Call this number will put you in a better place tomorrow. immediately. The list goes on, and it can be pretty extensive. This, again, is why it's so important to work with an MSP.

They've already put together plans for other SMBs, and they know where to start when they customize a plan with you.

### Invest In Security And Backups.

While every business should have network security already in place, the reality is that many don't. There are a ton of reasons why (cost concerns, lack of time, lack of resources, etc.), but those reasons aren't going to stop a cyber-attack. Hackers having reliable IT security in place is more important than ever don't care that you didn't have time to put malware protection before. on your PCs; they just want money and to wreak havoc.

malware software, strong passwords and a company-wide IT security policy, you put your business and all your employees in home going into 2021,

"When you have IT security in place, including firewall protection, malware software, strong passwords and a company-wide IT security policy, you put your business and all your employees in a much better place."

On top of that, you should have secure backups in place. When you have IT security in place, including firewall protection, Investing in cloud storage is a great way to go. That way, if anything happens on-site or to your primary data storage, you have backups you can rely on to restore lost or inaccessia much better place. All of this should be in place for both on-site ble data. Plus, having a solid cloud storage option gives employees and remote workers. With more people working from remote employees ready access to any data they might need while at home or on the go.

### Where Do You Begin?

Some SMBs have the time, money and resources to invest in on-site IT personnel, but most don't. It is a big investment. This is where partnering with an experienced IT services firm can really pay off. You may have employees in-office or you may have a team working remotely – or you may have a mix of both. You need support that can take care of everyone in your organization while taking care of the data security of the business itself. This is where your IT partner comes into play. They are someone you can rely on 24/7 and someone who will be there for you during a pandemic or any other disaster.

# This Valentine's Day

We Have 2 Gifts Reserved For You

Finally, Valentine's Day gifts that won't make you fat or give you cavities! During the entire month of February, we're having a special event for all of our clients (new and old) to show them a little love and appreciation.

- 1. A FREE Gift and Goodie Bag (\$100 Value). Call us for anything during the month of February – a repair, an upgrade, or even a quote on a project – and we'll give you a free Valentine's Day Gift and Goodie bag chock-full of useful, interesting and fun
- 2. A FREE Network Audit (\$297 Value). Are you worried about viruses, spyware, and hackers? Are you uncertain about how safe your data is? Would you like to know for sure if your back-ups are really working?

Then contact us during the month of February and we'll give you a FREE Network Audit (\$297 value) to conduct a thorough investigation into your computer network to look for early warning signs of data loss, extensive downtime, viruses, hacker attacks, and other hidden threats to the safety of your data.

> Contact us today to claim one or more of your FREE gifts! Phone: (949) 396 1100 Web site: www.CyberTrust-IT.com

### Shiny New Gadget Of The Month:

FitTrack: A Revolutionary Scale Lets You Look **Inside Your Body** 

Right now, countless people have gotten lax on their New Year's resolutions and given up on their goals. One of the most popular resolutions is to get fit. It is also one of the most challenging ones to see through to the end. The FitTrack smart scale is here to make that a little less challenging!

FitTrack has earned its designation as a smart scale. It does much more than tell you your weight. With a number of other sensors, as well as data you input into the FitTrack app, it can tell you all sorts of things. Yes, it will tell you your weight, but it will also tell you things like body mass index, muscle and bone mass and hydration levels, to name just a few. In total, it can track 17 key health insights.

As you work toward your fitness goals for the year, don't miss out on a companion that will give you crucial data along your fitness journey. Discover more about FitTrack at bit.ly/2VOg7Vs.

## **Production Vs. Connection – The Ailment And The Cure**

Recently, I had what we like to call an "aha" moment while listening to a sermon one Sunday. The minister made the observation that our society as a whole has swung to the extreme side of productivity at the expense of our connections. It hit me that this is one of the greatest ailments we see as coaches with our member companies and leaders, especially as of late.

