# THE BULLETIN

May - June 2025 issue Volume 12 | issue no. 8

## AITIS Mission Statement

The mission of AITIS is to provide holistic education in a stimulating and caring international environment that will help build a positive attitude towards learning. Our education is based on values that will support the growth of a reflective and responsible member of the society.

# Dear Parents and Friends of AITIS,

Greetings, and welcome to the final quarterly bulletin for the 2024/2025 academic year. This school year has been one of remarkable achievements, growth, and meaningful experiences for our entire community. AITIS continues to flourish—not only in student enrollment, which reached a new high of 360—but also through continuous improvements to our infrastructure that enrich both the aesthetic and functional aspects of our learning environment.

A defining milestone this year was the inauguration of the AITIS Multipurpose Hall, officially opened in February. This accomplishment is a proud testament to the unity and support of our parents and the broader AIT community. Our students have already begun to make wonderful memories within this new space.

Our After-School Activities (ASA) program continues to thrive, offering a dynamic mix of opportunities for students to explore their interests and develop new skills. This year's lineup included Arnis, soccer, cheer dance, chair ball, arts and crafts, chess, knitting, vocal training, musical band, and drama. The program concluded with a vibrant showcase of talents.

## After-School Activities

A special highlight was the Drama Club's annual performance, which captivated the audience with their rendition of "Cinderella." Congratulations to all student participants and their dedicated facilitators!

In April, our annual Inter-House Art Competition took center stage, drawing out students' creativity in sketching, painting, and collage. These artistic efforts not only showcased individual talent but also contributed valuable points to each student house, reinforcing team spirit and camaraderie.

As always, our End-of-Year Celebration was a signature event, themed this year as "One World, One Family." This cultural showcase took the audience on a journey across continents, with each class bringing their region to life through inspiring performances. The celebration was both an educational and emotional experience, emphasizing the unity in our diversity. Thank you to all students and teachers for your outstanding contributions.

This year, graduation ceremonies were held in two memorable parts. First, forty-four kindergarten graduates received their diplomas with pride and performed heartfelt songs to honor their parents and AITIS staff. Second, twenty-one Grade 6 students walked the stage one final time as they bid farewell to AITIS, concluding their primary journey with a moving finale of gratitude and celebration. We are proud of every one of them and wish them continued success.

As the year concludes, we also take a moment to say farewell to three esteemed members of our faculty: Mrs. Huong, our dedicated school librarian, 30 years of service; Mrs. Rathna, our caring Pre-Kindergarten 1 teacher 12 years of service; and Khun Sarita, our committed Thai language teacher, 13 years of service.

Their contributions to AITIS have left a lasting impact, and they will be truly missed. On behalf of our students, parents, and colleagues—thank you.

To end the school year on a high note, we hosted a 10-day Summer Adventure Program for students from Nursery to Grade 3, including our newly admitted students for the 2025/2026 academic year. The program was a joyful blend of learning and play, giving students a fun-filled transition into the summer break.

### Pre -K Teachers

### SMJ and Office staff

As we close this chapter, we thank you all for your continued support and partnership. We look forward to welcoming you back in the new school year with renewed enthusiasm and exciting opportunities ahead.

Warm regards,  
Mrs. Thomas  
Principal, AITIS

# MY AITIS EXPERIENCE

## GRADE 6 MEMORIES

Today I'll recap about my time in AITIS and how did I feel growing up in this school.

### Grade 3

Grade 3. This grade has been an amazing grade for me. Our teacher was Mrs.Kathy. She was an amazing teacher in our class. This grade helped me practice my communication skills and my leadership. Why leadership you may ask? Well in grade 3, I was voted to be the class president of my class by my friends. It taught me how to be responsible and serious at certain times.

### Grade 4

Grade 4. The most energetic grade I have ever been in. We had so many fun and cool activities in our class hosted by our teacher, Mr.Ernesto. Now Mr.Ernesto is a great drawer. He can draw such beautiful pictures within seconds. We also had a party there. With indoor volleyball first, then dodgeball, and to top it off we had a movie.

### Grade 5

Grade 5. Might be the most challenging grade. This grade taught me to focus on my studies and provide time for both playing and studying. We had watched so many movies in this grade. Our teacher Mrs.Jennifer. Is a teacher who wants us to focus on studying to become successful. I wouldn't have such high grades now if it wasn't for her.

### Grade 6

The best grade that gave us so much project. Now you might think that having a lot of projects is bad and tiring, but it is quite the opposite. The projects that we have let us freely think and create with no limits. Our teacher, Mrs.Anushree is a teacher who is fun to talk to and learn from.

Thank you AITIS for everything!  
Chantawat

# MY EXPERIENCE IN AITIS

## When did I join?

I joined this school when I was in grade 3 which is also in 2021, when I first join ,it wasn't really good since we were learn online due to covid-19 but thing get better later on because we finally get

to go back to school, when I got there for the first time, I was really scared because that time I was really bad at English but luckily was was able to learn really fast and became better at

English(thank to all my friend of course)

## Favorite Moment

**Neti**

I have 2 favorite moments here in AITIS.

My first favorite moment is in Grade 6 camping, I was with NJ, Promsub, and Tonduangtham. I remembered that on the first night, we were just talking for like the whole night(Not really). My second favorite moment is also in Grade 6. In Thai class, we kept on dominating Ron to go out there in front of the board and dance the loy-kraton dance even though he danced so terribly.

## Overall

Overall I think this is the best school I ever been in (like actually!) This school was so good, I met and made so many friends here and I also wanted to say that I would really miss this school when I graduated from this school.

Let's travel back to 2015 when I started AITIS. I joined the Nursery and back then I was just learning to know my friends and the school.

**Jirapat!**

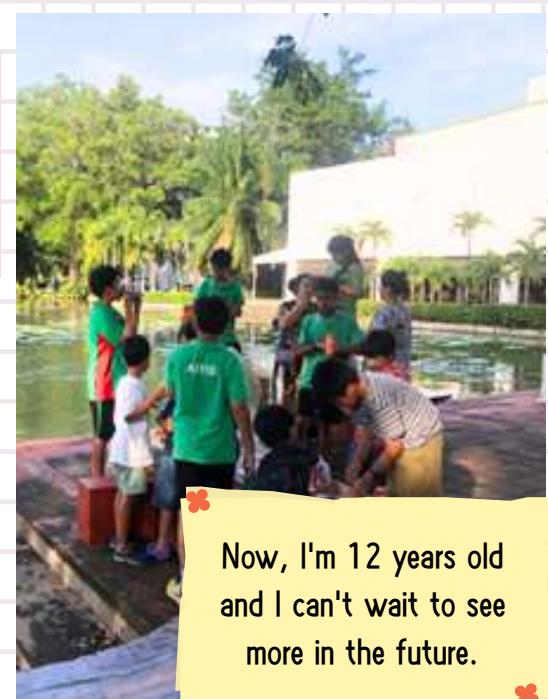

Pre-Kindergarten 1 and 2 were just like Nursery except I was getting along with my friends and knew the school more. During Kindergarten, it was my first graduation for the ones who will be going to Grade 1.

