaos telling them to stop copying our game. Anyway, our game became so famous that grade 1 to grade 6 started learning it from us but we only limited it to some people or else copying would start coming in.

Scott and Khang and I were the game developers and Wiss and Preme were at the highest rank. Only they could see the leaked info.

So, this is the best thing I ever had in school, and which kept me sane and happy in school until teachers banned it and all of us were in sorrow.

My Memories

By Thanop

I've stayed here for 7 years
It is even worth more than
my blood, sweat and tears.

My years at AITIS, I'll never
forget
Like I'll never forget all the
26 alphabets.

To return to it, I find myself
incapable
Because what AITIS gave me
is invaluable.

I would not have TODAY
If AITIS was not on my way.

AITIS is like a key
That always opened
everything for me.

AITIS taught us to respect
Or else others will reject.

AITIS is like my second home
That let me search and learn
like Google Chrome.

Goodbye Poem

By: Punn

My name is Punn, my journey begun
I came and won, a lot fun
New language, I'm at disadvantage
I yelped loud, in the crowd
I found friends, I can depend

The years passed by, and made me cry
Oh the time was fast, the days in the
past
I tried to be good, and be understood
Now, I look up and say, "Why?" Do I
need to say goodbye'?

My Best Memories

By Achawit

It has been seven years since I joined AITIS. I joined AITIS in the second semester of KG class. I was a really shy kid then, who would never talk. Whenever teachers asked me something, I used to be just quiet. But thank you to all my teachers who helped me speak loud and clear.

They made me talk in front of the class more often and that is what helped me gain confidence and develop into a person who I am today. AITIS teachers also helped me to be good at English. Thank you so much to you all for that!

I'll also never forget the friendship I made here with my classmates, who always helped me and never left me alone. I wish you all the best in future, my dearest friends!

My Memories

By Sumet

I have learned at AITIS since nursery. It is the first school I ever went to and learning there helped me with many things. My 2 best friends I made here are Preme and Yuki. They were my best friends since nursery and are still my best friends till today. If I had never attended AITIS then I would never have had such amazing friends. My learning experience at AITIS really helped me improve in many ways. Now, I like almost all subjects because AITIS helped me find an interesting aspect in every subject. A big thanks to you AITIS!

Memory Poem

By Wiss

I have a lot of good time in AITIS
When we are going to a new school, I wish my
friends all the best
I will miss my Grade 6 teacher and, also, all the
rest
Hope we graduate with a fest

We are here to make memories
All my friends and teachers are just like family
It's time to face the real world, no more fantasy
Now I'm 100% charged, moving on with full
battery

I had such great experiences and such great fun
I'll keep going no matter what bothers
And I'm sorry for bad things that I have done
Just wanna say I love you all before we leave
each other

My Best Memory

By Kritamate

The activity I will always remember at AITIS is grade 6 camp. It was my first camp ever in my school life. I liked it because I got to do many things that I had never done before and that includes sleeping with my friends as well. I have never slept with any of my friends at all. It felt so good to sleep very late for 2 nights. The camp was for a short time, but the memory is going to last forever.

My Best AITIS Memory

By Naifa

There are many good memories I have in this short span of time I had at AITIS. Among them, one stood out the most and it was the UN Day. My Yellow House represented Brazil where I was the emcee of the whole Yellow House event. We all wore our national costumes, which gave me the confidence to say I am a proud AITIS student.

My Best Memories in AITIS

By Raan

I moved to AITIS from a Thai school seven years ago. I was very shy then.

I joined AITIS in KG class and my class teacher was Mrs. Yemi. She knew that I was very shy, so when I had to present something, she would stay far from me and she would let me speak until she could hear me. Every year it was like that with each teacher and after many years of practice, I was confident and not shy anymore. Thank you to all the teachers for teaching me and making me more confident.

I moved to AITIS with my friends and never thought that we would leave each other one day and go to different schools. But after Grade 6, we have to do it.

I remember all the good times we had together. We laughed and played together. We always helped each other when we had problems with homework. We shared our stuff and snacks with each other. I will never forget the fun that we had together and the hard times we passed through.

When I come back to Thailand, I will always visit AITIS and my friends.

