

Accounting Services

You Need An Accounting IT Support Partner Who Knows What Your CPA Business Requires.

call (212) 286-0325 | fax (646) 607-9011 | email Sales@KrantzSecure.com | visit www.KrantzSecure.com

Accounting Services

When providing IT service and support, it's no longer enough to know about technology alone. A real IT Partner understands every aspect of your accounting business—What you do and how you do it. Krantz Secure Technologies (KST) does. We're a Member of the NYSSCPA and serve on their Technology Assurance Committee.

As your IT Partner, we can develop, install and maintain technology solutions to improve your operational functions and security. We do this for many accounting firms throughout the NYC Metro Area.

Our professionals are versed on the latest IT, network, software, and hardware solutions you rely on every day, including:

- ✓ ProSystems fx: Tax, Document, Engagement, Practice Management
- ✓ QuickBooks
- ✓ Lacerte
- ✓ GoFileRoom
- ✓ BNA Income Tax Planer
- ✓ Thomson Reuters Checkpoint Tools
- ✓ SuperForm Tax Forms

We understand how important automation has become in the accounting industry.

To remain competitive, it's imperative that you spend less time gathering and summarizing data, so you can concentrate on analyzing it and advising your clients. After all, this is the value your customers look to you for.

The more you can integrate data with multiple applications, and provide solutions to share access to data with your clients, the more accurate and timely your work will be—Again, this adds value for your customers and more profitability for your firm.

We also understand the importance of scanning, document management systems, secure file sharing, client portals, and improved workflows.

But here's the bottom line—Your critical IT systems must remain reliable and highly secure—And if a problem arises, a prompt and professional response is essential.

Call Now!
(212) 286-0325

Established in 1980, Krantz Secure Technologies is one of the New York Metropolitan Area's oldest and most trusted network and security services integrators. We combine the highest level of technical expertise with a passionate commitment to customer service.

We pride ourselves on maintaining Best-in-Class response time metrics—And our proven processes and best-practice standardization consistently reduces the number of issues our client's experience.

Plus, we'll provide:

✓ **Data Security**

We're security experts. With the ever-increasing threats from cyber criminals, we conduct risk assessments so your data is protected. Plus, we'll train your staff to be on the lookout for attempted scams that are targeting them.

✓ **Identity and Access Management**

We'll ensure only authorized individuals have to access your IT resources. This is crucial to comply with security regulations, and important for any accounting firm.

✓ **Efficient Use of Cloud Computing**

This provides reliable and scalable access to resources, applications, and services. Software as a Service (SaaS) uses cloud-computing that provides a single application to multiple users in any location, instead of using the traditional one application per desktop. Cloud computing provides scalability of resources as your firm grows, and can reduce the need for costly hardware and software.

✓ **IT Budget and Cost Control**

To plan for the future, we'll design and implement a cost-control process for IT service, support and equipment procurement. We'll suggest strategies to achieve your goals with savings in mind.

You can count on Krantz Secure Technologies to be your Expert IT Partner and Advisor so that you can be a trusted financial advisor for your clients.

Contact us at (212) 286-0325 or ITsolutions@krantzsecure.com to book a complimentary review of your accounting firm's IT needs.
