

Planning Services

Our land use planning team has significant and varied experience assisting the public sector with development code regulations, development review services, hazard mitigation and grant applications.

Our planners routinely review and analyze development codes and policies and in order to identify goals and make practical policy recommendations for the community. We also provide to our private sector clients a range of development services including property analysis, project design and permit facilitation.

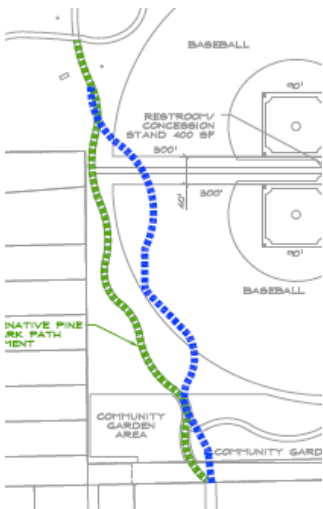

City of Bishop, CA Park Master Plan

Planning with a Focus on Implementation

All of our planners are certified through the American Institute of Certified Planners (AICP) and have years of public sector work experience. As such, we understand the problems and challenges facing public agencies in navigating the process of developing and implementing a full range of planning projects.