My Memories

By Aurel

To me, Grade 6 was a very fun and memorable time. One of my best memories in Grade 6 is Team Building. Team Building was very fun. We got to know a lot about are friends. We got to play a lot of games.

First, we learned how to play with a cup. Then we made poster's for are group. Then we drank bubble tea, it was delicious. But we had to get in are groups and start cooking. My group made blue soda and lemonade it turned out to be great. The other groups made spaghetti, s'mores, sandwiches, and more. After making the delicious food, we finally ate lunch. It was so good. Then we played games. We were all tired, so we went inside, and it was almost the end of the day. After we went back to class, we gave gifts to each other and wrote cards. Then we ended Team Building. It was a very fun day. I will never forget that day. I will miss all my friends and I wish them all the best in their future.

My Fondest Memory in

AITIS

By Arya

I have many fond memories of my days in school. In my early days of school, I had been shy and an introvert. When I was in Pre-K 2, my teacher asked me to join the talent show but my parents were hesitant to let me perform because I used to be really scared to face people. But my teacher encouraged me and my parents let me participate in the talent show.

On the day of the talent show though, I was nervous. But I performed really well, and everyone was very proud of me. I feel this was a steppingstone in my life to overcome my fears and to face problems with confidence, which helped me to take responsibility such as being a reporter, a class representative, a vice president, and an active member of the Student Council in later years at AITIS.

My Experience in AITIS

By Sandee

I loved Grade 6 talent show. It made me improve in lots of things.

First, I wanted to join the girl's group, but they had already submitted their forms. I learned to solve this problem by talking to the boys and we started to form a group. I had included Raan, Wiss, and Mahasamut in my team but Mahasamut had to go to Japan because he had already bought the tickets. So, we replaced him with Pooyawat.

Being with boys made me have lots of fun! We practiced at Wiss's house, and also had a party there. We ate Pizzas, drank Bubble tea, and play games, and it was very fun. Even though we had some problems, but we practiced our best.

I'll honestly remember this experience, having a show with the boys.

My Best Memory in AITIS

By Sarisa

My best memory in AITIS was Grade 3 camp because it was my first camp. I was very excited to go with all my friends. When we all reached at the campsite, all the teachers explained the rules. After that, we all went to our cabins and changed our clothes. The teachers let us play a game to make different groups. Later, we had lots of activities. The best activity was cooking, campfire, and dancing. I didn't know how to cook. It was my best experience cooking with all the members in my group. I made lots of new friends too! We cooked spaghetti. It was really fun because it is my favorite food. After we finished cooking, we ate them all. It was delicious. After we all finished eating dinner, we did some more activities. Then it's time for the campfire. It's my first time having a campfire with all my friends. We sang a song too! We roasted marshmallows and ate them. Later, we danced and had a party. When we really got tired, the teachers let us go back to our cabins and we all relaxed. It was my best experience ever!

My Best Memories

By Khang

During recess on around December of 2017, I was tagging along with my buddies Scott and Ilyas since I didn't have anything else to do. They tried to replicate a video game that we were interested in, in real life. I was mildly amused watching them trying to replicate a shooter game in real life. After a few minutes of laughter, I suggested an idea which lead to the creation of a game we called "Four Legged".

The game was very fun to play and got kind of popular with new updates coming very often as it was easy to do in real life. It was very fun to create new ideas to add in the game. Playing the game was equally fun. The game was very intense and fast paced with you always having to look around or else someone could place a lethal bullet in your head (the bullet is imaginary). It brings me immense joy to see people enjoying what I helped create. Eventually, the game died after almost two years but still, my best memories I had in AITIS was playing "Four Legged" with my buddies.

The Memories I'll Never Forget

By Saura

"How will I leave you?" I asked. "You had started my little years in the school that are filled with all my delightful memories now. Then how will I move on?" But suddenly, I felt that I wasn't going anywhere; I had my thoughts to recall of the times spent in the school that would remind me of my mistakes, my delights, and the pleasant family of teachers and friends that have brought me to this step.

