

KINETICS ISOMAX ISOLATION CLIPS

Soundproof Walls and Ceilings

KINETICS ISOMAX CLIPS ALLOW YOU TO "FLOAT" WALLS AND CEILING AT THE LOWEST POSSIBLE COST

FOR MAXIMUM SOUNDPROOFING DECOUPLING IS THE SINGLE MOST IMPORTANT FACTOR

Kinetics IsoMax Clips are the easy and economical way to decouple your wall and ceiling to increase performance without the cost of staggered or double stud wall construction. Benefits include higher STC and IIC results at a lower installed cost and elimination of short circuit risk.

Kinetics IsoMax Clips dramatically improve the soundproofing of any wall or ceiling.

Privacy between spaces has become the #1 customer requirement in multi-family, commercial mixed use, and even luxury home projects. People now expect peace and quiet in the home and workplace.

Average performance will not be acceptable in most cases; minimal construction is a thing of the past. Sound Isolation Company has the right products and the expertise to make the creation of privacy a simple, reliable practice with no guesswork.

Soundproofing a ceiling or wall has never been so cost efficient or simple. You won't need any exotic sheetrock or tools. Installation is no different than what is being done already; the real difference is that this method provides a true quiet solution.

How & Why Sound Isolation Clips Work

Kinetics IsoMax Clips break the mechanical connection. Sheetrock is attached to the channel, not the structure; measurable low frequency noise blocking requires this "float". A one-inch larger airspace, filled with standard fiberglass insulation adds to the STC performance at all frequencies. Kinetics IsoMax Clips are attached with drywall screws. Locally available 7/8" hat channel, off-the-shelf sheetrock, mud and tape are the only materials you need to complete the job.

Benefits of Kinetics IsoMax Clips

- ▶ Used with everyday building products, which are available locally at your home center.
- ▶ Better performance and lower installed cost than any other soundproofing product.
- ▶ No need for double stud, staggered stud, or double wall assemblies.
- ▶ No chance of short circuits that are commonly found in resilient channel installations.
- ▶ Available for immediate shipment to your jobsite.

Lab Tested Assemblies:

Wood stud partition, 2x4 16" O.C., R-19 insulation, and one layer of 5/8" gypsum on each side. Sound Isolation Clips and 7/8" hat channel on one side.

Double drywall on the Sound Isolation Clips side improves your sound isolation performance by 25%.

Double drywall on both sides will outperform double wall construction. Saving material cost, labor and sellable sqft.
