

Increase your Information Technology Intelligence

Managed services by IQ Technology make your business run smarter.

"IQ performs, they live up to their promises and they never over promise. They have a good process that allow the customer to understand the work being done and ensures that the customer is satisfied."

Mathew Woodring
IT Manager

At an affordable fixed monthly fee, IQ Technology Solutions' (IQ) team of over 30 experienced consultants, engineers and support staff help businesses just like yours get the most return on their IT investment. We can help you optimize your existing systems, and upgrade your infrastructure to deliver the speed and efficiency your operations require.

Services include:

- IT Strategy
- Reactive Service and Support
- Proactive Maintenance and Administration
- IT Operations and Service Management

Your Virtual CTO

Top IT talent is expensive – and beyond the means of most small and mid-sized companies today. Tight budgets and aggressive cost controls have left many

companies without dedicated IT leaders on staff to chart their strategy and run their infrastructure. Because of that critical shortfall, many business managers are looking for external consultants who can provide IT services at sharply lower costs.

Managed technology services from IQ provides the IT support your business needs at a fraction of the cost of hiring your own Chief Technology Officer, and without growing an internal technology team. IQ structured approach to strategy, operations, and technology alignment lets organizations better leverage their information technology and human resources. And, our investment in the tools, processes and personnel results in a true managed service solution that helps customers achieve new levels of productivity, communications, security, and profitability.

Nevada's Gold-Level IT Partner

For more than 18 years, IQ has developed and deployed cost effective, reliable, and secure computer networks and IT services for customers across Northern Nevada. We have installed hundreds of server systems, networks, and desktop computing solutions and provide continuing support for leading technology brands.

- High level partnerships with Symantec, Cisco, Citrix and many others
- One of the first Sonicwall partners in Northern Nevada
- HP Gold Partner
- Only VMWare Enterprise Partner in Northern Nevada
- Microsoft Competencies:
 - Silver Hosting
 - Silver Midmarket Solution Provider
 - Small Business Specialist Community
- Cloud Champion Partner
- Only Elite Axcient Partner in Northern Nevada

Make IQ your IT professionals

IQ's professional services team includes practice professionals from disciplines including development, security, remote access, infrastructure, IP telephony, multi-site implementations, and communication solutions. Our approach is to assess your requirements, design a solution, develop

the project, then manage and support the implementation. This is always accomplished using a consultative approach with a focus on defining the return on investment and driving towards increased levels of productivity, communication, and business intelligence.

Reno's HP Server Specialists

As an HP Solutions Partner, IQ is your local source for HP ProLiant servers. New HP ProLiant servers replace outdated legacy hardware with the advantages of a modern processing architecture. The ProLiant family doubles the performance of previous server generations and adds a wide range of innovative features that help you gain more value out of every IT dollar.

- Consolidation ratios of up to 20:1
- Up to 95% fewer servers
- Up to 97% lower power and cooling costs
- Up to 300% increase in data center compute capacity

IT Strategy

IQ helps align your IT resources and operations to your business plan. We focus on IT with a catalog of services and strategic assets that have previously only been available to larger organizations. Our investment in robust reporting tools, industry standard processes, and dedicated employees helps drive your business success.

Proactive Maintenance & Administration

IQ's Structured Technology solutions enable our technical staff to transparently manage and support your essential IT services. Through proactive remote monitoring and system health tracking, we can identify trends and address potential issues before they become problems. And when the inevitable interruption arises, our technicians respond quickly and maintain the reliability of your IT resources.

Reactive Service and Support

IQ Managed Services makes us your IT staff, always on call to assist employees, manage IT incidents, and keep your systems running. We can also support mobile workers, field offices, and cloud services for your business. Our fixed monthly fee model provides predictable budgeting for help desk support and resolution of issues.

IT Operations & Service Management

IQ provides the reporting, compliance, budgeting and strategic consultations that every organization needs. We manage incident tracking, service catalog and site guides so our team always has the details they need to service your environment. These tools and services help drive productivity, business intelligence and profitability that set you apart from the competition.

Get the IT support your business needs

Top-tier IT support for your organization begins with top-level attention from IQ. Receive a complimentary one-hour consultation with IQ's CEO Steve Cerocke to discuss your current business situation and goals for business growth. Gain a first-hand understanding of how Steve and his team can help you execute your business plans with reliable computing services.

Schedule your complimentary one-hour strategy meeting today.