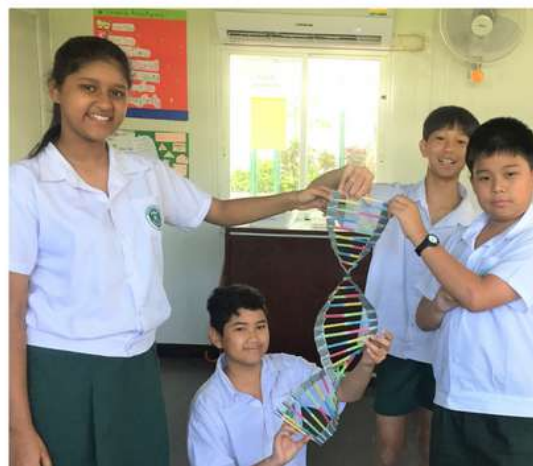

It all began when I joined the primary class in AITIS and was introduced to the other kids, which made me feel nervous. At first, everything wasn't easygoing and smooth, for I had difficulties in speaking English during the first few months, which led to huge yet amusing mistakes. Sometimes I used to understand the opposite of the actual meaning, such as when I was supposed to eat breakfast, I brought my lunch and hungrily ate it up! Or, I would randomly start moaning for my mom, which is quite a natural behavior.

Nonetheless, I settled later on, because of the welcoming environment and spectacular activities which I still treasure today. Making many friends was one of my goals, which I hopefully did, that helped me during many circumstances. One of them was the fun-filled Talent Show when I watched my friends perform astoundingly, and I sang a song without hesitation through the support of my friends. However, the best event in my younger years was the splendid Halloween when we wore dark black clothes and striking handmade masks, and played games like moving around in huge circles and singing until we all got exhausted.

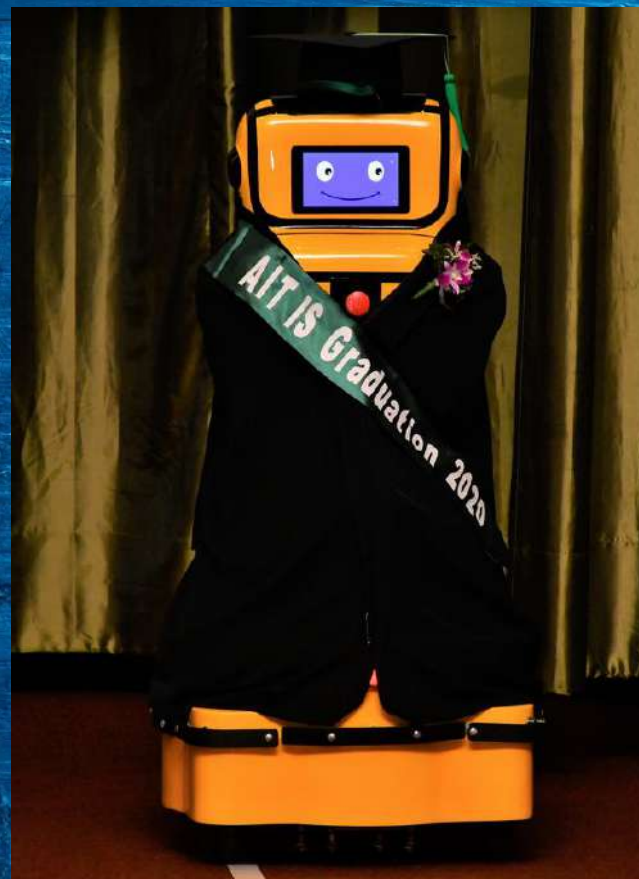

Those were the younger times, which were lively and filled with entertainment. However, joining the elementary was a much more sober phase in childhood, which required responsibility and efficiency. But I was thrilled to move up, which gave me a sense of pride. I recall my first-grade years when I learned several things that still guide me today. But I felt miserable to see one of my most beloved teachers retire as soon as I was about to transfer to grade-two, yet glad for her to relish her later years.

Many years of moving on and on prepared me for tomorrow that could help me in different circumstances. But one of the most prominent milestones in my life that somehow improved my confidence was the emceeing on Annual Day, for which I practiced, leading to many flaws but eventually, success. Another essential experience for me is the Annual Camp, which I first attended in my final school year in AITIS. It was exhilarating to go for the first time after years of patience, which was a remarkable three-day trip and one of the greatest memories for life.

