

DATA BACK-UP & SECURITY

Traditional Data Back-up

Get on hold with customer support

Disaster Strikes
What happens next?

Intelligent Business Continuity

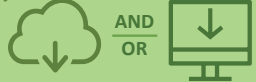

Immediately speak with a friendly ITS Technician

File-based Back-up

Could be hours or days to get a new server and configure the operating system; because you choose which files to back-up, your data recovery may not be complete

Pull from multiple data sources

AND/OR

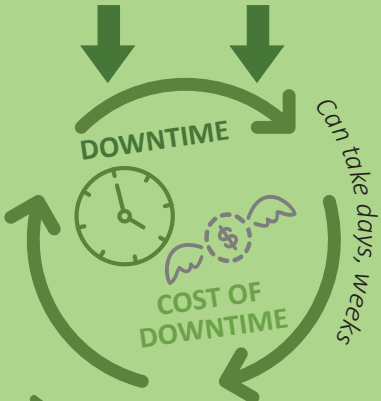

for *Instant Recovery*
See your files again in seconds, minutes, hours

Fully Automated Back-up Process

Image-based Back-up

All of your data is captured in its environment with exact replications of what is stored on a server including the operating system, configurations, and settings

LOST FILES

DATA CAN BE CORRUPTED

LIMITED ENCRYPTION OPTIONS

Data is manually managed by a human

58% of downtime is due to HUMAN ERROR

Your multiple back-up sources are automatically updated with ALL the secure, encrypted data that you work with
