Programmer Wearable Antenna Assembly Freedom-8A/-4A Receiver

Freedom System offers the same therapy as other systems... without an implanted battery, the system is only 5% the size, and is the Most Minimally Invasive.

Don't lose out on therapy options. Program for Low Frequency, High Frequency*, Surge, DRG, or PNS.

Upgrade your externals to evolve with your lifestyle and cutting edge technology. No surgery needed for upgrades.

*CAUTION - Investigational device. Limited by Federal (or United States) law to investigational use. Pulse Rate Capabilities above 1,500 Hz to 10,000 Hz are limited by Federal (or United States) to Investigational Use.

Indications for Use. The Freedom System is intended as the sole mitigating agent, or as an adjunct to other modes of therapy used in a multidisciplinary approach for chronic, intractable pain of the trunk and/or lower limbs; all peripheral nerves excluding the cranial nerves. The Freedom System is contraindicated for patients who: are unable to operate the Freedom System, are poor surgical risks, are pregnant, have an occupational exposure to high non-ionizing radiation, are implanted with cardiac system, or diathermy. Refer to the Instructions for Use provided with the Freedom System or Stimwave.com for potential adverse effects, warnings, and precautions prior to using this product. Rx Only. Caution: Federal law (USA) restricts these devices to sale by or on the order of a physician. Wireless Pain Relief® is a registered trademark of Stimwave. Stimwave LLC is a distributor of Stimwave Technologies Inc. and StimQ LLC.

TREAT YOUR KNEE PAIN

With the Freedom Stimulator System
Less Pain and More Living™

wireless pain relief®

CHRONIC KNEE PAIN

Over 500,000 total knee replacements are done each year in the USA. While most are successful, chronic postoperative pain occurs frequently. The pain is believed to be caused from peripheral nerve or soft tissue injury, or even neuroma formations, causing joint pain in more than 20% of patients over one year following the surgery. Treatment options include: **knee mobilizations, surgical revisions, nerve block injections, physical therapy, radio frequency ablation, or pain medication such as non-steroidal anti-inflammatory drugs (NSAIDS) or opioids.** You may have also tried physical therapy, anesthetic patches, and TENS. If you are one of these patients, you may have a significant disability and are dealing with ongoing rehabilitation at great expense and inconvenience. Although these treatments **may have provided some short-term relief, many times the pain returns...** Peripheral nerve stimulation with the Freedom Stimulator system may be a viable option to let you start living again with less pain for long-term relief! The Freedom Stimulator is placed with a minimally invasive procedure through only a small incision over the lateral and medial knee. The ability to restore mobility and freedom with less knee pain, for more living as quick as the same day, puts you back in control of your life!

FREEDOM STIMULATION SOLUTION

Why Stimulation?

Stimulation uses electrical signals to interrupt pain signals to the brain. A stimulator, the size of a very small wire with electrodes on it, is placed near the painful nerve to deliver electrical pulses. The intensity and frequency of the electrical current are able to alleviate your pain and help you get back to a normal life! You control the therapy as the Freedom System integrates Wireless Pain Relief® into your clothes and daily activity, so you can have less pain and more living!

FULL BODY PAIN RELIEF®