I don't quite remember anything in Grade 1, other than the time we started online learning. Grade 2-Grade 3 second semester was online learning due to the pandemic. In Grade 4 I started to remember my times with my friends because day by day I was getting closer and closer to graduating from AITIS.

My 2 best memories in Grade 4 were camp and the time I went to Harbor Land after the 2023 AITIS Annual Day.

In Grade 5 my best memory was camp because my cabin was so funny and we partied for 2 days. But by far the best was Grade 6. I had so many good memories in Grade 6.

Now, I'm 12 years old and I can't wait to see more in the future.

Hi there! My name is **NJ** and I'll be talking about my experience in AITIS. This school has brought me so much emotion all the way from sad to happy, I've been in this school for around 10 years! I have grown so much throughout these years, and I've learned countless things! Now, let's go back to the beginning.

Now, for the final years of G4-G6, my teachers were Mr. Ernesto, Mrs. Jennifer, and Mrs. Anushree. These were the years with the most impact towards my life, I needed to learn/gain responsibility and independence because of my role. I've also become a lot smarter than before, and I have shared so many memories with all my friends, like school camps and field trips!

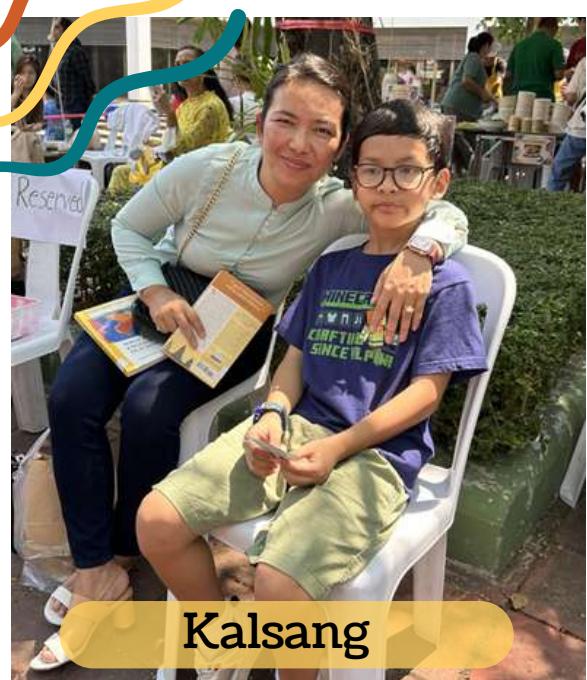

During my Nursery to KG years, I was very energetic, but I couldn't remember a lot because, at the time I was only 3-6 years old the only clear memory I have of that time is getting scolded with my friends Siraphop and Thitipat!

These past years have changed me a lot, in terms of strength, height and even skills! I also made a lot of friends, and it taught me that not everybody in your life is permanent, some will go and some will stay. This long journey at AITIS was so much fun, and it taught me and prepared me for my obstacles in the future.

**Neil Jansen**

**Kalsang**

when i first came to AITIS I was scared as I didn't know anyone, but when i came in everyone came to me and welcomed me to the class. Grade 4 i don't remember much But it was good

Grade 5, I socialized more and made more friends like similan and wantunyu. Grade 5 was the first time I was pushed out of my comfort zone and do public speaking, But since I feared public speaking i backed out and went back to my comfort zone.

Grade 6 was great, I overcame my fear of stage fright By becoming one of the EMCEE in the 2025 talent show. At first i was second guessing myself i thought i was going to mess up and get laughed at, but i didn't . I had over Overcome my stage fright

Overall my time at AITIS was great. Coming to thailand has changed my perspective of life, I realized how lucky I am, as thailand is much more advanced compared to nepal But before I leave I would like to thank the AITIS staff for turning me into the person I am now :)

I first joined AITIS in Pre-k2 and today I will be talking about my experience in AITIS.

All of the teachers that I learned with are very nice and they let you stay after school for the lesson you're not good at.

So, we have fun and food Fair, children day, camp, field trip, and more but my favorite is camp because we have fun activities and we get to sleep with our friends.

Next, After school activities

like chess, badminton, and more. I actually joined one before and it was chair ball and it was but there is also club like vocal, drama, band, and more and did not join any sadly.

After all these years, I became smarter and made more friends, some new friends came, old friends left, and after all this year it was quite fun meeting everyone like my friends and the teachers and the teachers and the teachers let me do new things, I never did. I really like doing it like presenting our project, skit, and more so that will be my AITIS Experience

## My Experience in AITIS

By Wathunyu

I started AITIS in nursery school, so I have many memories. From inside the class, to field trips and camp.

In my opinion AITIS is a good school. When I was in Pre-K to grade 1, we were allowed to play outside after school in the playground until four pm. I had so much fun. Until covid came. We couldn't play after school anymore and had to learn online. It was tough but we went through it. In grade 3 we went back to school. It was not good like the old days, but it was way better than online class. Grade 4-5 the football field was built. I love football so much I play it at lunch every time.

Every single year we had a field trip. I enjoyed these as we went to zoos, science museums, and many more. Grade 4-6 we had camp which was very fun. I joined camp every time.

Right now the canteen just finished. And many other improvements to the school were made. This is a very good school and I will remember the memories I made here!

At AITIS, I made some great memories and a lot of new friends! Even though I joined mid-semester, I still enjoyed a lot of the events. I had joined sometime in the middle of September, and my first official day here was coincidentally on our teambuilding day, filled with exciting games and I got to know about the new friends I was going to make.

Afterwards, I eventually caught up on the work I had missed out on over the months I wasn't here.

Later, we had our UN day, in which I got to know about many different countries, along with their various cultures.

Afterwards, we had a world Toilet Day celebration, with an organization coming in, holding somewhat of a workshop, and a fun competition to make innovative designs based on the given theme.

After our midterm exams and our semester break, our new semester started. I couldn't join ASPs (After-School-Programs) in the last semester, since I had joined late, however, I could now join ASPs this semester. I had joined the knitting club, and the intermediate badminton course. Till now, I really enjoy the classes and activities we do!

After our semester started, we had our sports day, where we did a choreography routine, we practised a lot! It was a fun and an exciting day for us!

Even though I was here for a really short time, I still liked it a lot here!

## NURSERY

When I just came ait for my first time going to nursery I always cried because I thought my mom and dad will left me out there forever. I am always quiet and sometimes I scream for some reason and we was doing some dance and they allow parents to go.

