

RESILMOUNT

SOUND ISOLATION SOLUTIONS

PROVEN, RELIABLE SOUND CONTROL
COST EFFECTIVE SOLUTION FOR WALLS/CEILINGS
MULTI-FAMILY, SINGLE FAMILY, HOME THEATER

Install on metal using #10 x 1 5/8" self-tapping screw

Use with 7/8" or 1 1/2" furring channel

Model A237R

Unique patented thermoplastic rubber with sound cell design

Sound Isolation Company and Studco Building Systems have released a new range of patented sound isolation products for your walls and ceilings.

Acoustic control for airborne sound has become a major issue for architects and interior designers for high density apartment living, condos, townhouses, studios & theaters.

Resilmount soundproofing clips are compatible with standard drywall furring channel available locally. The common practice of using metal channel to improve wall and ceiling STC is dramatically improved with Resilmount by at least 7 STC points. Resilmount clips are the most cost effective noise control system because they isolate the structure from the interior partition.

US Distributor of all Resilmount Products

- ▶ Dead load 55 lbs each clip (max)
- ▶ Spacing of clip is 48" o.c. (max)
- ▶ Simple installation with screws or masonry anchors to any substrate.
- ▶ Use with 7/8" or 1 1/2" furring channel

Nationwide Distribution of Resilmount Clips

RESILMOUNT A96R

- Specialty brackets available for large project, with short lead times
- Model A96R offers a minimal drop in ceiling construction; as little as 1/4"
- Elimination of both airborne (STC) and footstep (IIC) noise is provided by Resilmount clips
- Achieve Luxury Ratings for your project, all in one easy step

Clips are available for pick-up or shipment from:

New York City, NY
Charlotte, NC
San Francisco, CA

KINETICS ISOMAX ISOLATION CLIPS

Soundproof Walls and Ceilings

KINETICS ISOMAX CLIPS ALLOW YOU TO "FLOAT"
WALLS AND CEILINGS AT THE LOWEST POSSIBLE COST

FOR MAXIMUM SOUNDPROOFING DECOUPLING
IS THE SINGLE MOST IMPORTANT FACTOR

Kinetics IsoMax Clips are the easy and economical way to decouple your wall and ceiling to increase performance without the cost of staggered or double stud wall construction. Benefits include higher STC and IIC results at a lower installed cost and elimination of short circuit risk.

Kinetics IsoMax Clips dramatically improve the soundproofing of any wall or ceiling.

Privacy between spaces has become the #1 customer requirement in multi-family, commercial mixed use, and even luxury home projects. People now expect peace and quiet in the home and workplace.

Average performance will not be acceptable in most cases; minimal construction is a thing of the past. Sound Isolation Company has the right products and the expertise to make the creation of privacy a simple, reliable practice with no guesswork.

Soundproofing a ceiling or wall has never been so cost efficient or simple. You won't need any exotic sheetrock or tools. Installation is no different than what is being done already; the real difference is that this method provides a true quiet solution.

How & Why Sound Isolation Clips Work

Kinetics IsoMax Clips break the mechanical connection. Sheetrock is attached to the channel, not the structure; measurable low frequency noise blocking requires this "float". A one-inch larger airspace, filled with standard fiberglass insulation adds to the STC performance at all frequencies. Kinetics IsoMax Clips are attached with drywall screws. Locally available 7/8" hat channel, off-the-shelf sheetrock, mud and tape are the only materials you need to complete the job.

Call now to soundproof your wall/ceiling.

Floated Ceiling Assembly

Multi-Family, Commercial and Residential Floor/Wall Assembly

Benefits of Kinetics IsoMax Clips

- Used with everyday building products, which are available locally at your home center.
- Better performance and lower installed cost than any other soundproofing product.
- No need for double stud, staggered stud, or double wall assemblies.
- No chance of short circuits that are commonly found in resilient channel installations.
- Available for immediate shipment to your jobsite.

Lab Tested Assemblies:

Wall Assembly 1 - STC: 57

Wood stud partition, 2x4 16" O.C., R-19 insulation, and one layer of 5/8" gypsum on each side. Sound Isolation Clips and 7/8" hat channel on one side.

Wall Assembly 2 - STC: 61

Double drywall on the Sound Isolation Clips side improves your sound isolation performance by 25%.

Wall Assembly 3 - STC: 64

Double drywall on both sides will outperform double wall construction. Saving material cost, labor and sellable sqft.

Masonry Walls Assembly

Sound Isolation Clips are the best value for proven, reliable soundproofing results in any wall or ceiling application. Call us today for a quote on your job (888) 666-5090