### **Culture** → **Appreciation** → **Connection**

We know the best-performing companies So, Now What? are those that devote significant effort to creating a culture that their team members have it right when we help our companies want to be a part of. And where does that culture come from? People crave appreciation in the workplace and we're talking sincere, heartfelt appreciation, not the casual "pat on the back" or quick "thanks" in pass- be equally intentional in both areas to create ing. Real appreciation only occurs if there is a the life you want, which involves real connecreal connection between people. Connection tions to who and what we love. is valuing the other person more than yourself or having an "others first" mindset. It It's time to swing the pendulum back, ease off takes effort, vulnerability and emotion. True culture cannot exist without both of these key elements.

#### The Ailment

Unfortunately, in our "all about me" culture, betterment - both personally and professionconnections tend to be shallow and unemo- ally. tional. It's not what can I do for you, it's what Gee, maybe there's really something to the can you do for me? As a society and in busi- old Golden Rule thing. ness, we have become so laser-focused on overachievement and beating the competition that our connections receive little attention. Especially today, when companies are striving to get back on their feet, push out new offerings and make up for lost time from the pandemic, connections are starving due to the demands of winning.

#### **But At What Cost?**

There have never been higher instances of job discontentment, disconnected families, depression, suicide and overall lack of joy. Our extreme focus on production and achievement has come at a huge cost to society. Extremes at either end of the pendulum never end well.

Back to our coaching perspective, I think we focus on culture by viewing their team members as human beings and not just a means to productivity. In addition, we all know that you cannot truly separate the business side from the personal side and that you have to

the production pedal and give more attention to treating each other with compassion and putting others first. It may seem strange, but the companies that have done this well typically outperform on the production, too, because connection is a great motivator for

# Tip Of The Day

**Perform A Security Risk** Assessment At Least Once Annually!

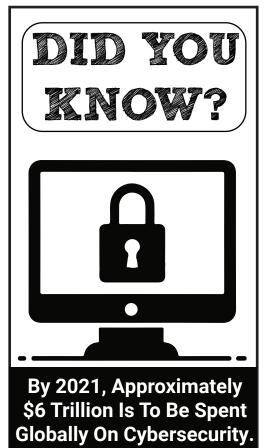

# ■3 Ways To Protect Your Data During COVID-19

### 1. Manage Your Passwords.

You've heard it before, and you'll hear it again – one of the best ways to keep intruders out of your data is to lock it behind strong passwords that are updated every 60 to 90 days. Use passwords that are a mix of letters, numbers and special characters. Make passwords long and confusing.

- 2. Secure All Data. Who are you sharing your data with? Do former employees still have access? What about former clients? Take time to see who has permission to access your network and data. While you're at it, clean up old or useless data that may be just taking up space. When you know what data you're saving and who has permission to access that data you can better protect it.
- **3. Adopt Best Practices.** When was the last time your team received IT security training? Never? Five years ago? It's time to get back on it. Train your team on the latest cyber security threats and how to handle them. Then, adopt best practices so your team knows what to

do when they receive a phishing e-mail or there's a threat to your network. Inc., Nov. 20, 2020

## Confidence Is Key: How To Self -Pr omote For Greater Success

We often don't like to talk about ourselves. But there are many times when it is important to talk about yourself and to convey your accomplishments. Maybe you're applying for a new position within your organization, you're trying to establish a partnership with another company or you want to expand your professional network. Either way, here are a few ways to self-promote without sounding like a brag.

Lean Into Your Expertise. Call on your experience. If someone is dealing with an issue you're familiar with, walk them through it. Or, take on the role of mentor with others in your organization or community.

Be Receptive To Feedback. This is how we grow. Listen to what people have to say and respond by taking action. Make adjustments as they make sense. When you receive positive feedback, accept it graciously.

**Emphasize "Together."** Don't make things just about you. Share credit when it deserves to be shared. Be a supportive and motivational voice. Uplift others. Forbes, Nov. 23, 2020