## PK1

when pk 1 I don't sleep at lunchtime I always bring my plushy there every day my bestie was Maiah but that time she so quiet

## PK2

When pk 2 is the same like pk 1 but harder bc kg will be hard bc we will go to kg KG

When I was grade KG I remember I was so happy for some reason that I got full score

In spelling 1-10 i don't know why I am was cringe when kid and now we going to grade 1

## GRADE 1

when I was in grade one I saw one friend she came new her name is Kira she was my friend and o we was doing project together when we were young.

## GRADE 2

when grade 2 there many students left and many students came new that time I remember I was so shy I was singing with my friends for talent show now let go to grade 3

## GRADE 3

when I was grade 3 that time I am not smart I got very low score I don't know how I pass grade 3 now I go to grade 4

## GRADE4

when I was grade 4 I am was growing up my favorite part is when we have to do robot diy cardboard that was very fun and now let go to grade 5 .

## GRADE 5

When I was grade 5 I am was grow up I learn and study ♡♡ my favorite part of I learn in grade five is social studies it was so fun and the time travel so fast now we going to grade six

## GRADE 6

When I was in grade 6 I little sad because last year to stay in AIT I will miss all my friends. I have many memories with them.

Pornchanok

# MY EXPERIENCE IN AITIS

By: Maiah

Nursery, the one place where I cried a lot. Watching my mom leave had me in the thought that she was gonna put me in the orphanage. Pre-k2, I had fun and cried less. But the one problem was that I HATED nap time. I could never sleep. Pre-k2, was alright. Kindergarten. It was the start of my struggle in math. I can still remember the time I got a zero in my homework because, I asked my aunt for help. Grade 1, I had fun, but I sometimes got bullied by this girl. I didn't really like the fact of being bullied, but it stopped once I reached Grade 2.

Grade 2, we had two new students, Tanyarut and Sippakorn. Tanyarut was so cheerful, my energy could never match with her. Sippakorn was in another class, so I couldn't remember my first impression of him. Grade 3, I sucked at math. Grade 4, I was usually quiet at the time, I was too shy to talk to anybody. Grade 5 was super fun, I wasn't quiet that much anymore. I played, talked to others and even made new friends from other grades. Grade 6, I am excited but sad at the same time. I'm going to miss my friends. I hope the next badge of grade 6 will have more time to spend with their friends. Thank you AITIS! 

# From Nap Time to Final Exams: My AITIS Journey

What school do you study at?

## Proudparefha

I'm from AITIS, also known as Asian Institute of Technology International school. I wrote this when I was in sixth grade, second semester. Since this is an elementary school this is my last year studying here. I've learned so much and made so many memories here. But before I talk about it, let me tell you what exactly is AITIS?

AITIS is a private international school in Khlong Luang, Rangsit, Thailand. It is close to Thammasat. AITIS is in the AIT community so that's why most of the teachers and students here live or work in AIT. There are about 400+ people that are from AITIS. The lowest grade level is nursery and the highest 1st sixth grade. Since you already know what AITIS is, I'll write about my memories here.

I joined AITIS in nursery at three years old, with my sister a few grades ahead. I was a shy kid who rarely talked or cried (according to my parents). We had nap time every afternoon and show and tell on Fridays. Once, I didn't have a toy, so I bought a drawing — it was funny, but at least I was unique!

Elementary school was nerve-wracking at first, with new students, homework, and more responsibilities. We got house colors for events, but everything changed when COVID-19 hit, and we had online classes for years. In fourth grade, we finally returned to school, though we still had to be careful.

School life became exciting with events like Sports Day, Talent Show, UN Day, Songkran, and more. The best experience was camp — we had fun and learned to be more responsible. Final exams were stressful, but they taught me the value of hard work and that mistakes are part of learning.

I've made amazing memories at AITIS, and this being my last semester makes me emotional. I'll miss this school dearly, but I'm grateful for how it helped me learn and grow. After all, the beautiful thing about learning is that no one can take it away from you.

## MY BEST MEMORY IN AITIS

### Chanadol

Everyday I love to go to my friend's house and hang out or even go to 7-11 and have fun playing basketball, volleyball, football and more! NJ is really good at basketball. Also, me! Sometimes I would just beg my mom to stay longer so I can be with my friends. AIT is very big. Especially when you just join AIT. It would be like a maze. I also feel very healthy and good staying in between trees. The weather is also soothing here.

Let me explain about AITIS. When I first joined the nursery, my mom was already a staff member working there. Normally, I attended a Thai school, but I had to wait a long time to be picked up by my mom. At AITIS, my mom could just pick me up and then return to her work.

Next, I would just go play with my friends in the playground. I made lots of friends. And I was really happy. My friends' names were NJ and Wathunyu. They were funny, friendly and kind hearted. Also, AITIS is like a forest. When it rains a little bit, it floods. And You see animals like you are in a zoo!

Hello, my name is Sippakorn and I joined AITIS in grade 2 semester 2.

At first it was hard for me to make friends. Since I don't like to talk with other people.

I was really shy that time. But I mostly forgot things I did that time, so I don't remember that much.

**SIPPAKORN!**

During grade 3 I started to get used to talking with my classmates and making friends. But then covid came and we had to learn online. I didn't really like it because I didn't get to meet my friend in person. After that covid finally disappear. So, we came back to learn at school.

From grade 4 to grade 5

it was really fun and also, we combined class so there were a lot of people and we had fun. I went on field trips with them and also camps. Now I'm in grade 6 semester 2 and I'm also gonna graduate soon. So I will really miss this school.

I joined AITIS in nursery school in 2015. Since then, I have made many unforgettable memories. In Grade 2, we had to dance to a song of our choice. Since Tonduangtham and I were talking, we decided to be teammates. We chose the song "Happier" and had to practice online. I messaged him every day, but days without replies turned into weeks, then a month. On performance day, we had nothing prepared. So I told him, "Just copy my moves." I started dancing awkwardly while he followed behind me. It was a disaster. After that, I stopped liking dancing and focused on musical instruments instead.

In Grades 4–6, I joined a talent show. I did Taekwondo in Grade 4 and performed with musical instruments in Grades 5 and 6. One of my best memories was at camp. I enjoyed camping because we had to take care of ourselves, manage cabins, and stay with friends for three days. My favorite activities were party nights, meeting new people, and cooking. I made many new friends and great memories there.

As I look back, AITIS has been more than just a school—it has been a place where I built friendships, learned new skills, and created lasting memories. These experiences will stay with me forever.

## Similan

Let's talk about my experience in my school, AITIS. I was 3 years old so I was in nursery. Meeting new friends is fun, but at that time, we missed our parents as well. PK-1 to KG was a long time already so I don't really remember much.

Now, in the elementary section. Grade 1 I was with Teacher Nanette. There is more work to do, new friends to meet, and old friends who leave. In Grade 2 Semester 1 was just the same but more work. I was with Teacher Joyce at that time.

But in Semester 2 until Grade 3 Semester 1. Covid-19 came so there were only Zoom classes. In Grade 3 Semester 2, there was a project we had and that was the only memory. In the project I was with Neti and Aditi. Teacher Karthy was our teacher that time.