Time has passed by like a single second, leaving behind only a precious, imperative souvenir for my entire life, the memories. It has given the memories of my younger years in AITIS, a trustworthy and exuberant environment. Keeping those unforgettable remembrances secure is one of my goals, those recollections that will guide me when I move on to a new journey.

Grade 6 Virtual Graduation

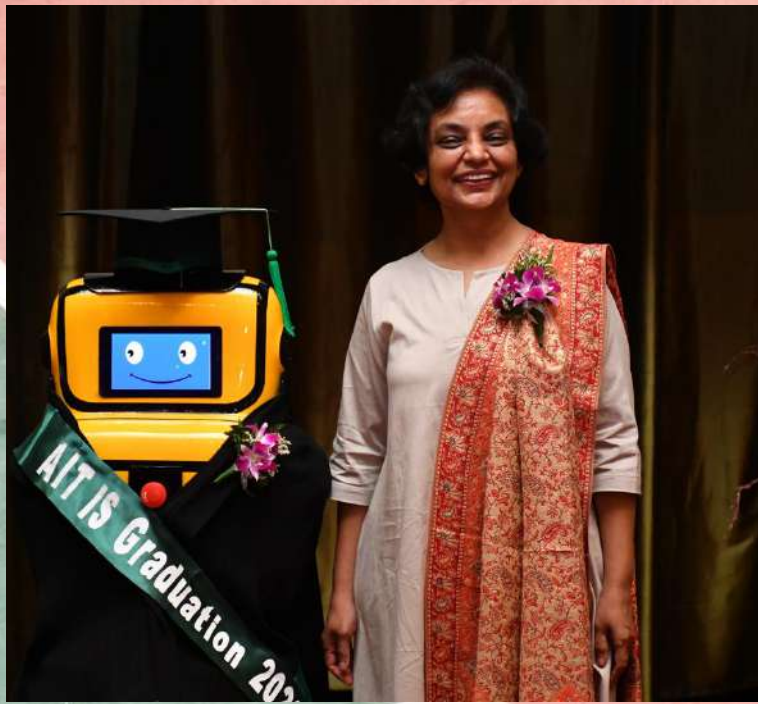

Students' Corner

Superman vs Joker

Superman is a good guy, he is a strong man. He likes to help those who are in need.

One day Superman was flying, he heard someone asking for help. When he arrived he saw the Joker destroying the city. Joker threw fire pumpkin and he is a bad guy. What are you doing Joker???

Superman uses his eye laser to fight the Joker.

Boom!!!!

Superman uses eye laser to shoot lasers at the Joker. Joker jumps and dodges but he cannot escape. The eye laser is very effective. It explodes very hard causing the Joker is bounced to the

moon. At the moon Joker has no helmet, food and oxygen so he dies. He will not come back to the earth. The Joker cannot return to the world again.

he people applauded Superman,

and thank Superman for helping them. After that the people live together peacefully. Do you know who the winner of the fight is? Superman is the winner of the fight. Oh no! I lost said the Joker. I am not scared of Joker said

Superman. Do you think that the Joker will return to the earth? Yes or no? I think the Joker will come back to the earth again.

Writing a Character Description

by Mary, Gr. 4 Edelweiss

Patrick had hundreds of baseball cards. He didn't have one very special card, though. He didn't have a Jackie Robinson card. It was rare card. Jackie Robinson had played for the Dodgers. Later he was traded to the Giants. Patrick's dad was just a little boy then, but he was Dodgers fan. He said that was the saddest day of his life.

One day Patrick was looking through some baseball cards at a yard sale. He couldn't believe his eyes. There was a Jackie Robinson card! Patrick brought the card. Then he wrapped it and tied a ribbon around it, When his dad got home, Patrick handed him the packages and said, "Here's something for you, dad."

The Kitchen

Urjitha, Grade 2B

Long time ago, there was a beautiful house, and in that house, there was a kitchen. Inside the kitchen there was tomato, carrot, cucumber, and cabbage. They were special. They could talk when the chef was not in the kitchen. The cucumber, carrot, and cabbage were best friends, but the tomato had no friends.

So, the tomato often asks, “why can’t I be friends with all of you?” You cannot be friends with” us said the carrot proudly. Why? Asked the tomato again then the cabbage said” because you are red.” Then suddenly the clock said stay quiet, the chef is coming. They stayed quiet and they almost got caught by the chef that they were talking because the chef heard them talking a little.

