Data Back-up

Data Back-Up from ITS is simple, secure online backup at an affordable price.

ITS Data Back-up protects your files by keeping a copy safely online, in the cloud. It's hassle-free, easy-to-install, completely secure, and backs up all your important files, no matter how many you've got!

Keep your files safe - ITS Data Back-up works quietly in the background to protect your files as you use your computer. You don't need any technical knowledge to back-up all your important files. You can restore your files at any time with one click.

View your files anywhere - Once you've backed up your files with ITS Data Back-up you can view them from anywhere - from any web browser, mobile or tablet device, and modify your files wherever you are.

Complete peace of mind - With ITS Data Back-up you can be sure your files are safe and secure. We keep multiple copies of your files, so you can get to them at any time. And we encrypt them with military-grade encryption, so that they're completely private. If you need help at any time our outstanding support comes free!

94% of companies that suffer a catastrophic data loss wihtout back-up will go out of business within two years.

- Pricewaterhouse Coopers

Anti-Virus & AntiSpam Solutions

ITS Anti-Spam – Confidently block unwanted email before it reaches your corporate network.

ITS Anti-Spam is a cloud based email security service that blocks unwanted email before it reaches the corporate network. Its unique technology also identifies address-sharing and sources of spam, and provides concrete tools for preserving the integrity of one's primary email address.

ITS Anti-Spam Features Include:
- Automatic inbound email queuing assures email continuity in the event of a local server outage.
- Outbound email filtering protects your business reputation and helps to avoid the business disruption of IP address blacklisting.
- Wide range of capabilities and blended defense provide maximum user control and the versatility to accommodate highly customizable user preferences.
- Address-on-the-Fly™ (AOTF) assures delivery and protects the user's primary email address. AOTF also provides users with a unique capability for disclosing email aliases as an alternative to their primary address.
- In-message control panel informs and empowers users, providing a simple and intuitive means for bi-directional communication between the user and the service.

ITS Anti-Virus – Best in class threat detection that's easy to use.

With ITS Anti-Virus you can be confident that we will identify and stop Advanced Persistent Threats (APTs), targeted attacks and other sophisticated malware designed to evade traditional cyber-defenses. Our antivirus product combines anti-malware and antispyware into a single, small-footprint security solution designed to provide comprehensive malware protection without slowing PCs or networks. Using next generation technology, we protect your computers from all types of malware threats including viruses, adware, spyware, worms, rootkits and more.

ITS Anti-Virus Features Include:
- High performance threat protection with low impact on system resources.
- New technology delivers a powerful antivirus and antispyware engine.
- Offers advanced anti-rootkit technology.
- Real-time monitoring.
- Full protection against email-borne threats.

ITS Anti-Virus is powered by Vypre™
ITS Anti-Spam is powered by Reflexion Total Control (RTC)™