## Siraphop

In Grade 4, I was with Teacher Ernesto. He was kind and friendly, and had games for us to play. Grade 5 was also fun. We had many projects but I think it's fun. And I was with Teacher Jennifer. My last year, Grade 6. I'm with Teacher Anushree. I had fun with friends, and I'm going to miss them so much. I recommend this school to others that's all. Thank you!

Ron

I really liked AITIS, but at that time, I didn't want to speak English. When the teacher told me to, I was annoyed. But in Grade 2, Tonduangtham, my best friend at the time talks English that time we called each other on our parent's phone, and he said he wanted to speak English so I also did, and then I liked to speak English, every day after that I spoke English and never speak in Thai. Also, when I first came to AITIS, they wouldn't let me in about three times until my parents went to pray at the temple. Then, for the fourth time,

I got into AITIS. In AITIS, almost every teacher was very good. They are kind, sometimes strict, but they always understand us. I liked every teacher. And my favorite thing is Camp. It was so fun. I played so much I got a headache after playing in camp every time, especially camp in grade 6. It was so fun because we also had a zipline within the military. I made a lot of good friends in AITIS.

#### Conclusion:

AITIS is a great school where I have learned a lot, especially English. The teachers are nice and helpful, making learning fun. I am happy to be a student at AITIS.

Until today, it has been 6 years since I joined AITIS and it has been 6 years that I had been collecting experiences in AITIS. Now, I'm going to tell you about it. (the things I remember of course) And... Next Paragraph!

I didn't make any friends at first but when I started interacting, I made plenty. Overall class is pretty good, sometimes too much chaos especially on grades 4-5 otherwise it's ok. Camp is fun and is great if you like team building. (which I do) The obstacle course was also fun and very tough. (that's why it's fun)

#### Putthihada

Next, is the events. Some of the events were: Fun and Food Fair, World Water Day, field trips, ect. But my favorite event is the Fun and Food Fair because there are a lot of games to play and prizes. Last but not the least, ASPs! (after school activities) Overall, it's good but sometimes I get placed with little kids which are both good and bad. Because they misbehave (some do not) and some are just helpful. Ok, enough with the kids, back on topic. My favorite ASP is CHESS Advance and beginners (when I was younger) Thank You.

My AITIS experience has been a fun journey for me. It is a fun year filled with new challenges, making new friends, and learning new and valuable lessons. Looking back to when I joined the school, I can say that I have grown and learned new things.

**Veohm**

At the start of the year, I felt very nervous because I just came back from Nepal. The subjects became more challenging. The most challenging were math and science. But my teachers were there to help us so it was easier. My favorite class was Reading because we got to read fun new stories. Social Studies was also fun because we got to learn so many things, like Mesopotamia, Early Egypt, WWII, and more. Group projects were also fun. They also taught us how to work as a team.

I also enjoyed art class. It was fun to draw new things and express my creativity through drawing. I am also in the Soccer Club, which helps me stay active and build team spirit.

These activities made school more exciting and also let me make friends that have the same interests.

One of the main lessons that I learned this year was responsibility. Managing my homework, keeping up with assignments, and staying organized wasn't always easy, but it helped me to become more responsible and independent.

Today, I will tell you about my experience at AITIS. I first joined in 1st grade semester 2. I was really shy at first because I don't really socialize with other people. There is one memory of mine that I remember. We needed to put 5 verbs in the column and I needed to put the 3rd word. I could not think of any, so I cried. My groupmates comforted me and that's all I remember.

In 3rd grade, I started to socialize with other people. The nice teachers gave me confidence to speak up and raise my hand. But then, Covid-19 came and we had to learn online. Doing classwork online was kind of difficult.

After Covid faded down, we came back to learning at school. In 4th-5th grade, I became more responsible and confident and made a lot of friends.

Our school is not massive but not small. The school turned their left over land and turned it into a Soccer field. We loved playing soccer every lunch time. Every year, our school sets up events like talent shows, UN Day, Annual Day, and more. Right now, I am in 6th grade and I am close to finishing school. This has been the best school I've experienced yet and I will miss AITIS forever.

**Surat**

Hello everyone. Today I will be telling you about

My experience in AITIS. I first joined the school in Pre-k. I was always crying, but after 2-3 months I stopped.

I didn't really have friends, I was a shy kid at first I

had my first best friend during KG, his name was Ron. Ron and I both liked dinosaurs. We also liked playing with legos.

Since we both liked the same things, we combined them together.

and started making dinosaurs out of legos.

Ron and I always made lego dinosaurs everytime we have free time. We always gave each other letters every time there was work, about writing a letter to your best friend.

During grade 2, I decided I didn't want to be friends

with him, I became friends with Surat.

Ron, Surat, and I Played fake fighting during lunch time a lot. During grade

3. I became best friends with Ron again.

It was like nothing happened. Nothing major happened during grades 4 and 5.

During grade 6. I have a lot of friends

That is nice and helpful. I was very surprised about the fact that I managed to perform during a talent show.

Tongduangtham

I started learning here from G.1. When I first walked into AITIS, I couldn't speak English even a bit. I remember on the second day I got here, I was ignored. Since I couldn't speak English, I needed my friend's help. But they all ignored me, so I just sat there... My dad also told me that when I was in Grade One, I used to cry and beg to stay home, holding on for dear life in front of the rail in front of the class. But when I got in the class, I went quiet and just sat in my seat. I wonder why?

In grade two, I was improving. I can speak standard English now. It's still not as good, but it's still better than before. I also had a singing show with my friend Pornchanok... It was very cringe... In grade three, my English is now as good as my classmates. But my Thai went downhill. So that is maybe the reason why my dad is making me take Thai classes now....

But in grade four. I remember making random cap cuts videos with SOMEONE. It still haunts me today. And that same SOMEONE randomly got a business idea. The idea is to sell slimes. We got a very bad scolding, and I learned my lesson.

In grade 6 I improved my math and science. My personality has improved a lot. And I also fixed some mistakes I made in grade 5 with my friends.

So overall I feel like AITIS is a pretty good school. With great lessons and teachers. If not for the friends thing I would recommend this school with other people.

**Kirachchapach**

# VISUAL ART COMPETITION

AITIS art competition is a great motivation for students to create and showcase their best work / artistic skill. The competition has three (3) categories, sketching drawing design, painting artwork design, and Paper collage design that was held last April 9, 2025, at 12:45-2:45 with the theme "Nature View Design". There are 4 winners selected by the judge's, the first, second, third and fourth for each category based on the corresponding points of 50% in a total with the following rubrics criteria for judging.

