So Long, Phone Company. Hello, CleanVoice.

Why would you pay more for less? Your phone company wants to charge you hundreds of dollars every month for business lines which are anchored to your desk. With **CleanVoice from Braver Technology Solutions**, you have the freedom to use your business phone system virtually anywhere you want, for a fraction of the cost.

What is VOIP?

CleanVoice uses **VOIP technology** to provide superior communication capabilities for your business.

VOIP (Voice Over Internet Protocol) is a communication system that allows you to make phone calls over your internet connection. VOIP works with the same modem, router, and internet service you're currently using at your business. It provides high call quality along with the freedom of mobility.

Simple enough, right?

The Freedom of Flexibility

Nowadays, if you're not able to do business outside of the office, you're **losing productivity**.

With **CleanVoice**, you can take your phone with you anywhere. While you can still keep your desk phone, you can also immediately transfer calls to a cell phone. You can even make a call from your business line using your laptop anywhere in the world, so long as you have a headset with a microphone and a Wi-Fi signal.

You can also add and remove lines as needed without the need for time-consuming installation or wiring.

With CleanVoice, your productivity goes up while your expenses come down.

Cost Effective and Reliable

CleanVoice does not use traditional phone services to make calls – it is entirely Internet-based. **Thereby, your bill to the phone company vanishes, and you pay only for the CleanVoice service and perhaps some hardware.**

And don't forget the instant addition of lines, even outside of the workplace: if an employee arranges to begin working from home, setting up a CleanVoice line for them at their home computer is as simple as plugging in a USB device and configuring the line.

Done. No gigantic phone company installation costs, no grief – just productivity and efficiency.

VOIP can cut initial startup costs for a new business by up to 90% – tech.com

User Friendly

CleanVoice has a user-friendly interface, allowing you to be hands-on with any changes.

You can quickly update business hours, holidays or set a voicemail message with ease.

However, if you need a little extra assistance, **Braver Technology Solutions offers unlimited phone support for all CleanVoice customers.**