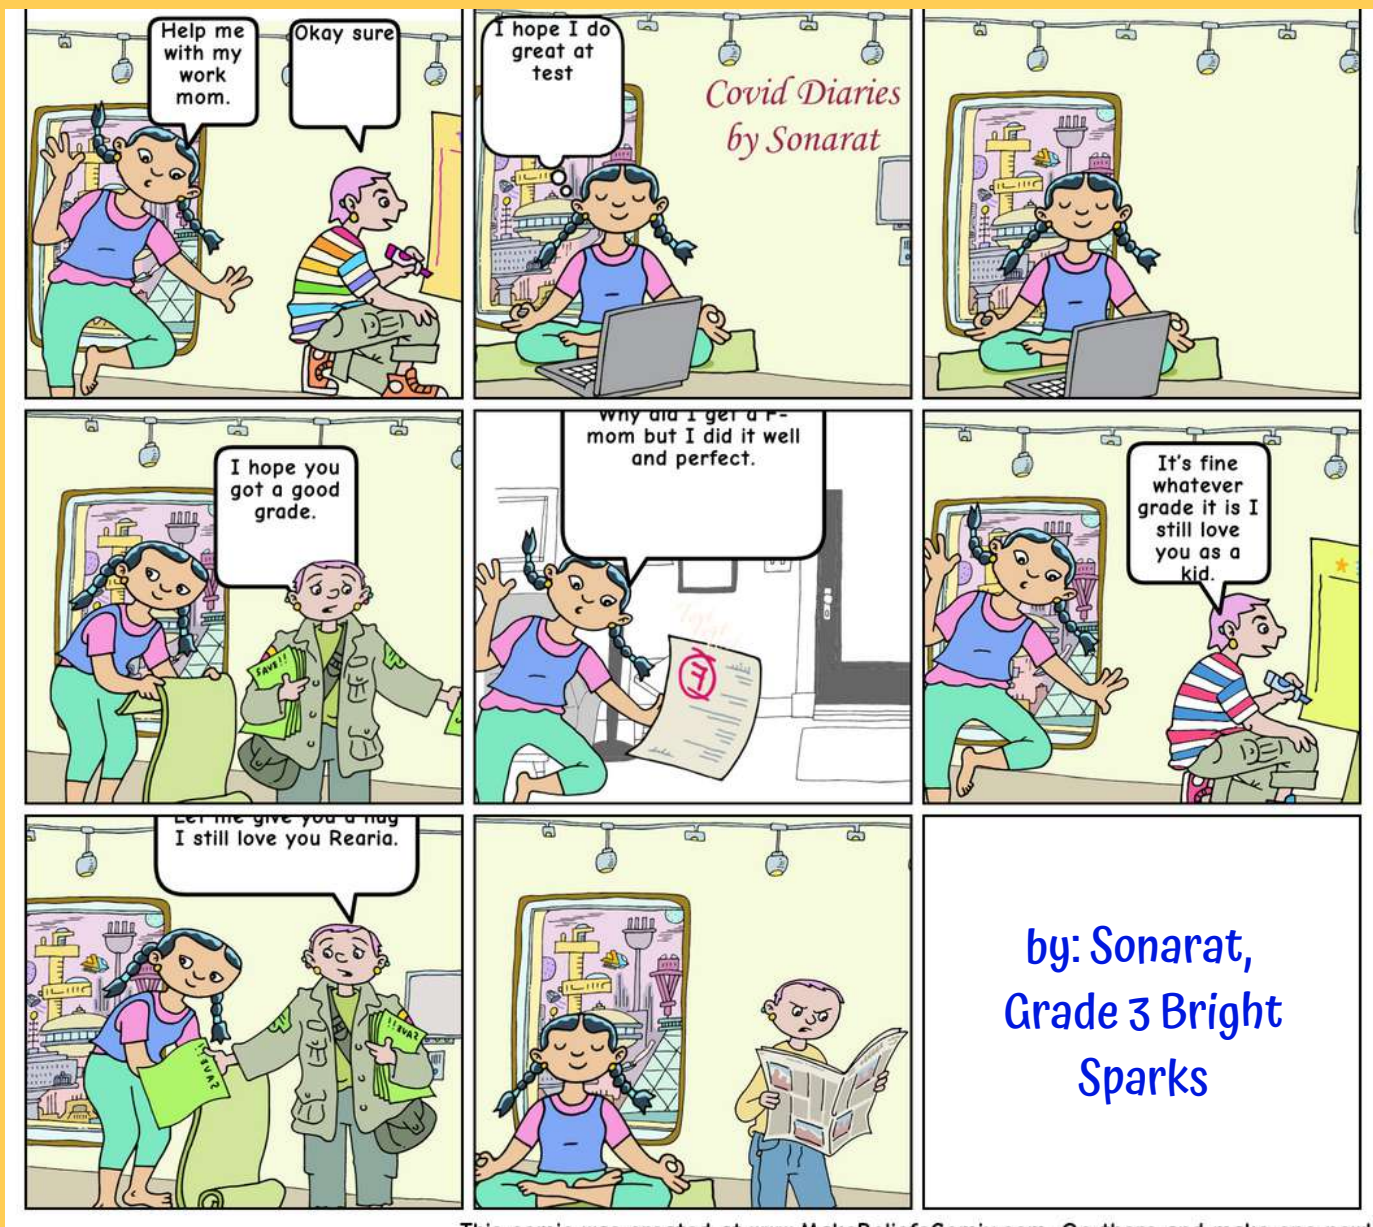

After a while, the chef, left the kitchen and the maid had to prepare salad dish. The maid took the cabbage and cut it, then she took the carrot and after she took the cucumber to cut. But she did not take the tomato, because it was red. The tomato was very happy and proud of himself because the cucumber, the carrot, and the cabbage always laughed at him. But he only wanted to be friends with them.

The moral of this story is:
Never laugh at others.

If I Could Visit One Place in the World

Kiragorn, Grade 5 Ace

If I could visit one place in the world, I would go to Japan, again. The food there is delicious and the people are mostly kind, friendly, helpful and organized, the toilet's are pretty much Hi-Tech, and I also really want to see the snow again. It is incredibly hot here in Thailand, and the hobby models here are extremely expensive. There is no low-priced Japanese food, or snow, and there aren't any 'Gashapon' s which are basically one of the World's most well-known toy machines. In the summer, it is very hot for us. At least in Japan, there's a few cool breezes drifting by. Also, usually, in Japan, the Presidents are good and honest people, who don't raise too many taxes. And again, most of the popular cartoons come from Japan. I've been to Japan many times already, and I already have tried many things that I've written above, but still, I would always like to go back there sometimes. Thailand does have a lot of good qualities, but honestly, I still like Japan a lot. The cleanliness of the rooms of the hotels, the bathrooms, the restaurants, the friendliness of the people, and the animals, the huge amount of snow in some parts of the country, and the ever present blast of cool air. Also, some of the Seven-Elevens have toilets! Overall, the Japanese people and their country is incredibly nice, and I'd like to go there again one day.

The Two Pilots from Two Different Universes

by Zarrar Numair- Grade 2A

Once, there was a girl pilot. The pilot was flying a toy red plane. The plane flew well, but it fell down. The pilot was sad and was saying "I can't fly a plane! What should I do?" The pilot was sad and the pilot sat down thinking. Suddenly a little bag fell on the sad pilot's head. The pilot said, "Where did this little bag come from?" Then, another toy plane crashed onto her table. "Where did this plane come from too?" said the pilot. Suddenly a little pilot came out from the plane. The pilot was surprised to see a little person riding in a plane! Then the pilot took a picture of the small pilot. The pilot went to get the bag when suddenly the plane fell and broke its propeller. Then, the small pilot was sad. The small pilot said "How can I go back to my family and home!"

Then the girl pilot had an idea. She made the first plane for the little pilot, but it didn't work. Then, she made a second plane and it didn't work too. At last she made the final one and it worked! Then the small pilot said, "Hooray! Now I can go back to my family again!" Then the small pilot said, "Bye bye pilot!" Then the girl pilot also said, "Bye bye!" At night something was shining in the sky. "Stars!" the pilot shouted. The pilot then knew the little pilot flew there. Then the pilot was very happy because the plane she made flew very far and very high.