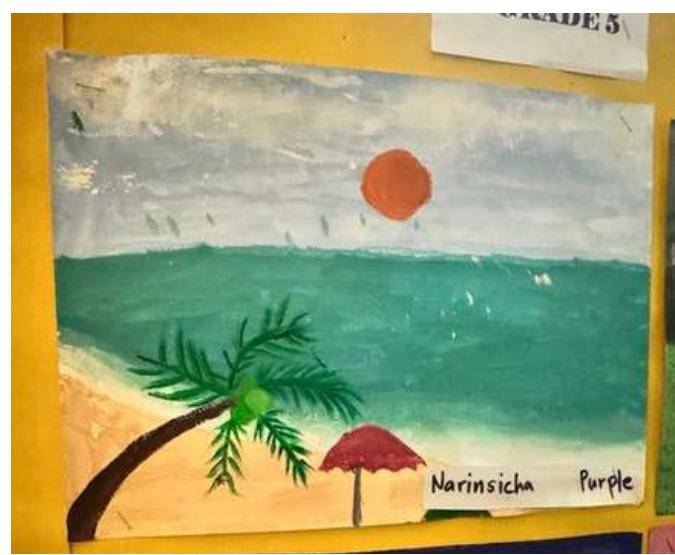

## Rubrics

Judging Criteria

Percentage rate

1. Interpretation and clarity to the viewer  
10 %
2. Creativity and Originality  
10 %
3. Quality of artistic and overall design  
10 %
4. Overall impression of the artwork  
20 %

**TOTAL**  
**50%**

The corresponding points of winners will be added to their Houses points and be announced at the end of this 2nd semester. The judging and selection process was done last May 5, 2025, by Mr. James and Mrs. Farzana, the selected work of winners was displayed on the assembly area.

## AI Workshop

AITIS along with Delegates from University Putra Malaysia arranged an AI workshop for Grade 5 on 16<sup>th</sup> May, 2025.

Students were divided into 3 tracks, i.e. 9 students per track. Throughout the duration of the program, students would sit in one track, and then students would be required to move to another track after 45 minutes. Each track had been designed to include at least 4-5 different fun, child-friendly activities.

There were also hands-on activities using cool tools like Generative AI, Quick Draw, and Teachable Machine to help students understand how AI works and how it can be used in real life. This session offered interactive demonstrations of Internet of Things (IoT) technologies and robotics through the use of Microbit, which provided the participants with hands-on experiences to better understand how IoT systems function and their practical applications in the modern world.

### Track 1: Artificial Intelligence and Internet-of-Things (Computer Lab)

This program is designed to introduce the exciting world of Artificial Intelligence (AI) and Internet of Things (IoT). AI is a part of computer science that focuses on creating smart systems that can think, learn, and solve problems like humans. Through this program, the students have been exposed to basic AI concepts exploration in a fun and interactive way.

- Activity 1: Introduction to AI and GenAI
- Activity 2: Quick Draw
- Activity 3: Teachable Machine
- Activity 4: Exploring IoT and Robotic World with Microbit

## Track 2: Immersive Realities: Bridging Virtual and Real Worlds (Canteen 1)

A hands-on program introducing virtual worlds, holograms, 3D stereoscopic visuals, real-world augmentation through a camera lens and creating simple games. Participants will be exposed to the basic concepts and tools related to immersive technologies, animation and also fundamentals of photography.

Activity 1: Exploring the Virtual World

Activity 2: Hologram

Activity 3: Magic Glasses

Activity 4: Real World Through Camera Lens

Activity 5: Draw, Flip, Wow

## Track 3: Security and Ethics (Canteen 2)

This program teaches how to stay safe online, how to protect their information, create strong passwords, and spot cyber threats like hackers. By the end, students will be equipped with the skills to navigate the internet securely and confidently. It also explores the ethical implications of artificial intelligence, focusing on fairness, transparency, accountability, privacy, and responsible AI development. Participants will examine real-world case studies, engage in discussions on bias and human rights, and learn best practices for ethical AI design and deployment.

Activity 1: Security in the Internet of Things' Environment

Activity 2: Cyber Security Awareness

Activity 3: Spot the Scam!

Activity 4: Ethics in AI

Activity 5: Human-Computer Interaction and Ethics

Students were very excited and enthusiastic during the workshop.

I joined the club two years ago. Every Wednesday for 10 weeks, my friends and I had fun learning together. Last semester, Ms. Megha told us we would perform Cinderella. We were so excited!

WEDNESDAY, MAY 2025

# AITIS DRAMA CLUB

BY: REINA SOFIA SHISHIDO  
GRADE 4A

**Teamwork makes the dream work.**

I love being in the Drama Club! We act, tell stories, and perform on stage. It helps us speak clearly, work as a team, and feel more confident. I like using my imagination and showing my feelings.

Last year, I was a little shy and played a small role as a caterpillar. This year, I felt braver and got the role of the Stepmother! We practiced our lines, hand movements, voices, and faces. Ms. Megha taught us that acting is not just talking — it's about showing feelings.

After the play, everyone clapped loudly. My friends and I held hands, smiled, and took lots of pictures. I felt so proud- not just of myself, but of all of us. We did not just say our lines - we really performed them, I guess!!

Before the big performance, we had a dress rehearsal and a final practice. The play was held at AITCC on June 5, 2025. AITIS students, parents, teachers, and guests came to watch. On the big day, everyone helped each other with costumes, make-up, and props. We were all a little nervous backstage, but once we stepped on stage, we forgot our fears. It felt magical to see how everyone transformed into their characters - from mice to coachmen, and from a pumpkin to a fabulous carriage! One of the best parts was when Cinderella's plain maid dress transformed into a sparkling gown, and when Prince Charming showed how he fell in love with her at first sight. The audience loved it and cheered with excitement.

Special thanks to Mrs. Janice, Mrs. Maylyn, Mrs. Marichu, Mrs. Rathna, Mr. James, Mrs. Hasmina, Khun Sunny, Khun Prangjit, Khun Nantaphan, Mrs. Vinita, Khun King, and Grade 4B for all their help and support in making this event a big success. We were also thankful to Mrs. Yemi, who gave us great advice. She reminded us that if there was a technical problem, like the microphone not working, we should stay calm, keep going, and stay in character.

And most importantly, we are so thankful to our teacher, Ms. Megha, who believed in us from the very beginning and guided us every step of the way. Drama Club made me more confident. If you love acting, you should join next year too! Come join us in the Drama Club!

TOGETHER WE ACHIEVED!!!

# HAPPY RETIREMENT

This year we say goodbye to three of our dear colleagues who are retiring. With grateful hearts we say "Thank You" for your contributions to AITIS.

Left to Right: Ms. Maybel Diopenes, Mr. Russell Rein, Mrs. Rathna De Silva, Mrs. Tran Thu Huong, Mrs. Sarita Pinthong, Prof. Pai-Chi Li, Mrs. Oluwayemisi Ayoola Thomas.

