

**Grant Services**

*R.O. Anderson has dedicated staff to identify funding opportunities for public works projects. We understand that many public entities have neither the time nor resources necessary to fully research, monitor, and apply for federal, state, and local grant funding.*

*R.O. Anderson analyzes grant/loan opportunities on a continual basis for a number of its clients and our team of professionals is available to help future clients find opportunities and develop the professional, convincing documentation necessary to generate competitive grant/loan requests. Additionally, once the funding is awarded, R.O. Anderson can assist with grant administrative services*

**Funding Solutions from Concept to Completion**

Our Grant Services team is here to provide funding solutions to a variety of public improvements, including those found within Capital Improvement Plans (CIP), utility mandates, remediation and rehabilitation, community planning efforts, environmental improvement projects and hazard mitigation plans and improvements.

- Needs Assessment

- Public Participation
- Cost-Benefit Analysis
- Preliminary Design
- Environmental Review
- State Revolving Loans
- Federal Loans
- Alternative Revenue Sourcing
- Grant Administration
- Preliminary Engineering Reports
- Demographics
- Feasibility Reports
- Hydrology/Hydraulics Analysis

Typically, our services begin with a request to identify funding for a specific project or priority project found within a CIP. Our team then researches all available potential sources of grant and loan funding available through Federal and State sources. Since the timeline for responding to grant opportunities is often very short, the ability to produce convincing documentation in very short time frame is required. This often puts public agencies in a difficult position due to the time needed to amend budgets or find other available resources, including staffing, needed to produce the required documentation. Our team works with local officials to build a flexible strategy allowing communities to capitalize on available grant resources and be responsive to compressed timeframes.

For more information on how our Grant Services team can assist you with your project, please call Stephanie Hicks, AICP at 775-782-2322 or email us at [info@roanderson.com](mailto:info@roanderson.com)
