Our Mission:

We support and protect the dynamic owners of growing businesses allowing them to scale by providing Stable, Secure and Scalable IT Services & Solutions.

We aim to be the first choice as a Trusted IT Partner for these businesses on the North Shore & Auckland

Cybercriminals Are Out In Full Force In Today's Crazy Times – Here's How To Stop Them

In the past couple of months, just about everyone has been forced to shift priorities. If you're like many business owners, you are intently focused on pivoting your business to accommodate today's "new normal." In fact, you are probably investing so much of your time in trying to retain your customers and generate new cash flow that you barely have time to even *think* about cyber security.

The problem is that cybercriminals and hackers know there's no better time to strike than during a global crisis. In fact, they're probably working overtime to craft new malware while the rest of us are trying to manage how our lives have been turned upside down. While you are so focused on your business, these cyber thugs are finding new ways into your IT network so they can steal

data and passwords, compromise your clients' private information and even demand large ransoms.

Cybercrime is already on the rise and is expected to cause \$6 *trillion* in damages by 2021! But, if history repeats itself, you can bet hackers are already out in full force right now. We've already seen how headlines are changing from stories about COVID-19 to accounts of a frenzy of cyber-attacks on corporations and small businesses.

Here are solutions you can implement during these crazy times to help protect your business data, money and productivity:

1. Be more suspicious of incoming e-mails. Because people have been

Client Spotlight

Like all small businesses, the Accounts on Call team are doing what we enjoy and understand best. We appreciate the overwhelming demands of business and strive to assist other small businesses to realise their potential by providing valuable bookkeeping and administration support

Timely and accurate information is key for small businesses to improve efficiencies and grow. While bookkeeping does not generate income for a business it is an essential element when needing to make valuable decisions and maintain your obligations with the IRD. Our focus is to provide solutions which fit the customers needs and streamline their processes with the aim to provide accurate and informative information.

Think On The Known, Not Just The New

Neophilia is an obsession with new things simply because they're new - not necessarily better or improved - or novel. It makes people stand in line overnight for the newest technology release or scour the Internet to find the latest and greatest product, trip or experience.

We often read books and attend seminars to find new things to ponder. Sometimes the influx of new information and ideas is so rapid that we don't use what we've learned or integrate it into our behavior.

So, what if we thought about the important things we've learned or responded to questions we already know we should answer? What is known but not recalled or revisited can shape and improve your life.

Think about these knowns:

Things you think you know because somebody told you? Think independently.

Things you don't visit because they can be frightening? Be courageous.

Things you've only thought about

superficially? Go deeper.

Things you'd like to do? Dream a little.

Things you've stopped doing that used to bring you joy? Revisit them.

Things you need to know? Learn them.

Things related to your values and worldview? Live them.

Things that would improve your health and longevity if you consistently did them? Do them.

The Bible says in Philippians 4:8, "Think on these things," and then lists known and timeless things - what is right, what is true, what is lovely and what is pure. Nothing new in the list, but everything is worth thinking about often and deeply.

Sometimes the known is as valuable - or even more valuable - than the new.

Mark Sanborn, CSP, CPAE, is the president of Sanborn & Associates, Inc., an "idea studio" that seeks to motivate and develop leaders in and outside of business. He's the bestselling author of books like *Fred Factor* and *The Potential Principle* and a noted expert on leadership, team building, customer service and company change. He holds the Certified Speaking Professional designation from the National Speakers Association and is a member of the Speaker Hall of Fame. 4 Ways To Grow Your Business Without Working Harder

Incentivize Results - According to the Journal of Economic Psychology, people love cash incentives but are often more motivated by specific noncash rewards. It could be time off or lunch for a week. All you have to do is tell your team what results you want, offer a creative incentive and, chances are, those results will be met!

Prioritize Time - Use the "80/20 rule" as a guide. Also known as the Pareto principle, it states that 80% of the effects come from 20% of the causes. Going by this principle, 20% of your time spent on tasks should yield you 80% of the results. If you have to put in more effort to achieve results, reevaluate your approach (or take on fewer projects).

Evaluate Technology - Are you using outdated technology and software? You could be slowing your business down and harming

productivity - not to mention putting your business at serious risk of data loss or a data breach. Look at what you're using now and compare it to what's on the market. There have been major improvements, even in the last five years, that can boost productivity like crazy.

Open Communication - Open-door policies go a long way. Have weekly team meetings and a company-wide chat (such as Slack or Google Hangouts). The easier it is for individuals and teams to communicate, the easier it is for them to collaborate, and that can help things move very smoothly. *Inc., Feb. 13, 2020*

3 Ways Successful People Turn Adversity Into Success

1. They say, "Bring it on." They want adversity. It's what helps them grow. Without adversity or something pushing back at us, we can stagnate. We need to be challenged!

2. They make bold decisions. Successful people make decisions knowing they may be taking on a lot of risk, but if they don't push ahead, they won't get the results they want. And if they make the wrong decision, it's a learning experience.

3. They embrace the learning experience. You can't grow and find success without continuously learning. You have to solve problems and collaborate with others, so when the next challenge comes along, it's easier for you to adapt. *Business Insider, Feb. 13, 2020*

Use These Apps To Get More Done Each Day

Productivity: Evernote - Take notes, clip info from the web and save select e-mails for quick access and organization.

Time Tracking: RescueTime - It gives you a breakdown of how you use your time on every app and website. It also allows you to set productivity goals. The premium version (\$6/month) even lets you block sites during certain times.

Project Management: Asana - Create task lists, prioritize tasks, assign due dates and monitor progress. Asana even integrates with other apps, like Evernote and Google Drive.

Communication: Slack - Communicate with individuals, teams or other specific groups. Everything is saved, so you'll never lose a key piece of info. *The Simple Dollar, Feb. 3, 2020*