AS ONE CHAPTER CLOSES, ANOTHER STARTS,  
A NEW ADVENTURE, A BRAND NEW PHASE.  
WE'LL MISS YOUR WISDOM, YOUR HELPING HANDS,  
AND THE UNIQUE WAY YOU ADDED GRACE.  
MAY YOUR FUTURE BE FILLED WITH DELIGHT,  
WITH OPPORTUNITIES THAT SHINE SO BRIGHT.  
WE WISH YOU HAPPINESS, DAY AND NIGHT,  
AND MAY YOUR JOURNEY BE PURE LIGHT.  
FAREWELL, DEAR FRIEND, GO FORTH WITH GLEE,  
AND KNOW THAT YOU'LL ALWAYS BE REMEMBERED FONDLY.

Mrs. Tran Thu Huong  
Library Teacher – 30 years

Mrs. Sarita Pinthong  
Thai Language Teacher  
12 years

Mrs. Rathna De Silva  
Pre - kindergarten Teacher  
11 years

# Celebrating Cultures, Honoring Journeys: Pre-Kindergarten

AITIS Annual Day 2025-Shines with Global Pride  
By: Miss Mary

The day everyone had been waiting for finally arrived! Faces sparkled with excitement as each class reached a milestone they had worked on for nearly a month. From learning tiny steps to achieving perfect coordination and dressing up in vibrant costumes, every moment of effort led to a proud and joyful celebration. Our Annual Day 2025 was held over two days for the elementary section, themed One World, One Family. Each class took us on a colorful journey across the globe—no tickets needed!

From the delicate grace of "Mòlihuā: Jasmine Flower Dance" from China, performed by Pre-Kindergarten-2B, to the lively and spirited "Waka Waka" dance of South Africa by Nursery Groups A & B, the audience was taken on a joyful cultural journey.

Each performance, whether it was Sri Lanka's "Pandarin Iskoleta", the USA's playful "Cowboy Dance", or the colorful Filipino folk number "Una Una Kaya Kaya", reflected not only cultural appreciation but also the dedication and teamwork of students and teachers alike.

The program concluded with a vibrant Vietnamese "Fusion Hat Dance" and a high-energy Italian "Bella Ciao", performed by Kindergarten-B and Kindergarten-A respectively, leaving parents beaming with pride and joy.

Mrs. Oluwayemisi Thomas, Principal of AITIS, expressed her heartfelt gratitude, commending the efforts of every child, teacher, and parent who contributed to this beautiful celebration.

As the applause fades and the costumes are packed away, one thing remains certain: the spirit of AITIS continues to grow stronger, year after year, child after child.

# Elementary Annual Day By: Mrs. Zarish

The much-awaited Annual Day arrived with joyful faces and proud hearts. After weeks of rehearsals, students finally took the stage—dressed in colorful costumes and performing in perfect harmony. This year's theme, One World, One Family, came to life over two days of celebration.

## Day 1: Grades 1-3

Our youngest stars kicked things off with energetic and vibrant cultural dances, warmly hosted by Mrs. Anushree. Their performances were a beautiful window into global traditions.

A special moment was the heartfelt tribute by our Principal, Mrs. Oluwayemisi Ayoola Thomas, to our retiring teachers—Mrs. Houng, Mrs. Rathna, and Khun Sarita—for their decades of devoted service.

## Day 2: Grades 4–6 & Grade 6 Graduation

The second day began with the Grade 6 Graduation Ceremony, featuring inspiring speeches, a touching performance “Dreams We Hold,” and a nostalgic presentation “Down the Memory Lane.”

We once again honored our retiring teachers for their legacy of care and dedication.

Students of Grades 4–6 then brought the stage to life with powerful cultural showcases—each class taking us on a journey across continents through dance, music, and spirit.

Our principal closed both days with a heartfelt Vote of Thanks.

As the curtains fell, our hearts were full—with pride, memories, and the joy of celebrating as one big family. At AITIS, we don’t just educate—we celebrate life together.

# AMAZING ALUMNI

Hi! My name is Amy Chitnumsab. I attended AITIS between Kindergarten and 5th grade (2014).

Afterwards, my academic experience was quite unique as I went to multiple different schools: Bangkok Christian International School (BCIS) during 6th to 7th grade, Charter International School for 8th to 10th grade, and Emma Willard School in Troy, NY where I graduated from high school. I am now in my last year of college at Cornell University in Ithaca, NY.

It's been a wild ride adjusting to a new environment and meeting new people every few years. Although the constant change has been challenging at times, I believe that it helped me become an empathetic and adaptable person. I consider those to be my strongest traits today.

## Memorable experiences at AITIS

My most memorable experiences at AITIS were the dancing performances that we did for special events such as the Sports Day. On a particular Sports Day, most of the students performed to "Waka Waka (The Time for Africa)" by Shakira with pom poms. We did a lot of preparation from making our own pom poms to practicing our dance with our PE teacher, Mr. AJ. Performing the dance was the most enjoyable event out of the entire Sports Day. This was also a time when kids went through a dance craze after the release of the game "Just Dance", which likely resulted in us doing many more dance performances during the years when I was at AITIS.

## Current life/ Life after AITIS

I am currently finishing up my undergraduate studies in Statistics and starting my master's degree in Operations Research and Information Engineering at Cornell. I hope to pursue a career in data science, working on projects that use data and quantitative modeling techniques to answer business questions. I will be doing a graduate data science internship this summer in Boston at Liberty Mutual, an American insurance company. So, I am booked and busy for the next year. But, I'm excited for what's to come!

# Welcome to the School Counselor's Corner

## Parenting Kids Under Eight

Source: Hope Seed Edutainment Inc

Parenting young children is a crucial and challenging task that has a lasting impact on our future. The way we care for children under eight greatly affects the kind of adults they become and the values they hold. Without focusing on values like kindness and empathy, society could become more self-centered and materialistic.

### Challenges in Parenting

1. **Balancing Work and Family Life:** Many parents find it hard to spend quality time with their children due to busy work schedules. Without this attention, kids may not develop necessary emotional skills.
2. **Influence of Technology:** With so many screens around, children can get the wrong idea about what is important, like valuing fame over real friendships.
4. **Emotional Development:** Without proper guidance, children might struggle to understand their emotions and interact with others, leading to self-focused behaviors.

### Emerging Trends in Parenting

1. **Gentle Parenting vs. Boundaries:**  
While gentle parenting focuses on understanding emotions, it's important to also set clear rules to avoid raising entitled children.
2. **Materialistic Success:** Social media often shows wealth and fame as the goals, which can influence children to chase after these instead of meaningful achievements.
3. **Parental Anxiety:** The pressure to raise "perfect" kids can increase anxiety in both parents and children, making them feel insecure.

“Parenting is tough because it's the only job that matters every single moment.”

## The Importance of Parenting

Parenting is not only about meeting children's needs; it's about teaching values like kindness and empathy. If these values are neglected, society might focus too much on money and fame, losing sight of compassion and fairness.

