

NC State University Student Health Center

- This project included the addition of 22,943 SF and the renovation of the existing 27,000 SF building of the Student Health Center on NC State University's Central Campus.
- The 2-story addition with a mechanical penthouse includes medical clinics, waiting areas, offices, conference rooms, a classroom and other miscellaneous medical and service spaces.
- The renovation also included a pharmacy. Both the addition and renovation included architectural, plumbing, mechanical, electrical, fire protection, telecommunication, and security disciplines.
- This project had a planned U.S.G.B.C. LEED Silver™ accreditation goal. With the help of the entire team, we achieved the first LEED™ Gold accredited project on the NC State University campus.
