

Consolidate. Grow. Cost-effectively and reliably.

Expand capacity

Moving into new markets or acquiring new companies means increasing data center resources. In today's climate of tight budgets, finding the funds to build a new data center is no easy task. What's more, data center construction can take as long as 12-18 months.

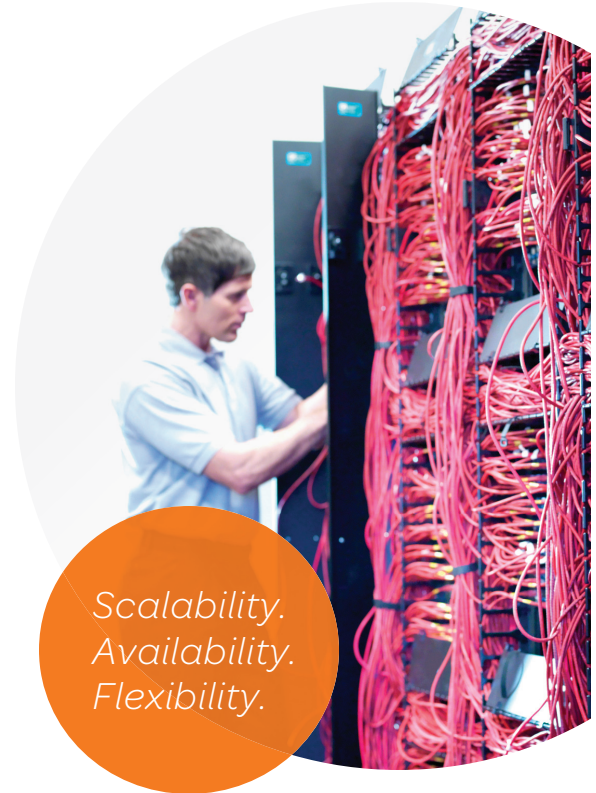

AT&T Colocation Hosting Services is a subscription-based, turnkey solution that delivers high-bandwidth, low-latency connections, along with a high availability presence at AT&T Internet Data Centers. Now, you can avoid facility construction and related expenses, while simplifying IT management and budgeting.

Unmatched availability

With AT&T, you can quickly expand both capacity and data reach with less disruption and more flexibility. AT&T Internet Data Centers consistently deliver the highest standards for enterprise performance, reliability, and security – backed by our 99.999 percent availability guarantee.

Maintain control

AT&T Colocation Hosting Services allows you to maintain control over your data within a fully redundant, enterprise-class data center, while freeing up your IT staff to focus on other business initiatives.

Benefits

- Quickly deploy high bandwidth, low latency IT services globally
- Achieve 99.999 percent availability