### Actions Parents Can Take

1. **Model Values:** Show behaviors like integrity and kindness so children can learn by example.
2. **Encourage Play:** Activities that require teamwork and creativity can help kids develop empathy and problem-solving skills.
3. **Limit Screen Time:** Encourage real-world interactions to teach the importance of human connection.
4. **Teach Kindness:** Daily acts of kindness reinforce collaboration and gratitude.
5. **Create a Safe Space:** Support open communication to help children express themselves and develop emotional intelligence.

In summary, parenting children under eight is a profound opportunity to shape a more compassionate, balanced, and sustainable world. By prioritizing values over superficial success, we can raise a generation that places kindness, fairness, and humanity's collective well-being above fleeting pursuits of fame or wealth. If we, as parents, do not rise to this challenge, we risk perpetuating a society where money and recognition overshadow life's true meaning.

Let's do the hard but rewarding work now to ensure a brighter future for all.

# Creative Writing

**My School Year**

Name: Choojai

This year in school I did many things that made me happy.

First: I learned how to dance properly. It was very fun. I like to dance very much.

Next: I learned how to add numbers in math. I probably do it for homework.

Then: I learned how to read some words in the books. I read. It was so fun.

Last: I learned how to make new friends at school. So I can have lots of friends.

My family is very proud of me at home during my school year.

## I am a Black-Tailed Jackrabbit

by: Nattapa, Grade 3A

Hi, I am a black-tailed jackrabbit, and I want to tell you all about myself. I think it's important for people to know more about me, so I'm going to share details about my body, habitat, diet, adaptations, appearance, and life cycle.

I am larger than most rabbits. I have taller hind legs and longer ears than regular rabbits. I stand about 2 feet tall and weigh between 3 and 9 pounds.

I live in habitats like brushlands, prairies, and meadows. You can find me in places like the western United States and Mexico.

I am a herbivore, which means I eat plants. I am very selective about my diet and primarily eat grass. I also get the water I need from the plants I consume.

Some of my adaptations include being able to survive with very little water, blending in with my surroundings through camouflage, and having eyes located on the sides of my head. These adaptations help me avoid predators and survive in harsh environments.

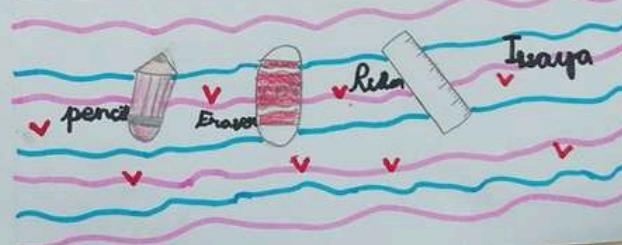

In terms of appearance, I am a large, long-eared hare with dark gray fur. My ears and hind feet are almost the same length.

I am born alive because I am a mammal. My life cycle starts as an embryo, then I am born as a newborn kitten. After about two weeks, I became a kitten that's ready to explore. I grow into an adolescent rabbit, then a young adult, and eventually, I reach adulthood. I can live for 1 to 5 years.

Now, here are a few fun facts about me! Black-tailed jackrabbits sometimes eat our own poop, which helps us digest nutrients better. We can run up to 40 miles per hour and leap as far as 10 feet in a single jump. And just to clear things up: We are not rabbits, we are hares!

To summarize, here's what you've learned about me: We black-tailed jackrabbits are mammals and herbivores. We typically live between 1 and 5 years, stand about 2 feet tall, and weigh between 3 and 9 pounds.

Well, that's all for now. See you next time! Bye!

## The Envious Squirrel

Mikail  
22 May 25

Once upon a time a squirrel lived happily inside a tree. Until one day an eagle built a nest on the treetop. The squirrel saw the eagle everyday. Each day he thought - If I had wings I could glide through the sky with my neighbor. One day the eagle had dinner with the squirrel and a bee. They talked about how yummy worms were. Squirrel told them about how he wished for wings. They were shocked because no squirrel has ever wished for wings.

One week passed and squirrel was watching TV. He was watching TV. He was watching a video called "How to Fly". The eagle in the video said "Just jump off a cliff and spread your wings or just keep them straight to glide". The squirrel moaned, "Uggghhh. If only I had wings!" He stopped watching TV and went to eat worms, his favorite food. He ate

angrily.

The eagle saw the squirrel and asked "Why are you angry?" "It's because I never get wings!" The squirrel answered. "Ok, but you can jump and land from the top of electric wire that are very tall. And now you want to fly?" asked eagle. "Yup" answered squirrel. "I'll give you a taste of how it is." "Yay!" said squirrel. Eagle puts squirrel on his back and flies to the point where water vapour condenses. It was very cold, and eagle shivered a little but squirrel shivered a lot. "I-I-I'm so-rry said squirrel." Eagle can you bring me down?" asked squirrel. "Ok" said eagle. Today I learned that we need to be thankful for who we are.

## The

By Varm, Grade 3B

Hello! I am a/an [REDACTED]. Try to guess the animal that I am! I am in the Felidae family and my scientific name is Leopardus Pardalis. Most people do not know about me, but you will if you keep reading!

My unique spotted coat that is different in every [REDACTED] helps me blend into the forest while I hunt. It has a relatively short tail when compared to house cats due to its larger size.

I eat small mammals, reptiles, fish, and some other animals. I live in continental American rainforests. I have many adaptations such as retractable but sharp claws/teeth, hunting alone while using special tactics and resting in trees/hidden dens. I am a medium sized yellow cat-like animal with black and/or brown spots.

A wow-fact: did you know that I do not chew my food the same way that humans do? Instead, I use my teeth to tear my food into small pieces and then swallow them whole.

I am quiet, nocturnal, and built for survival. I am hard to find, but now at least you know about me! Did you guess yet? I am an..... OCELOT!!

# Festivals of Today and the Middle Ages

by Reina Sofia Shishido  
Grade 4A

One of the festivals celebrated in Europe in the Middle Ages was May Day. May Day is celebrated on May 1st. It marks the arrival of spring and is a joyful festivity. Villagers dance around the maypole with colorful ribbons. A May Queen is chosen to wear a flower crown. Everyone enjoys singing, laughing, and having fun together in the warm and sunny weather.

On May Day, the warmth and sunshine of spring are celebrated. It's a time to enjoy flowers, growing plants, and new life. People dance around the maypole with ribbons, which symbolize happiness, nature, and unity in celebration of the beauty of springtime. Flowers and greenery were used for decorations.

If I were asked which activity from the Middle Ages I would enjoy the most—hunting, festivals, jousting, or music—I would pick festivals. I think festivals would be so much fun with music, yummy food, and dancing. Everyone would be happy and having a great time together!

