Through The Porthole

Lionfish aka Turkeyfish (*Dendrochirus zebra*)

The Lionfish, aka Turkeyfish, is an invasive species in U.S. Southeast and Caribbean coastal waters. Lionfish are carnivorous fish native to the Indo-Pacific. They have the potential to harm reef ecosystems because it is a top predator that competes for food and space with overfished native stocks such as snapper and grouper. In the U.S., the lionfish population is continuing to grow because they have no known predators and reproduce all year long.

Events

Founders 2017

Over 200 guests attended SeaKeepers annual Founders on November 2nd to honor the 2016-2017 DISCOVERY Yacht Fleet. Thank you everyone who made Founders 2017 such a success!
