Brief Description of Project			

This project involves the demolition and removal of approximately 26,000 sqft of asphalt roofing to the concrete deck. New work includes priming the deck, installation of a vapor retarder, tapered insulation, roof board and the installation of a fabric-reinforced TPO (60Mils). Installation of new Walking Pads, new Pre-Finished Metal Coping, new Curb with continuous galvanized cap flashing, new Exhaust Fans, new Electrical Outlets and new Hose Bid. This project also includes the infill of 3 skylights.