Medieval festivals and modern-day celebrations are alike because both are times when people come together to have fun, eat special food, and enjoy music and dancing. During both times, people wear nice clothes and take part in games or shows. But they are also different. In Medieval Times, festivals were often about farming or religion, and people did not have bright, colorful lights or modern music. Today, because of technology, we have bright decorations and many kinds of food. Also, big celebrations now happen in big cities, while in the Middle Ages, they usually happened in small villages.

# Dog Hotel

By: Jirapat, Grade 4B

Bruce and Andi had just moved to a new town and weren't happy about it. Bruce was in sixth grade, Andi in fourth. They missed their old house—and most of all, their dog, whom they had to give up because their aunt was allergic.

Next door lived a boy named Jerry with a dog called Red Rover. One day, Red Rover ran straight to Bruce instead of following Jerry. "He likes you better!" Jerry laughed. Bruce wasn't sure what to think.

After school, Andi often imagined their old dog walking beside her. Then one day, a real dog appeared—white and small, sitting alone on their porch. Inside, Andi discovered three tiny puppies, curled up in a box. She was scared to tell anyone but finally confessed to Bruce. He didn't scold her—he smiled.

Together, they moved the little dog family into an empty house nearby. They brought food, made beds, and named it "Dog Hotel."

Red Rover later joined them, and soon, more dogs followed. Strays, lost pups, or just dogs needing love found their way there.

Dog Hotel became a quiet miracle—full of wagging tails, warmth, and love. A secret place where every dog could feel at home.

## Okapi: The Forest Giraffe's Life

Junjaachay  
GSA

The okapi is a rare mammal from the Congo rainforest and the closest relatives of the giraffe, which is why it's called the "forest giraffe." It has zebra-like tongue, and giraffe-like features. Unique for its shy nature and forest lifestyle, the okapi is the only other member of the Giraffidae family. Studying it helps with conservation, understanding ecosystems, and evolution.

The okapi has a dark brown body, white zebra-like stripes on its legs, large ear, a long neck, and a blue-black tongue. Its stripes provide camouflage in forest light, and its ears detect predators. Okapis are smaller, but share features like ossicones and long tongue.

The okapi lives in the Ituri Rainforest in the Congo, preferring dense, tropical forest. This habitat offers camouflage, food, water, and protection for predators.

The okapi eats leaves, fruits, and fungi, using its long tongue to grab food. It finds food with a strong sense of smell in dense forest.

Okapis are nocturnal and solitary, resting during the day to avoid predators. At night, they feed on plants and groom themselves.

# THE MYSTERIOUS ROOM

By Peerawich, Grade 5B

I was exploring a lush green forest with thick foliage, the sound of birds chirping filled the air, as a soothing breeze whizzed by, and the air was fresh. What an inviting place! Just then, I saw a big old dusty house with paint coming off. What a strange house! I wondered. So, I decided to go in.

It was eerily dark and quiet. As I dawdled, my footsteps echoed loudly. The walls were very rough and dusty. The air smelled moldy so I put on my mask. As my eyes adjusted to the light, I could see lots of things. There was a tall dusty bookshelf with a few books—an old fireplace with no wood in it. I explored further, and there was a light switch. I switched it on and a dim orange light appeared from a light bulb hanging from the ceiling. Now, I saw there were lots of bugs everywhere. There were ants on the floor and walls, worms coming out of cracks barely noticeable. Other than that, it was mostly empty.

I decided it was time to leave. I switched off the light and said farewell to the old house. In the forest, I rushed back home with something to tell.

# SUMMER SCHOOL

AITIS Summer Fun

AITIS had a fantastic two-week summer school, and Teacher Joyce and I were so excited to lead Group 1. Our summer class lasted ten fun-filled days with 20 enthusiastic and energetic kids from Nursery to Pre-K 1.

In the first week, we explored the theme "Under the Sea," and for the second week, we dove into "Community Helpers." The kids absolutely loved our morning exercise routine, which we kicked off each day, followed by a variety of outdoor activities. It truly turned into an amazing summer adventure for everyone!

We packed our days with all sorts of engaging games that the children jumped into with both feet, along with role-playing activities that included both the teachers and the kids. The cooking sessions were definitely the highlights—who wouldn't love popping popcorn and making pancakes. Watching the children perform the "Under the Sea" song was another joyous moment; they gave it their all, and it was heartwarming to see their hard work shine.

All in all, it was a wonderful two weeks of summer school, overflowing with laughter, joy, and priceless learning experiences for everyone involved!

By: Mrs. Janice

Group 1

## IMPORTANT GROUP 2 SUMMER CLASS BY: MRS. SHANDHINI

The summer camp, held for two exciting weeks, was created to help students explore their creativity, build confidence, and form friendships in a fun and nurturing environment. Group 2, named "Baby Shark," consisted of students aged 6 to 7. The group included a mix of new and old students, providing a wonderful opportunity for the newcomers to become familiar with the school community. The camp featured a variety of engaging activities. The students participated enthusiastically in each session, and an engaging theme was followed for every activity. The Baby Shark group had a joyful and enriching experience and set a positive mindset for the upcoming school year.

## GROUP 3 SUMMER CLASS

By: Maylyn Shishido

On the final day, Group 3 wowed everyone with a mini drama performance of The Ants and The Grasshopper, showcasing their teamwork, acting, singing, and dancing talents. The program concluded with an adventurous rope course that tested their courage and stamina.

Thanks to strong teamwork among teachers, flexible planning, and a focus on student needs, our summer class was a memorable and successful experience.

AITIS held an exciting two-week summer school, and I was thrilled to be one of the persons in charge of Group 3. Our class of 25 enthusiastic students from Kindergarten to Grade 4 enjoyed a fun-filled program packed with interactive, hands-on learning. Each day began with energizing yoga and zumba, followed by engaging active reading sessions featuring human bingo, riddles, Simon Says, a word guessing game and skit rehearsals.

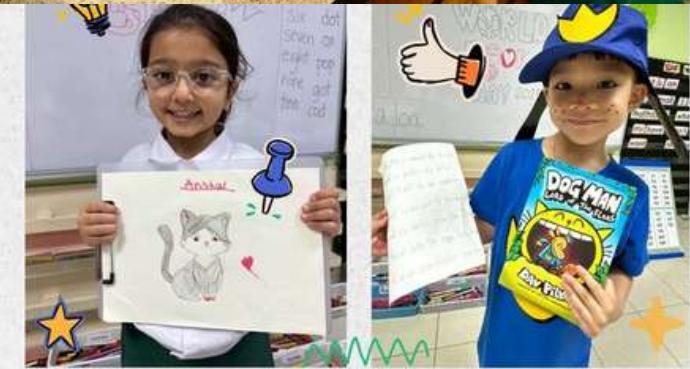

Students were also overjoyed by the 3D films and the Inside Out movie, complete with popcorn. One of the highlights was our pancake-making session, where kids had fun flipping pancakes and decorating them with tasty toppings. They also explored their creativity through art and crafts and had the opportunity to connect with nature during refreshing and mindful nature walks.

Thank You