The little pilot could rejoin his family and go back home to his universe!

Write about your COVID-19 Robot

Grade 1

Introduction of my Robot

My robot name is ROBOTIZER. I have made him to fight COVID-19 virus. He sanitizes my nearby community.

Power of my Robot

* His sphere shaped eyes have microscope which can see COVID-19 virus.

* My robot has two strong signal catching cylinder shape antenna which can get calls from people and go there for help.

* His rectangular prism shaped body have technology of making sanitizer liquid for spray.

* My robot has a spray system attached to his rectangular prism shaped body for spraying sanitizer to kill the virus.

His cylinder shaped legs give him power to run faster and reach wherever the sanitization is required.

How can my robot help people?

My robot helps people to sanitize their nearby places. He kills COVID-19 virus and save people to become sick. My robot can identify people who have COVID-19 virus symptoms.

The Mysterious Planet

By Karynne Lois Lepiten
Grade 4 Tinkers

Neo was assigned to go to space. Neo was an ordinary kid, 11 years old. You might be thinking, “An 11-year-old kid will go to space? That’s impossible!” but in my year, 2053, kids this age are allowed. Neo’s father couldn’t go with him because he had a horrible disease, so Neo had to go with his dog!

Neo’s dog’s name was Doggo – a husky dog. Both Neo and Doggo loved mysteries and this was the reason why Neo was assigned to go to space. There was a mysterious planet on space. Astronauts had gone there and had seen weird people aged like Neo.

The next week, Neo went with his dog. Neo saw the shaped-like-screw planet. On the planet, Neo and Doggo saw two people who weren’t normal. They looked like half-human and half-robot. One of them, the boy, said, “Hello, you look weird, anyway, I’m Mike, and this planet is, ‘Mekanika’” Neo responded, “Hi! I’m Neo! And I’m from planet Earth,” and then one of them, the girl, said “Hi! I’m Meeka!”

Neo started going around, checking it out. It was time for him to go back home. When he picked up Doggo, the dog was playing with a robot dog. Mike and Meeka came to them. Meeka said, “Sorry, this is our dog, Screw” Neo petted him and went back to his spaceship. They went back home.

When Neo came home, ready to tell his dad what happened, his dad was in a coffin and his mom was in the hospital because of a car crash.

What form of Government does the US have?

- The US is a constitutional republic that practices democracy.
- It is composed of 50 states, a federal district, five major self-governing territories and several island possessions.
- In the US the official head of state and the head of government is the President. The current President of America is Donald Trump (elected 2016).

Math: Using Shapes- COVID-19 FIGHTER ROBOT by SURAT, Grade 1 Lilies

Can you control the sound the ruler makes?

Sound is an up-side down movement (vibrations) when the ruler is flicked. The harder the ruler is flicked, the larger the movements and the louder the sound will be. Also the more ruler there is hanging over the edge of the table, the larger the movements and the lower the sound will be.

oil is important for all living things because soil is the first thing we feed on earth

