

Complete
Communications
Since 1990

Why ITS

**Let's face it. Technology breaks.
The key is to have a partner that can
minimize the impact to your business.**

ITS Overview

Since 1990, we've been providing solutions for businesses in and around Southern and Central California from our headquarters in Simi Valley. Now with hosted solutions we can offer services nationwide while still providing those friendly touches that keep our customers coming back time after time. We're specialists in telecommunication systems and Managed Service. It's simple; if you need communication or IT services, support and solutions, ITS is the local company to call.

Business these days relies on innovation and technology to effectively run a "connected" office. With our robust portfolio of advanced telecommunications/networking technologies and world-class offerings, ITS-Integrated Telemangement Services, Inc.; is committed to supporting organizations of all sizes to build their "Next Generation Networks;" in order to meet the demands of their customers. At ITS, our customers come first and an integral part of our DNA is creating long-lasting partnerships and working with our

customers to identify their needs and provide solutions that support their success. As a reseller of services, ITS develops custom solutions leveraging a variety of vendors and underlying carriers thus providing customers the flexibility, redundancy and stability not available when partnering with most other vendors.

Why ITS

Let's face it. Technology breaks. When that happens, you want to know that you will be able to get in touch with someone who can solve the problem quickly. When you call ITS you will not get stuck in an automated system pressing number after number trying to get to the appropriate person who can solve your issue. At ITS, live, friendly telecom professionals in our Southern California service department answer our phones and are trained to assist you on the first call. You will know the names of the people who can assist you and you will have easy access to them.

Company Organization

ITS employs a workforce of professional and technology specialists that live throughout Ventura and Los Angeles Counties. Our employee population is divided into two main segments, with about two-thirds of our employees in technical operations and customer care roles, and the remaining one third in administrative functions. This workforce profile reflects ITS' intense focus on delivering the right technology solutions to meet our customers' needs as well as the importance of providing world class customer care.