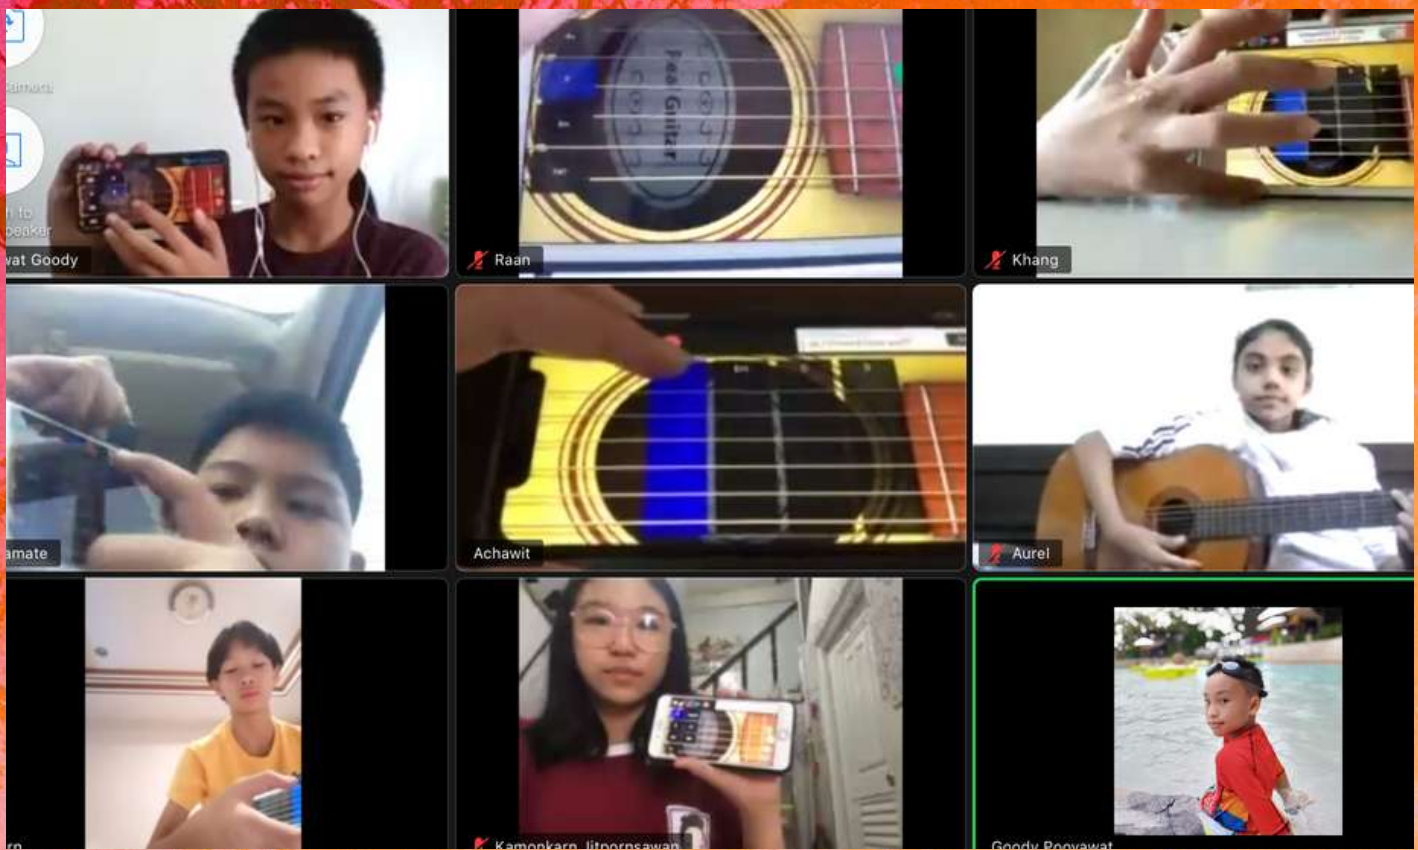

The United States detonated two nuclear weapons over the Japanese cities of Hiroshima and Nagasaki on August 6 and 9, 1945, respectively, with the consent of the United Kingdom, as required by the Quebec Agreement. The two bombings killed between 129,000 and 226,000 people, most of who were civilians, and remain the first and only uses of nuclear weapons in armed conflict.

MISTAKES AND
TAKE THE MISTAKE HAVE TO
POWER TO TURN YOU TO DO
SOMETHING BETTER THAN
BEFORE!

Thivain
03.03.2020

1. Names of animals
The Cat, Dog, Mouse, and the little red hen.
2. What did the Little Red Hen do all by herself?
She planted the wheat, she sowed the wheat, she cut the wheat, she took the wheat to the mill to be ground into flour, all by herself gathered the sticks, she built the fire, she milled the cake.
3. Did the animals help the Little Red Hen? Why?
No. The animals did not help the hen, because the animals are lazy.
4. What happened at the end of the story? Why?
The hen ate all the cake, because the animals don't help her.
5. What is your favorite animal/parts in the story? Why?
My favorite animal is the hen, because the hen does all the work, and my favorite part is the mouse sitting on the chair, because it is funny.
6. What do you learn from the story? (hard working, helping each other)
Helping each other.
7. The moral of the story: the value of working hard, consequences of laziness, as well as the importance of teamwork.
It is consequence of laziness.
8. Further activity: Draw the favorite part of the story and write 2 sentences about it. This work will be captured and turn.
